Freelance Writers Win Landmark Electronic Rights

Lawsuit; Appeals Court Ruling Opens Door for Massive Claims Against Media Industry.

NEW YORK: The National Writers Union (UAW Local 1981) announced today that a federal appeals court had ruled in favor of freelance writers in a landmark lawsuit that protects their intellectual property and extends standard principles of copyright law to electronic publishing. The September 24th ruling in *Tasini vs. The New York Times* is expected to send shock waves throughout the media industry, which now faces the direct financial threat of widespread copyright infringement actions.

Jonathan Tasini, the lead plaintiff in the case and the NWU's president, called upon leaders of the publishing industry to avoid further costly and disruptive litigation by entering into immediate negotiations with the National Writers Union to establish a fair method of compensation for the electronic sale and re-sale of copyrighted works. "This ruling is a major victory for the 5,400 free-lance writers who are members of our union, and for creative workers around the world," said Tasini. "As of this moment, a federal court has supported our view that copyrighted material is being illegally sold every day by media companies. We hope companies everywhere will come to us to negotiate a fair deal for writers rather than face a costly legal tsunami."

He cited the union's simple solution: the Publications Rights Clearinghouse (PRC), the first-ever, transaction-based licensing system for freelance writers. "We're already sending money to writers from legal copyright usage so we can do so easily in this case," he said. He noted the PRC's expanding relationship with the Copyright Clearance Center, which can handle the technical processing of thousands of daily transactions. "Writers, scholars and creators will now be able to earn a fair share of revenue from the sale and re-sale of their works in cyberspace," he said. He also thanked the other plaintiffs in the case: Mary Kay Blakely, Margot Mifflin, David Whitford, Barbara Garson and Sonia Jaffe Robbins.

In a ruling released late Friday, September 24th, a three-judge panel of the U.S. Court of Appeals, Second Circuit, ruled that the New York Times, Lexis-Nexis, and other publishers cannot re-sell freelance newspaper and magazine articles by means of electronic databases unless they have the authors' express permission. The ruling overturns an earlier opinion in the case issued by former Federal District Court Judge Sonia Sotomayor. In that ruling, according to the Court of Appeals, Sotomayor erroneously interpreted the Copyright Act in finding that publishers were simply creating a "revision" of a print article when they sold the articles to electronic databases and other media. The decision sets a precedent that will apply to thousands of other writers, photographers and other creators whose copyrighted work has been sold and re-sold without their permission. In announcing the legal victory, Tasini credited Patsy Felch, the lawyer for the majority of the plaintiffs, and the United Auto Workers-parent union of the NWU-which provided critical legal and financial support. "We're proud to stand with the members of the Writers Union as they assert their rights in cyberspace," said UAW Vice President Elizabeth Bunn, who heads the union's 100,000-member Technical, Office and Professional department. "This ruling will require that the publishing industry deliver fair compensation to the people who make their profits possible in the first place."

According to award-winning NWU member Gerald Posner, the "Court of Appeals has stated a simple but powerful legal principle-publishers can't sell what they don't own. I'm not a conglomerate. I don't have any divisions or subsidiaries. The words I write are my principle asset. By affirming that I own what I have created, the court has increased the economic value of my work, and eased the path to independent writing, research, and scholarship." Databases

such as Lexis Nexis, websites and other new media contain thousands of articles written by freelance contributors, which originally appeared in the New York Times and many other publications. The Appeals Court decision means publishers will now have to share that revenue with freelance writers-or face potential litigation.

In the absence of successful negotiations, Tasini said, publishers could be exposed to years of litigation and uncertain financial liability, impacting the operations of thousands of databases, web sites, and other electronic publishing formats. "We don't think continued litigation is in anyone's best interests," said Tasini. "But make no mistake about it. We fought this suit for six years, and we intend to pursue this matter until all writers involved are treated fairly. It's up to the industry to decide whether we work together at the negotiating table, or whether we continue to fight in court." "The longer this cyber-piracy continues, the more liabilities for past infringement there will be," said Tasini.

## Tasini v New York Times Ruling What Does it Mean for Writers?

- \* Press Release on Lawsuit Victory
- \* How Freelancers Should Negotiate in the Wake of the Ruling
- \* What We Need to Do Collectively
- \* Full Text of Ruling, September 24, 1999.

(Posted on Touro Law Center site.)

On September 24, 1999, the Second Circuit Court of Appeals reversed a federal district court decision against the plaintiffs in *Tasini et al. v. New York Times et al.* The appeals court ruled that the reuse of freelance work on databases and CD-ROMs without the authors' express permission constitutes copyright infringement.

This is a major victory for all independent creators. The purpose of this document is to explain the ruling and to suggest what writers should do next: both collectively and in our individual contract negotiations.

### WHAT THE DECISION SAYS

Q. In a nutshell, what did the ruling say?

A. The judges ruled that, even when there is no contract relating to electronic rights, a print publisher may not put the writings of freelancers on databases (such as Nexis) and CD-ROMs that include the entire textual content of the print publication.

Q. Does this mean that freelancers automatically retain electronic rights to their printed work?

A. Yes, under the Copyright Act of 1976, the writer, in the absence of a written contract, transfers only First North American Serial Rights and retains all other rights. The right to electronically reproduce freelance articles is not included in the transfer of First North American Serial Rights. The judges also affirmed the lower court's ruling on publishers' efforts to acquire rights by stamping a statement on the back of checks. Writers do not transfer rights to an article by simply endorsing such a check.

Q. Why did the district court rule in favor of the publishers?

A. Judge Sotomayor based her conclusion on an interpretation of Section 201(c) of the Copyright Act of 1976, which deals with the copyright in "collective works." She focused on the language in Section 201(c) that gives the holder of the copyright in the collective work the limited privilege of reproducing and distributing revisions of the compilation. The judge came to the bizarre conclusion that certain kinds of electronic databases amount to nothing more than a "revision." As the appeals court pointed out, reading "revision" that broadly causes "the exception to swallow the rule."

Q. How do my individual electronic rights in an article relate to the publisher's collective electronic rights in all of the articles it has published?

A. If you have not expressly transferred to the publisher the right to reproduce your work electronically, the publisher cannot legally license your articles to databases. The publisher only has the right to license database rights to articles that were written by employees and articles written under contracts that transfer electronic rights.

Q. What about other kinds of electronic rights?

A. This decision reaffirms the NWU's position on websites. Publishers do not automatically have the right to put your work on their own website. Web rights are separate from print rights and must be licensed separately. See the NWU Web-rights Policy.

**Q. What does the ruling mean for the NWU's Publication Rights Clearinghouse (PRC)?**

**A. It means that publishers now have more reason than ever before to negotiate collective licensing agreements with the PRC. As long as writers stand together and refuse to sign electronic rights over to publishers in their individual contracts, the PRC will be in a strong position to negotiate additional fees for these rights. And that means that writers will be able to share in the revenue generated by the use of their work in new media.**

## How Freelancers Should Negotiate in the Wake of the Ruling

Q. How does the ruling affect my negotiations with an editor?

A. Publishers will continue to pressure writers to sign away electronic rights for no additional compensation. We must continue the fight against all-rights and work-for-hire contracts. We demonstrate our collective strength by individually refusing to give away these rights.

The NWU recommends the following negotiating strategy:

1. Continue trying to negotiate contracts that give publishers nothing more than First North American Print Rights, or that provide for additional compensation for other uses. Continue using the NWU's Standard Journalism Contract.
2. If you can't retain the electronic rights and you can't get the editor to provide extra compensation explicitly tied to database use, argue for a higher print fee since the article is now worth more to the publisher.
3. Be especially careful to license different types of electronic rights separately. Lexis-Nexis rights are separate and distinct from Dialog rights; the right to include the article on the publisher's own website is separate and distinct from the right to include it on third party web sites. License only non-exclusive rights and try to limit the license to one year.
4. Please let the NWU know how your negotiations with editors change in the wake of the lawsuit ruling. Send copies of contracts and short summaries of your negotiating experiences to the National Office East by fax [212- 254-0673] or by e-mail .

# COURT OVERTURNS TASINI RULING

THE VERDICT MAY BE GOOD NEWS FOR PHOTOGRAPHERS WITH CASES PENDING AGAINST PUBLISHERS.

BY LIZ HANELLIN

THE SECOND CIRCUIT COURT OF APPEALS HAS REVERSED the *Tasini v. New York Times* decision, and ruled that publishers may not take individual articles from their publications and put them on electronic databases available to the public without written permission from the authors.

Observers are hailing the September 24 appeals court decision as an important victory for all authors, including photographers, now that publishers are widely archiving and redistributing articles and photos in electronic media. But publishers are likely to respond by pressuring freelancers to sign contracts that grant publishers electronic rights.

In 1997, *The New York Times* and several other publishers won a stunning victory when a Federal trial court ruled that, in the absence of any written agreement,

they could re-distribute individual articles from their publications through NEXIS and other electronic databases without permission from the authors. Copyright law allows publishers to distribute "revisions" of a collective work without permission from copyright owners of the underlying individual works, such as articles or photos. The lower court agreed with the publishers' claim that the electronic databases were revisions of the original print versions of their publications.

Jonathan Tasini, president of the National Writers' Union, and five other plaintiffs appealed the decision, arguing that the databases in question were not revisions, but separate works requiring a separate usage license. The appeals court has agreed, saying that the privilege of publishers to distribute revisions "does not

permit the Publishers to license individually copyrighted works for inclusion in the electronic databases."

"There is no feature peculiar to the databases at issue in this appeal that would cause us to view them as 'revisions,'" the appeals court said. "NEXIS is a database comprising thousands or millions of individually retrievable articles taken from hundreds or thousands of periodicals. It can hardly be deemed a 'revision' of each edition of every periodical that it contains."

The lower court's decision had been widely by criticized by artists' groups as an overly broad interpretation of the copyright statute. So it is no surprise that the Second Circuit's decision is a welcome one to many intellectual property attorneys and their clients. Nancy Wolff, attorney for the Picture Agency Council of America

# COURT OVERTURNS TASINI RULING

THE VERDICT MAY BE GOOD NEWS FOR PHOTOGRAPHERS WITH CASES PENDING AGAINST PUBLISHERS.

BY LIZ HANELLIN

THE SECOND CIRCUIT COURT OF APPEALS HAS REVERSED the *Tasini v. New York Times* decision, and ruled that publishers may not take individual articles from their publications and put them on electronic databases available to the public without written permission from the authors.

Observers are hailing the September 24 appeals court decision as an important victory for all authors, including photographers, now that publishers are widely archiving and redistributing articles and photos in electronic media. But publishers are likely to respond by pressuring freelancers to sign contracts that grant publishers electronic rights.

In 1997, *The New York Times* and several other publishers won a stunning victory when a Federal trial court ruled that, in the absence of any written agreement,

they could re-distribute individual articles from their publications through NEXIS and other electronic databases without permission from the authors. Copyright law allows publishers to distribute "revisions" of a collective work without permission from copyright owners of the underlying individual works, such as articles or photos. The lower court agreed with the publishers' claim that the electronic databases were revisions of the original print versions of their publications.

Jonathan Tasini, president of the National Writers' Union, and five other plaintiffs appealed the decision, arguing that the databases in question were not revisions, but separate works requiring a separate usage license. The appeals court has agreed, saying that the privilege of publishers to distribute revisions "does not

permit the Publishers to license individually copyrighted works for inclusion in the electronic databases."

"There is no feature peculiar to the databases at issue in this appeal that would cause us to view them as 'revisions,' " the appeals court said. "NEXIS is a database comprising thousands or millions of individually retrievable articles taken from hundreds or thousands of periodicals. It can hardly be deemed a 'revision' of each edition of every periodical that it contains."

The lower court's decision had been widely criticized by artists' groups as an overly broad interpretation of the copyright statute. So it is no surprise that the Second Circuit's decision is a welcome one to many intellectual property attorneys and their clients. Nancy Wolff, attorney for the Picture Agency Council of America

## COURT OVERTURNS TASINI RULING

(PACA), calls the Second Circuit's decision "a very good ruling." Joel Hecker, an intellectual property attorney who represents many photographers, views the decision in *Tasini* as a vindication of artist's rights. "Justice is being done on an incorrect reading of the statute," he says.

The *Tasini* decision is good news for photographers who have cases pending in Miami and New York against the National Geographic Society for re-using their photographs, without their permission, in a CD compilation of back issues of the *Geographic*. Stephen Weingrad, who represents the photographers in the New York case, is pleased with the decision. His case had been stayed pending the result in *Tasini*, which, the Geographic attorneys claimed, would be controlling law for their case. Given the result in *Tasini*, Weingrad thinks the Geographic should "confess judgment."

In Florida, a Federal court relied on the original *Tasini* decision to dismiss photographer Jerry Greenberg's claims that the National Geographic Society infringed his copyrights by using his pictures on the CD. "This is stunning," Greenberg says of the reversal of *Tasini*. He still has the option to appeal his claim against NGS. Meanwhile, Greenberg has since won other infringement claims against NGS that were unrelated to the CD. He's about to enter settlement talks the publisher on those claims. The *Tasini* reversal, he says, "gives us tremendous advantage" going into those talks.

But the *Geographic* is also applauding the appeals decision. "It's good news for us. Our CD project is a

faithful reproduction of every page of every issue of our magazine—the kind of faithful reproduction that the Second Circuit Court of Appeals found lacking in the *Tasini* case," says director of photography Kent Kobersteen. In other words, NGS will continue to argue that its CD is a revision of its previously published magazines, so the publisher doesn't need permission from photographers to include their images on the CD.

Lawyers are certain to argue the point. In reversing *Tasini*, the appeals court noted that a *New York Times* database on CD-ROM contains both individual articles and "image-based" files of the Sunday magazine and Book Review sections. Those files are created by scanning the printed pages directly onto the CD. Despite those faithful reproductions, the court ruled that those CDs were not revisions of the original printed versions of the Times.

What does this landmark case mean for other photographers? Importantly, they will now have the opportunity to collect fees for previous unauthorized electronic uses, particularly in databases. Across the industry, such uses may number in the thousands.

In the future, though, publishers will no doubt put pressure on writers and photographers to sign "all-rights" or "work-for-hire" contracts or, at the very least, to sign over electronic reproduction rights, attorneys predict. "The question is how much they'll pay for those additional rights," says Hecker. His advice: "Make sure you understand what rights you are transferring, and make sure you agree to the compensation." □

The new ruling declares that electronic databases are not a "revision" under copyright law, but leaves unanswered questions about other electronic publishing projects. "The Complete National Geographic" CD-ROM, for example, reproduces every page of every issue of the magazine for the last 108 years. If it is a revision, the National Geographic Society owes no licensing fees to freelance photographers whose work appears on the CD-ROM. If the CD-ROM is a new work, the publisher may owe photographers hundreds of thousands of dollars in usage fees.

## YOU AND THE LAW

.....

### TASINI REVERSED ON APPEAL

by Joel Hecker

In my July 1998 column in PhotoStockNotes, I reported that the plaintiffs had appealed a U.S. District Court decision in New York, in which the Court held that publishers, who had published articles (and by extension, photographs) in hard copies (newspapers and magazines) with the consent of the copyright owners, could republish the copyrighted material electronically (without consent) and permit a database to do so.

The District Court had determined that electronic use was a collective work under section 201 (c) of the U.S. Copyright Act, but the Court also recognized that the decision would deprive creators of important economic benefits.

That decision has now been overturned on appeal. The appeal panel, in a unanimous decision, held in substance, "that the privilege afforded authors of collective works...does not permit the Publishers to license individually copyrighted works for inclusion in the electronic databases."

The Court reasoned that the relevant Section of the Copyright Act 201 (c), has three clauses, which must be read in harmony. The first clause sets the floor, permitting the Publisher to reproduce and distribute individual contributions as part of "that particular collective work" -- which would be that issue of the newspaper or magazine. The third clause sets the ceiling - permitting reproduction and distribution as part of a "later collective work in the same services," such as a new edition of a dictionary or encyclopedia.

The second clause, which was at issue in the case, must, the Court reasoned, fall between, and not expand beyond, the first and third clauses. Therefore it defines a "revision" of "that collective work" to be a later edition, such as a daily newspaper, which is somewhat altered but not in any ordinary sense a "later" work in the "same series."

Putting articles from a collective work into an electronic database, the court held, is an infringement of the author (or photographer's) copyright, since the collective work no longer exists as a collective work, mixed into hundreds or thousands of other collective works.

The decision shows, once again, that the Copyright Act can properly protect rights of photographers in this new electronic age.

Attorney Joel L. Hecker lectures and writes extensively on issues of concern to the photography industry. His office is located at Russo & Burke, 600 Third Ave, New York NY 10016. Phone: 1 212 557-9600. Email: Heckeresq@aol.com.

Before: WINTER, *Chief Judge*, MINER, and POOLER, *Circuit  
Judges.*

Appeal from a grant of summary judgment entered in the United States District Court for the Southern District of New York (Sotomayor, *J.*). Appellants are authors who own copyrights to individual articles previously published in periodicals. They claim infringement by appellee publishers and owners of electronic databases who made the articles available on the electronic

databases. The district court held that appellees are protected by the privilege afforded the publishers of "collective works" under Section 201(c) of the Copyright Act. We reverse and remand with instructions to enter judgment for appellants.

EMILY M. BASS, Gaynor & Bass, New York, New York (Linda A. Backiel, Michael J. Gaynor, Nicole M. Zeiss, Joanna Kyd, Gaynor & Bass, on the brief; Alice Haemmerli, Columbia University School of Law, New York, New York, of counsel), *for Plaintiffs-Appellants Barbara Garson and Sonia Jaffe Robbins*.

PATRICIA A. FELCH, Peterson & Ross, Chicago, Illinois (Anthony L. Abboud, Joshua L. Smith, Peterson & Ross, of counsel; Jordan Rossen, Detroit, Michigan, of counsel), *for Plaintiffs-Appellants Jonathan Tasini, Mary Kay Blakely, Margot Mifflin and David S. Whitford*.

Victor S. Perlman, Princeton Junction, New Jersey, *for Amici Curiae American Society of Media Photographers, Inc. et al.*

WINTER, *Chief Judge*:

Six freelance writers appeal from a grant of summary judgment dismissing their complaint. The complaint alleged that appellees had infringed appellants' various copyrights by putting individual articles previously published in periodicals on electronic databases available to the public. On cross motions for summary judgment, the United States District Court for the Southern District of New York held that appellees' use of the articles was protected by the privilege afforded to publishers of "collective works" under Section 201(c) of the Copyright Act of 1976 ("Act" or "1976 Act"), 17 U.S.C. § 201(c). We reverse and remand with instructions to enter judgment for appellants.

#### BACKGROUND

Appellants are freelance writers (individually, "Author" and collectively, "Authors") who write articles for publication in periodicals. Their complaint alleged that certain articles were original works written for first publication by one of the appellee publishers between 1990 and 1993. None of the articles was written at a time when its Author was employed by the particular periodical; nor was any such article written pursuant to a work-for-hire contract. The Authors registered a copyright in each of the articles.

The appellee newspaper and magazine publishers (collectively, "Publishers") are periodical publishers who regularly create "collective works," see 17 U.S.C. § 101, that contain articles by free lance authors as well as works created for-hire or by employees. With respect to the free lance articles pertinent to this appeal, the Publishers' general practice was to negotiate due-dates, word counts, subject matter and price; no express transfer of rights under the Author's copyright was sought. <sup>1</sup> As to one article alleged in the complaint, however, authored by appellant David S. Whitford for Sports Illustrated, a publication of appellee The Time Incorporated Magazine Company ("Time"), a written contract expressly addressed republication rights. We address Whitford's claim separately below.

Appellee Mead Data Central Corp. owns and operates the NEXIS electronic database. NEXIS is a massive database that includes the full texts of articles appearing in literally hundreds of newspapers and periodicals spanning many years. Mead has entered into licensing agreements with each of the Publishers. Pursuant to these agreements, the Publishers provide Mead with much of the content of their periodicals, in digital form, for inclusion in NEXIS. Subscribers to NEXIS are able to access an almost infinite combination of articles from one or more publishers by using the database's advanced search engine. The articles may be retrieved individually or, for example, together with others on like topics. Such retrieval makes the article available without any material from the rest of the periodical in which it first appeared.

We briefly describe the process by which an issue of a periodical is made available to Mead for inclusion in NEXIS. First, an individual issue of the paper is stripped, electronically, into separate files representing individual articles. In the process, a substantial portion of what appears in that particular issue of the periodical is not made part of a file transmitted to Mead, including, among other things, formatting decisions, pictures, maps and tables, and obituaries. Moreover, although the individual articles are "tagged" with data indicating the section and page on which the article initially appeared, certain information relating to the initial page layout is lost, such as placement above or below the fold in the case of The New York Times. After Mead further codes the

individual files, the pieces are incorporated into the NEXIS database.

Appellee University Microfilms International ("UMI") markets, *inter alia*, CD-ROM database products. Pursuant to an agreement with The New York Times and Mead, UMI produces and markets the "NY Times OnDisc" ("NYTO") CD-ROM, which contains the full texts of articles from The New York Times. It also produces and markets a "General Periodicals OnDisc" ("GPO") CD-ROM, which contains selected New York Times articles and thousands of other articles. Pursuant to its agreement with Mead and The New York Times, UMI incorporates the files containing Times articles into its NYTO database. UMI uses a somewhat different methodology to incorporate articles from the NY Times Sunday book-review and magazine sections onto its GPO CD-ROM. As to these pieces, UMI scans them directly onto "image-based" files. The image-based files are also abstracted and included on the text-based CD-ROM; the abstracts facilitate access to the image-based disk.

The gist of the Authors' claim is that the copyright each owns in his or her individual articles was infringed when the Publishers provided them to the electronic databases. Appellees do not dispute that the Authors own the copyright in their individual works. Rather, they argue that the Publishers own the copyright in the "collective works" that they produce and are afforded the privilege, under Section 201(c) of the Act, of "reproducing and distributing" the individual works in "any revision of that collective work." 17 U.S.C. § 201(c). The crux of the dispute is, therefore, whether one or more of the pertinent electronic databases may be considered a "revision" of the individual periodical issues from which the articles were taken. The district court held that making the articles available on the databases constitutes a revision of the individual periodicals and that appellees' licensing arrangements were protected under Section 201(c). *See Tasini v. New York Times Co.*, 972 F. Supp. 804 (S.D.N.Y. 1997) ["Tasini I"]. It therefore granted appellees' motion for summary judgment. After a motion for reconsideration was denied, *see Tasini v. New York Times Co.*, 981 F. Supp. 841 (S.D.N.Y. 1997) ["Tasini II"], appellants brought this appeal.

## DISCUSSION

We review *de novo* the grant or denial of summary judgment and view the evidence in the light most favorable to the non-moving party. *See Turner v. General Motors Acceptance Corp.*, 180 F.3d 451, 453-54 (2d Cir. 1999). Summary judgment is appropriate only if the pleadings and evidentiary submissions demonstrate the absence of any genuine issue of material fact and that the moving party is entitled to judgment as a matter of law. *See id.* at 453.

The unauthorized reproduction and distribution of a copyrighted work generally infringes the copyright unless such use is specifically protected by the Act. To reiterate, each Author owns the copyright in an individual work and, save for Whitford, *see infra*, has neither licensed nor otherwise transferred any rights under it to a Publisher or electronic database. These works were published with the Authors' consent in particular editions of the periodicals owned by the Publishers. The Publishers then licensed much of the content of these periodicals, including the Authors' works, to one or more of the electronic database providers. As a result, the Authors' works are now available to the public on one or more electronic databases and may be retrieved individually or in combination with other pieces originally published in different editions of the periodical or in different periodicals.

In support of their claim, the Authors advance two principal arguments: first, the Section 201(c) privilege that protects the Publishers' initial inclusion of individually copyrighted works in their collective works does not permit the inclusion of individually copyrighted works in one or more of the electronic databases; and, second, the privilege is not a transferrable "right" within the meaning of Section 201(d) and hence may not be invoked by the electronic database providers. The district court rejected both arguments, reasoning that the privilege is a "subdivision" of a right that is transferrable under Section 201(d)(2), 972 F. Supp. at 815, and that the scope of the privilege was broad enough to permit the inclusion of the Authors' pieces in the various databases, *see id.* at 824-25. We hold that the privilege afforded authors of collective works under Section 201(c) does not permit the Publishers to license individually copyrighted works for inclusion in the electronic databases. We need not, and do not, reach the question whether this privilege is transferrable under Section 201(d).

a) *The Section 201(c) Privilege*

Section 201 of the Act provides, *inter alia*, that as to contributions to collective works, the "[c]opyright in each separate contribution . . . is distinct from copyright in the collective work as a whole, and vests initially in the author of the contribution." 17 U.S.C. § 201(c). Correspondingly, Section 103, which governs copyright in compilations and derivative works, provides in pertinent part that:

The copyright in a compilation or derivative work extends only to the material contributed by the author of such work, as distinguished from the preexisting material employed in the work, and does not imply any exclusive right in the preexisting material.

17 U.S.C. § 103(b). Section 101 states that "[t]he term 'compilation' includes collective works." 17 U.S.C. § 101. It further defines "collective work" as "a work, such as a periodical issue, anthology, or encyclopedia, in which a number of contributions, constituting separate and independent works in themselves, are assembled into a collective whole." *Id.*

Absent any further provision, publishers of collective works would be unable to include individually copyrighted articles without receiving a license or other express transfer of rights from the author. However, Section 201(c) affords a privilege to authors of collective works. It provides in pertinent part that:

In the absence of an express transfer of the copyright or of any rights under it, the owner of copyright in the collective work is presumed to have acquired only the privilege of reproducing and distributing the contribution as part of that particular collective work, any revision of that collective work, and any later collective work in the same series.

17 U.S.C. § 201(c).

Under this statutory framework, the author of an individual contribution to a collective work owns the copyright to that contribution, absent an express agreement setting other terms. *See id.* The rights of the author of a collective work are limited to "the material contributed by the [collective- work] author" and do not include "any exclusive right in the preexisting material." 17 U.S.C. § 103(b). Moreover, the privilege granted to a collective-work author to use individually copyrighted contributions is limited to the reproduction and distribution of the individual contribution as part of: (i) "that particular [*i.e.*, the original] collective work"; (ii) "any revision of that collective work"; or (iii) "any later collective work in the same series." 17 U.S.C. § 201(c). Because it is undisputed that the electronic databases are neither the original collective work -- the particular edition of the periodical -- in which the Authors' articles were published nor a later collective work in the same series, appellees rely entirely on the argument that each database constitutes a "revision" of the particular collective work in which each Author's individual contribution first appeared. We reject that argument.

We begin, as we must, with the language of the statute. *See Lewis v. United States*, 445 U.S. 55, 60 (1980). The parameters of the Section 201(c) privilege accorded authors of collective works are set forth in the three clauses just noted. Under ordinary principles of statutory construction, the second clause must be read in the context of the first and third clauses. *See General Elec.*

*Co. v. Occupational Safety & Health Review Comm'n*, 583 F.2d 61, 64-65 (2d Cir. 1978) ("the meaning of one term may be determined by reference to the terms it is associated with" (citing 2A Sutherland, Statutory Construction §§ 47.16 (*Noscitur a sociis*), 47.17 (*Ejusdem generis*) (4th ed. 1973)); see also *Securities & Exch. Comm'n v. National Sec., Inc.*, 393 U.S. 453, 466 (1969) ("The meaning of particular phrases must be determined in context.") (citation omitted). The first clause sets the floor, so to speak, of the privilege: the collective-work author is permitted to reproduce and distribute individual contributions as part of "that particular collective work." In this context, "that particular collective work" means a specific edition or issue of a periodical. See 17 U.S.C. § 201(c). The second clause expands the privilege, to permit the reproduction and distribution of the individual contribution as part of a "revision" of "that collective work," *i.e.*, a revision of a particular edition of a specific periodical. Finally, the third clause sets the outer limit or ceiling on the privilege; it permits the reproduction and distribution of the individual contribution as part of a "later collective work in the same series," such as a new edition of a dictionary or encyclopedia.

The most natural reading of the "revision" of "that collective work" clause is that the Section 201(c) privilege protects only later editions of a particular issue of a periodical, such as the final edition of a newspaper. Because later editions are not identical to earlier editions, use of the individual contributions in the later editions might not be protected under the preceding clause. Given the context provided by the surrounding clauses, this interpretation makes perfect sense. It protects the use of an individual contribution in a collective work that is somewhat altered from the original in which the copyrighted article was first published, but that is not in any ordinary sense of language a "later" work in the "same series."

In this regard, we note that the statutory definition of "collective work" lists as examples "a periodical issue, anthology, or encyclopedia." 17 U.S.C. § 101. The use of these particular kinds of collective works as examples supports our reading of the revision clause. Issues of periodicals, as noted, are often updated by revised editions, while anthologies and encyclopedias are altered every so often through the release of a new version, a "later collective work in the same series." Perhaps because the "same series" clause might be construed broadly, the House Report on the Act noted that the "revision" clause in Section 201(c) was not intended to permit the inclusion of previously published freelance contributions "in a new anthology or an entirely different magazine or other collective work," *i.e.*, in later collective works not in the same series. H.R. Rep. No. 94-1476, at 122-23 (1976), *reprinted in* 1976 U.S.C.A.A.N. 5659, 5738.

Moreover, Publishers' contention that the electronic databases are revised, digital copies of collective works cannot be squared with basic canons of statutory construction. First, if the contents of an electronic database are merely a "revision" of a particular "collective work," e.g., the August 16, 1999 edition of The New York Times, then the third clause of the privilege sentence -- permitting the reproduction and distribution of an individually copyrighted work as part of "a later collective work in the same series" -- would be superfluous. See *Regions Hosp. v. Shalala*, 522 U.S. 448, 118 S. Ct. 909, 920 (1998) (Scalia, J., dissenting) ("It is a cardinal rule of statutory construction that significance and effect shall, if possible, be accorded to every word. As early as in Bacon's Abridgment, sect. 2, it was said that 'a statute ought, upon the whole, to be so construed that, if it can be prevented, no clause, sentence, or word shall be superfluous, void, or insignificant.'") (quoting *Washington Mkt. Co. v. Hoffman*, 101 U.S. 112, 115-16 (1879)). An electronic database can contain hundreds or thousands of editions of hundreds or thousands of periodicals, including newspapers, magazines, anthologies, and encyclopedias. To view the contents of databases as revisions would eliminate any need for a privilege for "a later collective work in the same series."

Second, the privilege set forth in Section 201(c) is an exception to the general rule that copyright vests initially in the author of the individual contribution. Reading "revision of that collective work" as broadly as appellees suggest would cause the exception to swallow the rule. See *Commissioner v. Clark*, 489 U.S. 726, 739 (1989) (when a statute sets forth exceptions to a general rule, we generally construe the exceptions "narrowly in order to preserve the primary operation of the [provision]"). Under Publishers' theory of Section 201(c), the question of whether an electronic database infringes upon an individual author's article would essentially turn upon whether the rest of the articles from the particular edition in which the individual article was published could also be retrieved individually. However, the Section 201(c) privilege would not permit a Publisher to sell a hard copy of an Author's article directly to the public even if the Publisher also offered for individual sale all of the other articles from the particular edition. We see nothing in the revision privilege that would allow the Publishers to achieve the same goal indirectly through NEXIS.

Appellees' reading is also in considerable tension with the overall statutory framework. Section 201(c) was a key innovation of the Copyright Act of 1976. Because the Copyright Act of 1909 contemplated a single copyright, authors risked losing their rights by allowing an article to be used in a collective work. See 3 Melville Nimmer & David Nimmer, *Nimmer on Copyright* § 10.01[A] (1996 ed.) (discussing doctrine of indivisibility). To address this concern, the

1976 Act expressly permitted the transfer of less than the entire copyright, see 17 U.S.C. § 201(d), in effect replacing the notion of a single "copyright" with that of "exclusive rights" under a copyright. *Id.* §§ 106, 103(b). Section 201(d), which governs the transfer of copyright ownership, provides:

(1) The ownership of a copyright may be transferred in whole or in part . . . .

(2) Any of the exclusive rights comprised in a copyright, including any subdivision of any of the rights specified by section 106, may be transferred as provided by clause (1) and owned separately. The owner of any particular *exclusive right* is entitled, to the extent of that right, to all of the protection and remedies accorded to the copyright owner by this title.

*Id.* § 201(d) (emphasis added); see also *id.* § 204 (executions of transfers of copyright ownership). Similarly, Section 501, which sets forth the remedies for infringement of copyright, provides in pertinent part that "[a]nyone who violates any of the *exclusive rights* of the copyright owner . . . is an infringer." *Id.* § 501 (a) (emphasis added). <sup>2</sup> Were the privilege as broad and as transferrable as appellees contend, it is not clear that the rights retained by the Authors could be considered "exclusive" in any meaningful sense.

In light of this discussion, there is no feature peculiar to the databases at issue in this appeal that would cause us to view them as "revisions." NEXIS is a database comprising thousands or millions of individually retrievable articles taken from hundreds or thousands of periodicals. It can hardly be deemed a "revision" of each edition of every periodical that it contains.

Moreover, NEXIS does almost nothing to preserve the copyrightable aspects of the Publishers' collective works, "as distinguished from the preexisting material employed in the work." 17 U.S.C. § 103(b). The aspects of a collective work that make it "an original work of authorship" are the selection, coordination, and arrangement of the preexisting materials. *Id.* § 101; see also *Feist Publications, Inc. v. Rural Tel. Serv. Co.*, 499 U.S. 340, 349 (1991) (discussing factual compilations). <sup>3</sup> However, as described above, in placing an edition of a periodical such as the August 16, 1999 New York Times, in NEXIS, some of the paper's content, and perhaps most of its arrangement are lost. Even if a NEXIS user so desired, he or she would have a hard time recapturing much of "the material contributed by the author of such [collective] work." 17 U.S.C. § 103(b). In this context, it is significant that neither the Publishers nor NEXIS evince any intent to compel, or even to permit, an end user to retrieve an individual work only in connection with other works from the

edition in which it ran. Quite the contrary, The New York Times actually *forbids* NEXIS from producing "facsimile reproductions" of particular editions. See *Tasini I*, 972 F. Supp. at 826 n.17. What the end user can easily access, of course, are the preexisting materials that belong to the individual author under Sections 201(c) and 103(b).

The UMI databases involved in this appeal present a slightly more difficult issue than does NEXIS. One, NYTO, is distinguishable from NEXIS in that it contains articles from only one publisher; the other, GPO, is distinguishable because it includes some image-based, rather than text-based, files. Nevertheless, we also conclude that the Publishers' licensing of Authors' works to UMI for inclusion in these databases is not within the Section 201(c) revision privilege.

The NYTO database operates very much like NEXIS; it contains many articles that may be retrieved according to criteria unrelated to the particular edition in which the articles first appeared. Moreover, because the files it contains are provided by Mead pursuant to an agreement between UMI, Mead, and The New York Times, no more of the Times' original selection and arrangement is evident or retained in NYTO than is retained in NEXIS. In every respect save its being limited to The New York Times, then, NYTO is essentially the same as NEXIS. That limitation, however, is not material for present purposes. The relevant inquiry under Section 201(c), is, as discussed above, whether the republication or redistribution of the copyrighted piece is as part of a collective work that constitutes a "revision" of the previous collective work, or even a "later collective work in the same series." If the republication is a "new anthology" or a different collective work, it is not within the privilege. H.R. Rep. No. 94-1476, at 122-23 (1976), *reprinted in* 1976 U.S.C.A.A.N. 5659, 5738. Because NYTO is for present purposes at best a new anthology of innumerable editions of the Times, and at worst a new anthology of innumerable articles from these editions, it cannot be said to be a "revision" of any (or all) particular editions or to be a "later collective work in the same series."

For the same reason, GPO is not protected by the Publishers' Section 201(c) privilege. Although this database contains scanned photo-images of editions of The New York Times Sunday book review and magazine, it also contains articles from numerous other periodicals. In this respect, then, it is also substantially similar to NEXIS, and it, too, is at best a new anthology.

We emphasize that the only issue we address is whether, in the absence of a transfer of copyright or any rights thereunder, collective-work authors may relicense individual works in which they own no rights. Because there has by

definition been no express transfer of rights in such cases, our decision turns entirely on the default allocation of rights provided by the Act. Publishers and authors are free to contract around the statutory framework. Indeed, both the Publishers and Mead were aware of the fact that the Section 201(c) privilege might not protect their licensing agreements, and at least one of the Publishers has already instituted a policy of expressly contracting for electronic re-licensing rights. *See* note 1, *supra*.

b) *Whitford*

As noted, Whitford entered into an express licensing agreement with Time. That agreement granted, in pertinent part, to Time:

- (a) the exclusive right first to publish the Story in the Magazine:
- (b) the non-exclusive right to license the republication of the Story . . . provided that the Magazine shall pay to [him] fifty percent [] of all net proceeds it receives for such republication: and
- (c) the right to republish the Story or any portions thereof in or in connection with the Magazine or in other publications published by [Time], provided that [he] shall be paid the then prevailing rates of the publication in which the Story is republished.

Time subsequently licensed Whitford's article to Mead without notifying, obtaining authorization from, or compensating, him.

In response to Whitford's infringement action, Time contended that its "first publication" rights under clause (a) permitted it to license Whitford's article to Mead. The district court rejected this argument. *See Tasini I*, 972 F. Supp. at 811-12. Nevertheless, it granted summary judgment in favor of Time on this claim. Upon appellants' motion for reconsideration, the district court explained that because Whitford's contract appeared to grant republication rights broad enough to cover Time's agreement with Mead, his remedy under the circumstances was a breach of contract claim against Time. *See Tasini II*, 981 F. Supp. at 845. Such a contract claim would be based on the fact that Time had licensed Whitford's piece to Mead without compensating Whitford pursuant to their agreement. Whitford's failure to raise such a claim, in the court's view, undermined his infringement claim. *See id.* The court also explained that the privilege afforded collective-works authors under Section 201(c) operates as a "presumed" baseline." *See id.*, 981 F. Supp. at 846. Because Whitford's agreement failed to limit Time's rights to less than those otherwise afforded under Section 201(c), Time was presumed to have rights to Whitford's piece to the full extent of Section 201(c). *See id.* Having already

determined that the Section 201(c) privilege protected the defendant newspapers' license agreements with Mead, the district court held that Time, too, was protected.

However, the fact that a party has licensed certain rights to its copyright to another party does not prohibit the licensor from bringing an infringement action where it believes the license is exceeded or the agreement breached. *See Schoenberg v. Shapolsky Publishers, Inc.*, 971 F.2d 926, 932 (2d Cir. 1992) ("If a breach of a condition is alleged, then the district court has subject matter jurisdiction."). Rather, where an author brings an infringement action against a purported licensee, the license may be raised as a defense. *See Bourne v. Walt Disney Co.*, 68 F.3d 621, 631 (2d Cir. 1995). Where the dispute turns on whether there is a license at all, the burden is on the alleged infringer to prove the existence of the license. *See id.* Where the dispute is only over the scope of the license, by contrast, "the copyright owner bears the burden of proving that the defendant's copying was unauthorized." *Id.* In either case, however, an infringement claim may be brought to remedy unauthorized uses of copyrighted material. *See id.* Whitford did not, therefore, have the burden of pleading a contract claim against Time. 4

With respect to express transfers of rights under Section 201(c), that provision provides in pertinent part that "[i]n the absence of an express transfer of the copyright or of any rights under it, the owner of copyright in the collective work is presumed to have acquired only the privilege of reproducing and distributing the contribution [in limited circumstances]." 17 U.S.C. § 201(c). Whitford contends that this provision, by its plain terms, does not apply where there is "an express transfer of copyright or of any rights under it," and that his license agreement with Time constitutes just such an express transfer. Therefore, he contends, the court erred in applying the privilege at all.

As noted, the district court rejected this argument, observing that "Section 201 (c) does not provide that the specified privileges apply 'only' in the absence of an express transfer of rights," but rather that "in the absence of an express transfer of rights, publishers are presumed to acquire 'only' the delineated privileges." *Tasini II*, 981 F. Supp. at 845. The district court went on to hold that "the specified privileges represent a floor -- *i.e.*, a minimum level of protection which, if unenhanced by express agreement, publishers are generally presumed to possess. In other words, . . . in the absence of an express transfer of 'more,' a publisher is presumed to acquire, at a minimum [], the delineated privileges." *Id.* at 845-46.

Under the district court's reasoning, therefore, unless Time's agreement with Whitford explicitly narrowed its privilege under Section 201(c), the privilege

accorded by that Section would continue to exist concurrently with any other rights obtained under the agreement. Given the district court's previously expressed broad view of the Section 201(c) privilege, Time prevailed, not because the agreement authorized the licensing of Whitford's article to Mead but because the agreement did not forbid it.

However, as discussed above, the privilege provided in Section 201(c) does not permit a collective-work author in Time's shoes to license to Mead an individually-copyrighted work such as Whitford's article. Time's rights to license the article to Mead must, therefore, be derived from its agreement with Whitford. However, we agree with the district court that paragraph (a) of that agreement does not authorize such a license, and the record is clear that Time cannot invoke the conditional license provided in paragraphs (b) and (c). See Note 4, *supra*. There being no other basis for Time to license Whitford's article to Mead, summary judgment should have been granted in favor of Whitford on his claim.

#### CONCLUSION

We therefore reverse and remand with instructions to enter judgment for appellants.

---- Begin EndNotes ----

1. Newsday contended in the district court that a legend on the checks it used to pay for freelance pieces made those checks, once endorsed, express transfers of copyright pursuant to Section 204(a) of the Act. The district court rejected this argument, relying on reasoning with which we substantially agree. See *Tasini v. New York Times Co.*, 972 F. Supp. 804, 810-811 (S.D.N.Y. 1997). In any event, Newsday does not cross-appeal.

We note also that The New York Times has since updated its policy to require freelance writers to execute an express transfer of their copyrights. See *id.* at 807 n.2.

2. It is worth noting that Section 201(c) grants collective works authors "only" a "privilege," rather than a "right." Each of these terms connotes specialized legal meanings, and they were juxtaposed by Congress in the same sentence of Section 201(c).

3. In arguing that NEXIS is a "revision," an analogy might perhaps be made to cases involving factual compilations and applying a "substantial similarity" test. *Tasini I*, 972 F. Supp. at 825 n.15 (analogizing to factual compilation cases). Although the "selection and arrangement" analysis of factual compilation

cases is clearly relevant to this case, "substantial similarity" analysis is inapposite. In factual compilation cases, an infringement action is brought by one compilation author against another compilation author. Because neither author -- indeed, no one -- owns a copyright in the underlying factual material comprising each collective work, the inquiry in such cases is whether the latter compilation is "substantially similar" in selection or arrangement to the former; no claim exists as to unauthorized use of the facts. *See id.* at 821-22. Here, by contrast, the compilations are "collective works" that contain individually copyrighted material, and the infringement action is brought by the author of the individual work. Because Sections 103(b) and 201(c) make clear that the author of the individual contribution retains all rights in his or her piece, the author clearly may bring an infringement action for unauthorized republication of the work. This is so, moreover, even if the author of the collective work in which the individual contribution was published might also have an infringement action against the person who republished the contribution.

4. Time did not raise paragraphs (b) or (c) of its license agreement with Whitford as a defense to his infringement claim. Instead, Time contended that the "first publication" rights it received in paragraph (a) covered its subsequent license to Mead and that it did not therefore have to further compensate Whitford for permitting Mead to place his piece in NEXIS. Time took this position, of course, because it did not compensate Whitford pursuant to the agreement and could not, therefore, convincingly invoke the conditional license granted in paragraphs (b) and (c) thereof.
