Summary

Cybersecurity vulnerabilities challenge governments, businesses, and individuals worldwide. Attacks have been initiated by individuals, as well as countries. Targets have included government networks, military defenses, companies, or political organizations, depending upon whether the attacker was seeking military intelligence, conducting diplomatic or industrial espionage, or intimidating political activists. In addition, national borders mean little or nothing to cyberattackers, and attributing an attack to a specific location can be difficult, which also makes a response problematic.

Congress has been actively involved in cybersecurity issues, holding hearings every year since 2001. There is no shortage of data on this topic: government agencies, academic institutions, think tanks, security consultants, and trade associations have issued hundreds of reports, studies, analyses, and statistics.

This report provides links to selected authoritative resources related to cybersecurity issues. This report includes information on

- “Legislation”
- “Executive Orders and Presidential Directives”
- “Data and Statistics”
- “Cybersecurity Glossaries”
- “Reports by Topic”
 - Government Accountability Office (GAO) reports
 - White House/Office of Management and Budget reports
 - Military/DOD
 - Cloud Computing
 - Critical Infrastructure
 - National Strategy for Trusted Identities in Cyberspace (NSTIC)
 - Cybercrime/Cyberwar
 - International
 - Education/Training/Workforce
 - Research and Development (R&D)
- “Related Resources: Other Websites”

The report will be updated as needed.

Introduction

Cybersecurity is a sprawling topic that includes national, international, government, and private industry dimensions. In the 113th Congress, one bill has been introduced in the Senate and two in the House. More than 40 bills and resolutions with provisions related to cybersecurity were introduced in the first session of the 112th Congress, including several proposing revisions to current laws. In the 111th Congress, the total was more than 60. Several of those bills received committee or floor action, but none have become law. In fact, no comprehensive cybersecurity legislation has been enacted since 2002.

This report provides links to cybersecurity hearings and legislation under consideration in the 113th and 112th Congresses, as well as executive orders and presidential directives, data and statistics, glossaries, and authoritative reports.

For CRS analysis, please see the collection of CRS reports found on the Issues in Focus: Cybersecurity site.

Legislation

No major legislative provisions relating to cybersecurity have been enacted since 2002, despite many recommendations made over the past decade. The Obama Administration sent Congress a package of legislative proposals in May 2011¹ to give the federal government new authority to ensure that corporations that own the assets most critical to the nation's security and economic prosperity are adequately addressing the risks posed by cybersecurity threats.

Cybersecurity legislation advanced in both chambers in the 112th Congress. The House passed a series of bills that address a variety of issues—from toughening law enforcement of cybercrimes to giving the Department of Homeland Security oversight of federal information technology and critical infrastructure security to lessening liability for private companies that adopt cybersecurity best practices. The Senate pursued a comprehensive cybersecurity bill with several committees working to create a single vehicle for passage, backed by the White House — to no avail. The Senate bill also got mired in a procedural dispute over amendments.

Table 1 and **Table 2** provide lists of Senate and House legislation under consideration in the 113th Congress, in order by date introduced. When viewed in HTML, the bill numbers are active links to the Bill Summary and Status page in the Legislative Information Service (LIS).

Table 15. Congressional Committee Investigative Reports

| Title | Committee | Date | 60 | Notes |
|--|---|-----------------|-----|--|
| Investigative Report on the U.S. National Security Issues Posed by Chinese Telecommunications Companies Huawei and ZTE | House Permanent Select Committee on Intelligence | October 8, 2012 | 60 | The committee initiated this investigation in November 2011 to inquire into the counterintelligence and security threat posed by Chinese telecommunications companies doing business in the United States. |
| Federal Support for and Involvement in State and Local Fusion Centers | U. S. Senate Permanent Subcommittee on Investigations | October 3, 2012 | 141 | A two-year bipartisan investigation found that U.S. Department of Homeland Security efforts to engage state and local intelligence “fusion centers” has not yielded significant useful information to support federal counterterrorism intelligence efforts. In Section VI, “Fusion Centers Have Been Unable to Meaningfully Contribute to Federal Counterterrorism Efforts,” Part G, “Fusion Centers May Have Hindered, Not Aided, Federal Counterterrorism Efforts,” the report discusses the Russian “Cyberattack” in Illinois. |

Executive Orders and Presidential Directives

Executive orders are official documents through which the President of the United States manages the operations of the federal government. Presidential directives pertain to all aspects of U.S. national security policy and are signed or authorized by the President.

The following reports provide additional information on executive orders and presidential directives:

- CRS Report RS20846, *Executive Orders: Issuance, Modification, and Revocation*, by Todd Garvey and Vivian S. Chu, and
- CRS Report 98-611, *Presidential Directives: Background and Overview*, by L. Elaine Halchin.

Table 16 provides a list of executive orders and presidential directives pertaining to information and computer security.

Table 16. Executive Orders and Presidential Directives

(by date of issuance)

| Title | Date | Source | Notes |
|---|-------------------|-------------|--|
| E.O. 13636, Improving Critical Infrastructure Cybersecurity http://www.gpo.gov/fdsys/pkg/FR-2013-02-19/pdf/2013-03915.pdf | February 12, 2013 | White House | The order directs agencies to take steps to expand cyberthreat information sharing with companies. It also tells them to come up with incentives for owners of the most vital and vulnerable digital infrastructure — like those tied to the electricity grid or banking system — to voluntarily comply with a set of security standards. And it orders them to review their regulatory authority on cybersecurity and propose new regulations in some cases. |
| Presidential Policy Directive (PPD) 21 - Critical Infrastructure Security and Resilience http://www.whitehouse.gov/the-press-office/2013/02/12/presidential-policy-directive-critical-infrastructure-security-and-resil | February 12, 2013 | White House | This directive establishes national policy on critical infrastructure security and resilience. This endeavor is a shared responsibility among the federal, state, local, tribal, and territorial (SLTT) entities, and public and private owners and operators of critical infrastructure (herein referred to as "critical infrastructure owners and operators"). This directive also refines and clarifies the critical infrastructure-related functions, roles, and responsibilities across the federal government, as well as enhances overall coordination and collaboration. The federal government also has a responsibility to strengthen the security and resilience of its own critical infrastructure, for the continuity of national essential functions, and to organize itself to partner effectively with and add value to the security and resilience efforts of critical infrastructure owners and operators. |
| E.O. 13587, Structural Reforms to Improve the Security of Classified Networks and the Responsible http://www.gpo.gov/fdsys/pkg/FR-2011-10-13/pdf/2011-26729.pdf | October 7, 2011 | White House | This order directs structural reforms to ensure responsible sharing and safeguarding of classified information on computer networks that shall be consistent with appropriate protections for privacy and civil liberties. Agencies bear the primary responsibility for meeting these twin goals. These policies and minimum standards will address all agencies that operate or access classified computer networks, all users of classified computer networks (including contractors and others who operate or access classified computer networks controlled by the federal government), and all classified information on those networks. |

| <p>E.O. 13407, Public Alert and Warning System</p> <p>http://www.gpo.gov/fdsys/pkg/WCPD-2006-07-03/pdf/WCPD-2006-07-03-Pg1226.pdf</p> | June 26, 2006 | White House | <p>Assigns the Secretary of Homeland Security the responsibility to establish or adopt, as appropriate, common alerting and warning protocols, standards, terminology, and operating procedures for the public alert and warning system to enable interoperability and the secure delivery of coordinated messages to the American people through as many communication pathways as practicable, taking account of Federal Communications Commission rules as provided by law.</p> |
| <p>HSPD-7, Homeland Security Presidential Directive No. 7: Critical Infrastructure Identification, Prioritization, and Protection</p> <p>http://www.dhs.gov/xabout/laws/gc_1214597989952.shtm</p> | December 17, 2003 | White House | <p>Assigns the Secretary of Homeland Security the responsibility of coordinating the nation's overall efforts in critical infrastructure protection across all sectors. HSPD-7 also designates the Department of Homeland Security (DHS) as lead agency for the nation's information and telecommunications sectors.</p> |
| <p>E.O. 13286, Amendment of Executive Orders, and Other Actions, in Connection With the Transfer of Certain Functions to the Secretary of Homeland Security</p> <p>http://edocket.access.gpo.gov/2003/pdf/03-5343.pdf</p> | February 28, 2003 | White House | <p>Designates the Secretary of Homeland Security the Executive Agent of the National Communication System Committee of Principals, which are the agencies, designated by the President, that own or lease telecommunication assets identified as part of the National Communication System, or which bear policy, regulatory, or enforcement responsibilities of importance to national security and emergency preparedness telecommunications.</p> |
| <p>Presidential Decision Directive/NSC-63</p> <p>http://www.fas.org/irp/offdocs/pdd/pdd-63.htm</p> | May 22, 1998 | White House | <p>Sets as a national goal the ability to protect the nation's critical infrastructure from intentional attacks (both physical and cyber) by the year 2003. According to the PDD, any interruptions in the ability of these infrastructures to provide their goods and services must be "brief, infrequent, manageable, geographically isolated, and minimally detrimental to the welfare of the United States."</p> |

| <p>NSD-42, National Security Directive 42 - National Policy for the Security of National Security Telecommunications and Information Systems</p> <p>http://bushlibrary.tamu.edu/research/pdfs/nsd/nsd42.pdf</p> | July 5, 1990 | White House | <p>Establishes the National Security Telecommunications and Information Systems Security Committee, now called the Committee on National Security Systems (CNSS). CNSS is an interagency committee, chaired by the Department of Defense. Among other assignments, NSD-42 directs the CNSS to provide system security guidance for national security systems to executive departments and agencies; and submit annually to the Executive Agent an evaluation of the security status of national security systems. NSD-42 also directs the Committee to interact, as necessary, with the National Communications System Committee of Principals.</p> |
| <p>E.O. 12472, Assignment of National Security and Emergency Preparedness Telecommunications Functions (amended by E.O. 13286 of February 28, 2003, and changes made by E.O. 13407, June 26, 2006)</p> <p>http://www.ncs.gov/library/policy_docs/eo_12472.html</p> | April 3, 1984 | National Communications System (NCS) | <p>Established a national communication system as those telecommunication assets owned or leased by the federal government that can meet the national security and emergency preparedness needs of the federal government, together with an administrative structure that could ensure that a national telecommunications infrastructure is developed that is responsive to national security and emergency preparedness needs.</p> |

Note: Descriptions compiled by CRS from government websites.

Data and Statistics

This section identifies data and statistics from government, industry, and IT security firms regarding the current state of cybersecurity threats in the United States and internationally. These include incident estimates, costs, and annual reports on data security breaches, identity theft, cyber crime, malware, and network security.

Table 17. Data and Statistics: Cyber Incidents, Data Breaches, Cyber Crime

| Title | Date | Source | Pages | Notes |
|---|------------------|---------------------------------|-------|--|
| Overview of Current Cyber Attacks (logged by 97 Sensors) http://www.sicherheitstacho.eu/ | March 6, 2013 | Deutsche Telekom | N/A | Provides a real-time visualization and map of cyberattacks detected by a network of 97 sensors placed around the world. |
| Real-Time Web Monitor http://www.akamai.com/html/technology/dataviz1.html | March 5, 2013 | Akamai | N/A | Akamai monitors global Internet conditions around the clock. The map identifies the global regions with the greatest attack traffic. |
| Linking Cybersecurity Policy and Performance http://blogs.technet.com/b/trustworthycomputing/archive/2013/02/06/linking-cybersecurity-policy-and-performance-microsoft-releases-special-edition-security-intelligence-report.aspx | February 6, 2013 | Microsoft Trustworthy Computing | 27 | Introduces a new methodology for examining how socio-economic factors in a country or region impact cybersecurity performance, examining measures such as use of modern technology, mature processes, user education, law enforcement and public policies related to cyberspace. This methodology can build a model that will help predict the expected cybersecurity performance of a given country or region. |
| SCADA and Process Control Security Survey https://www.sans.org/reading_room/analysts_program/sans_survey_scada_2013.pdf | February 1, 2013 | SANS Institute | 19 | SANS Institute surveyed professionals who work with SCADA and process control systems. Seventy percent of the nearly 700 respondents said they consider their SCADA systems to be at high or severe risk. One third of them suspect that they have been already been infiltrated |
| Blurring the Lines: 2013 TMT Global Security Study http://www.deloitte.com/assets/Dcom-UnitedKingdom/Local%20Assets/Documents/Services/Audit/uk-ers-blurring-line-2013-tmt-studyv2.pdf.pdf | January 8, 2013 | Deloitte | 24 | Report states that 88% of companies do not believe that they are vulnerable to an external cyber threat, while more than half of those surveyed have experienced a security incident in the last year... Companies rated mistakes by their employees as a top threat, with 70% highlighting a lack of security awareness as a vulnerability. Despite this, less than half of companies (48%) offer even general security-related training, with 49% saying that a lack of budget was making it hard to improve security. |

|--|-------------------|---|-------|---|
| <p>Improving the Evidence Base for Information Security and Privacy Policies: Understanding the Opportunities and Challenges related to Measuring Information Security, Privacy and the Protection of Children Online</p> <p>http://www.oecd-ilibrary.org/science-and-technology/improving-the-evidence-base-for-information-security-and-privacy-policies_5k4dq3rkb19n-en</p> | December 20, 2012 | Organisation for Economic Cooperation and Development | 94 | This report provides an overview of existing data and statistics in fields of information security, privacy, and the protection of children online. It highlights the potential for the development of better indicators in these respective fields showing in particular that there is an underexploited wealth of empirical data that, if mined and made comparable, will enrich the current evidence base for policy making. |
| <p>Emerging Cyber Threats Report 2013</p> <p>http://www.gtsecuritysummit.com/pdf/2013ThreatsReport.pdf</p> | November 14, 2012 | Georgia Institute of Technology | 9 | The year ahead will feature new and increasingly sophisticated means to capture and exploit user data, escalating battles over the control of online information and continuous threats to the U.S. supply chain from global sources. (From the annual Georgia Tech Cyber Security Summit 2012). |
| <p>State Governments at Risk: a Call for Collaboration and Compliance</p> <p>http://www.nascio.org/publications/documents/Deloitte-NASCIOCybersecurityStudy2012.pdf</p> | October 23, 2012 | National Association of State Chief Information Officers and Deloitte | 40 | Assesses the state of cybersecurity across the nation found that only 24 percent of chief information security officers (CISOs) are very confident in their states' ability to guard data against external threats. |
| <p>Cybercrime Costs Rise Nearly 40 Percent, Attack Frequency Doubles</p> <p>http://www.hp.com/hpinfo/newsroom/press/2012/121008a.html</p> | October 8, 2012 | HP and the Ponemon Institute | N/A | The 2012 Cost of Cyber Crime Study found that the average annualized cost of cybercrime incurred by a benchmark sample of U.S. organizations was \$8.9 million. This represents a 6 percent increase over the average cost reported in 2011, and a 38 percent increase over 2010. The 2012 study also revealed a 42 percent increase in the number of cyberattacks, with organizations experiencing an average of 102 successful attacks per week, compared with 72 attacks per week in 2011 and 50 attacks per week in 2010. |
| <p>2012 NCSA/Symantec National Small Business Study</p> <p>http://www.staysafeonline.org/download/datasets/4389/2012_ncsa_symantec_small_business_study.pdf.</p> | October 2012 | National Cyber Security Alliance | 18 | The NCSA surveyed more than 1,000 small and midsize businesses. The survey found that 83% of respondents said they don't have a written plan for protecting their companies against cyberattacks, while 76% think they are safe from hackers, viruses, malware, and cybersecurity breaches. |

|---|---|--|-------|---|
| <p>McAfee Explains The Dubious Math Behind Its 'Unscientific' \$1 Trillion Data Loss Claim</p> <p>http://www.forbes.com/sites/andygreenberg/2012/08/03/mcafee-explains-the-dubious-math-behind-its-unscientific-1-trillion-data-loss-claim/</p> | August 3, 2012 | Forbes.com | N/A | <p>No, the statistic was not simply made up. Yes, it's just a "ballpark figure" and an "unscientific" one, the company admits. But despite Pro Publica's criticisms and its own rather fuzzy math, the company stands by its trillion-dollar conclusion as a (very) rough estimate.</p> |
| <p>Does Cybercrime Really Cost \$1 Trillion?</p> <p>http://www.propublica.org/article/does-cybercrime-really-cost-1-trillion</p> | August 1, 2012 | ProPublica | N/A | <p>In a news release from computer security firm McAfee announcing its 2009 report, "Unsecured Economies: Protecting Vital Information," the company estimated a trillion dollar global cost for cybercrime. That number does not appear in the report itself. McAfee's trillion-dollar estimate is questioned by the three independent researchers from Purdue University whom McAfee credits with analyzing the raw data from which the estimate was derived. An examination of their origins by ProPublica has found new grounds to question the data and methods used to generate these numbers, which McAfee and Symantec say they stand behind.</p> |
| <p>ICS-CERT Incident Response Summary Report</p> <p>http://www.us-cert.gov/control_systems/pdf/ICS-CERT_Incident_Response_Summary_Report_09_11.pdf</p> | June 28, 2012 | <p>U.S. Industrial Control System Cyber Emergency Response Team (ICS-CERT)</p> | 17 | <p>The number of reported cyberattacks on U.S. critical infrastructure increased sharply—from 9 incidents in 2009 to 198 in 2011; water sector-specific incidents, when added to the incidents that affected several sectors, accounted for more than half of the incidents; in more than half of the most serious cases, implementing best practices, such as login limitation or properly configured firewall, would have deterred the attack, reduced the time it would have taken to detect an attack, and minimized its impact.</p> |
| <p>Measuring the Cost of Cybercrime</p> <p>http://weis2012.econinfosec.org/papers/Anderson_WEIS2012.pdf</p> | <p>11th Annual Workshop on the Economics of Information Security</p> | June 25, 2012 | N/A | <p>"For each of the main categories of cybercrime we set out what is and is not known of the direct costs, indirect costs and defence costs - both to the UK and to the world as a whole."</p> |
| <p>Worldwide Threat Assessment: Infection Rates and Threat Trends by Location</p> <p>http://www.microsoft.com/security/sir/threat/default.aspx#!introduction</p> | ongoing | <p>Microsoft Security Intelligence Report (SIR)</p> | N/A | <p>Data on infection rates, malicious websites, and threat trends by regional location, worldwide.</p> |

|---|---|--|-------|---|
| Cloud Computing Reference Architecture http://collaborate.nist.gov/twiki-cloud-computing/pub/CloudComputing/ReferenceArchitectureTaxonomy/NIST_SP_500-292_-_090611.pdf | National Institute of Standards and Technology (NIST) | September 2011 | 35 | Provides guidance to specific communities of practitioners and researchers. |
| Glossary of Key Information Security Terms http://csrc.nist.gov/publications/nistir/ir7298-rev1/nistir-7298-revision1.pdf | NIST | February 2011 | 211 | The glossary provides a central resource of terms and definitions most commonly used in NIST information security publications and in Committee for National Security Systems (CNSS) information assurance publications. |
| CIS Consensus Information Security Metrics http://benchmarks.cisecurity.org/en-us/?route=downloads.show.single.metrics.110 | Center for Internet Security | November 2010 | 175 | Provides definitions for security professionals to measure some of the most important aspects of the information security status. The goal is to give an organization the ability to repeatedly evaluate security in a standardized way, allowing it to identify trends, understand the impact of activities and make responses to improve the security status. (Free registration required.) |
| Joint Terminology for Cyberspace Operations http://www.projectcyw-d.org/resources/items/show/51 | Chairman of the Joint Chiefs of Staff | November 1, 2010 | 16 | This lexicon is the starting point for normalizing terms in all cyber-related documents, instructions, CONOPS, and publications as they come up for review. |
| Department of Defense Dictionary of Military and Associated Terms http://www.dtic.mil/doctrine/new_pubs/jpl_02.pdf | Chairman of the Joint Chiefs of Staff | November 8, 2010 (as amended through January 15, 2012) | 547 | Provides joint policy and guidance for Information Assurance (IA) and Computer Network Operations (CNO) activities. |
| DHS Risk Lexicon http://www.dhs.gov/xlibrary/assets/dhs-risk-lexicon-2010.pdf | Department of Homeland Security (DHS) Risk Steering Committee | September 2010 | 72 | The lexicon promulgates a common language, facilitates the clear exchange of structured and unstructured data, and provides consistency and clear understanding with regard to the usage of terms by the risk community across the DHS. |

Note: Highlights compiled by CRS from the reports.

Reports by Topic

This section gives references to analytical reports on cybersecurity from CRS, other governmental agencies, and trade organizations. The reports are grouped under the following cybersecurity topics: policy framework overview, critical infrastructure, and cybercrime and national security.

For each topic, CRS reports are listed first and then followed by tables with reports from other organizations. The overview reports provide an analysis of a broad range of cybersecurity issues (**Table 19** to **Table 24**). The critical infrastructure reports (**Table 25**) analyze cybersecurity issues related to telecom infrastructure, the electricity grid, and industrial control systems. The cybercrime and national security reports (**Table 26**) analyze a wide range of cybersecurity issues, including identify theft and government policies for dealing with cyberwar scenarios. In addition, tables with selected reports on international efforts to address cybersecurity problems, training for cybersecurity professionals, and research and development efforts in other areas are also provided (**Table 27** to **Table 29**).

CRS Reports Overview: Cybersecurity Policy Framework

- CRS Report R42114, *Federal Laws Relating to Cybersecurity: Overview and Discussion of Proposed Revisions*, by Eric A. Fischer
- CRS Report R41941, *The Obama Administration's Cybersecurity Proposal: Criminal Provisions*, by Gina Stevens
- CRS Report R40150, *A Federal Chief Technology Officer in the Obama Administration: Options and Issues for Consideration*, by John F. Sargent Jr.
- CRS Report R42409, *Cybersecurity: Selected Legal Issues*, by Edward C. Liu et al.

| <p>Developing a Framework To Improve Critical Infrastructure Cybersecurity (<i>Federal Register</i> Notice; Request for Information) http://www.gpo.gov/fdsys/pkg/FR-2013-02-26/pdf/2013-04413.pdf</p> | <p>National Institute of Standards and Technology (NIST)</p> | <p>February 12, 2013</p> | <p>5</p> | <p>NIST announced the first step in the development of a Cybersecurity Framework, which will be a set of voluntary standards and best practices to guide industry in reducing cyber risks to the networks and computers that are vital to the nation’s economy, security and daily life.</p> |
| <p>The National Cyber Security Framework Manual http://www.ccdcoe.org/publications/books/NationalCyberSecurityFrameworkManual.pdf</p> | <p>NATO Cooperative Cyber Defense Center of Excellence</p> | <p>December 11, 2012</p> | <p>253</p> | <p>Provides detailed background information and in-depth theoretical frameworks to help the reader understand the various facets of National Cyber Security, according to different levels of public policy formulation. The four levels of government—political, strategic, operational and tactical/technical—each have their own perspectives on National Cyber Security, and each is addressed in individual sections within the Manual.</p> |
| <p>Cyber Security Task Force: Public-Private Information Sharing http://bipartisanpolicy.org/sites/default/files/Public-Private%20Information%20Sharing.pdf</p> | <p>Bipartisan Policy Center</p> | <p>July 2012</p> | <p>24</p> | <p>Outlines a series of proposals that would enhance information sharing. The recommendations have two major components: (1) mitigation of perceived legal impediments to information sharing, and (2) incentivizing private sector information sharing by alleviating statutory and regulatory obstacles.</p> |
| <p>Cyber-security: The Vexed Question of Global Rules: An Independent Report on Cyber-Preparedness Around the World http://www.dhs.gov/xlibrary/assets/dhs-risk-lexicon-2010.pdf</p> | <p>McAfee and the Security Defense Agenda</p> | <p>February 2012</p> | <p>108</p> | <p>The report examines the current state of cyber-preparedness around the world, and is based on survey results from 80 policy-makers and cybersecurity experts in the government, business, and academic sectors from 27 countries. The countries were ranked on their state of cyber-preparedness.</p> |

|---|---|--------------------|-------|--|
| <p>Mission Critical: A Public-Private Strategy for Effective Cybersecurity http://businessroundtable.org/uploads/studies-reports/downloads/2011_10_Mission_Critical_A_Public-Private_Strategy_for_Effective_Cybersecurity_4_20_12.pdf</p> | Business Roundtable | October 11, 2011 | 28 | According to the report, “[p]ublic policy solutions must recognize the absolute importance of leveraging policy foundations that support effective global risk management, in contrast to “check-the-box” compliance approaches that can undermine security and cooperation. The document concludes with specific policy proposals and activity commitments. |
| <p>Twenty Critical Security Controls for Effective Cyber Defense: Consensus Audit Guidelines (CAG) http://www.sans.org/critical-security-controls/</p> | SANS | October 3, 2011 | 77 | The 20 critical security control measures are intended to focus agencies and large enterprises” limited resources by plugging the most common attack vectors. |
| <p>World Cybersecurity Technology Research Summit (Belfast 2011) http://www.csit.qub.ac.uk/InnovationatCSIT/Reports/Fileupload,295594,en.pdf</p> | Centre for Secure Information Technologies (CSIT) | September 12, 2011 | 14 | The Belfast 2011 event attracted international cyber security experts from leading research institutes, government bodies, and industry who gathered to discuss current cyber security threats, predict future threats and the necessary mitigation techniques, and to develop a collective strategy for next research. |
| <p>A Review of Frequently Used Cyber Analogies http://www.nsci-va.org/WhitePapers/2011-07-22-Cyber-Analogies-Whitepaper-K-McKee.pdf</p> | National Security Cyberspace Institute | July 22, 2011 | 7 | The current cybersecurity crisis can be described several ways with numerous metaphors. Many compare the current crisis with the lawlessness to that of the Wild West and the out-dated tactics and race to security with the Cold War. When treated as a distressed ecosystem, the work of both national and international agencies to eradicate many infectious diseases serves as a model as how poor health can be corrected with proper resources and execution. Before these issues are discussed, what cyberspace actually is must be identified. |

|---|---|----------------|-------|--|
| America's Cyber Future: Security and Prosperity in the Information Age http://www.cnas.org/node/6405 | Center for a New American Security | June 1, 2011 | 296 | To help U.S. policymakers address the growing danger of cyber insecurity, this two-volume report features chapters on cyber security strategy, policy, and technology by some of the world's leading experts on international relations, national security, and information technology. |
| Resilience of the Internet Interconnection Ecosystem http://www.enisa.europa.eu/act/res/other-areas/inter-x/report/interx-report | European Network and Information Security Agency (ENISA) | April 11, 2011 | 238 | Part I: Summary and Recommendations; Part II: State of the Art Review (a detailed description of the Internet's routing mechanisms and analysis of their robustness at the technical, economic and policy levels.); Part III: Report on the Consultation (a broad range of stakeholders were consulted. This part reports on the consultation and summarizes the results). Part IV: Bibliography and Appendices. |
| Improving our Nation's Cybersecurity through the Public-Private Partnership: A White Paper http://www.cdt.org/files/pdfs/20110308_cbyersec_paper.pdf | Business Software Alliance, Center for Democracy & Technology, U.S. Chamber of Commerce, Internet Security Alliance, Tech America | March 8, 2011 | 26 | This paper proposes expanding the existing partnership within the framework of the National Infrastructure Protection Plan. Specifically, it makes a series of recommendations that build upon the conclusions of President Obama's <i>Cyberspace Policy Review</i> . |
| Cybersecurity Two Years Later http://csis.org/files/publication/110128_Lewis_CybersecurityTwoYearsLater_Web.pdf | CSIS Commission on Cybersecurity for the 44 th Presidency, Center for Strategic and International Studies | January 2011 | 22 | From the report: "We thought then [in 2008] that securing cyberspace had become a critical challenge for national security, which our nation was not prepared to meet.... In our view, we are still not prepared." |

|---|---|--------------------|-------|---|
| <p>Toward Better Usability, Security, and Privacy of Information Technology: Report of a Workshop http://www.nap.edu/catalog.php?record_id=12998</p> | National Research Council | September 21, 2010 | 70 | <p>Discusses computer system security and privacy, their relationship to usability, and research at their intersection. This is drawn from remarks made at the National Research Council's July 2009 <i>Workshop on Usability, Security and Privacy of Computer Systems</i> as well as recent reports from the NRC's Computer Science and Telecommunications Board on security and privacy.</p> |
| <p>National Security Threats in Cyberspace http://nationalstrategy.com/Portals/0/documents/National%20Security%20Threats%20in%20Cyberspace.pdf</p> | Joint Workshop of the National Security Threats in Cyberspace and the National Strategy Forum | September 15, 2009 | 37 | <p>The two-day workshop brought together more than two dozen experts with diverse backgrounds: physicists; telecommunications executives; Silicon Valley entrepreneurs; federal law enforcement, military, homeland security, and intelligence officials; congressional staffers; and civil liberties advocates. For two days they engaged in an open-ended discussion of cyber policy as it relates to national security, under Chatham House Rules: their comments were for the public record, but they were not for attribution.</p> |

Note: Highlights compiled by CRS from the reports.

Table 20. Selected Government Reports: Government Accountability Office (GAO)

| Title | Date | Pages | Notes |
|--|-------------------|-------|---|
| <p>Cybersecurity: A Better Defined and Implemented National Strategy Is Needed to Address Persistent Challenges</p> <p>http://www.gao.gov/products/GAO-13-462T</p> | March 7, 2013 | 36 | <p>[A]lthough federal law assigns the Office of Management and Budget (OMB) responsibility for oversight of federal government information security, OMB recently transferred several of these responsibilities to DHS... [I]t remains unclear how OMB and DHS are to share oversight of individual departments and agencies. Additional legislation could clarify these responsibilities.</p> |
| <p>Cybersecurity: National Strategy, Roles, and Responsibilities Need to Be Better Defined and More Effectively Implemented</p> <p>http://www.gao.gov/products/GAO-13-187</p> | February 14, 2013 | 112 | <p>GAO recommends that the White House Cybersecurity Coordinator develop an overarching federal cybersecurity strategy that includes all key elements of the desirable characteristics of a national strategy. Such a strategy would provide a more effective framework for implementing cybersecurity activities and better ensure that such activities will lead to progress in cybersecurity.</p> |
| <p>Information Security: Federal Communications Commission Needs to Strengthen Controls over Enhanced Secured Network Project</p> <p>http://www.gao.gov/products/GAO-13-155</p> | January 25, 2013 | 35 | <p>The FCC did not effectively implement appropriate information security controls in the initial components of the Enhanced Secured Network (ESN) project... Weaknesses identified in the commission's deployment of components of the ESN project as of August 2012 resulted in unnecessary risk that sensitive information could be disclosed, modified, or obtained without authorization. GAO is making seven recommendations to the FCC to implement management controls to help ensure that ESN meets its objective of securing FCC's systems and information.</p> |
| <p>Cybersecurity: Challenges in Securing the Electricity Grid</p> <p>http://www.gao.gov/products/GAO-12-926T</p> | July 17, 2012 | 25 | <p>In a prior report, GAO has made recommendations related to electricity grid modernization efforts, including developing an approach to monitor compliance with voluntary standards. These recommendations have not yet been implemented.</p> |
| <p>Information Technology Reform: Progress Made but Future Cloud Computing Efforts Should be Better Planned</p> <p>http://www.gao.gov/products/GAO-12-756</p> | July 11, 2012 | 43 | <p>To help ensure the success of agencies' implementation of cloud-based solutions, the Secretaries of Agriculture, Health and Human Services, Homeland Security, State, and the Treasury, and the Administrators of the General Services Administration and Small Business Administration should direct their respective chief information officer (CIOs) to establish estimated costs, performance goals, and plans to retire associated legacy systems for each cloud-based service discussed in this report, as applicable.</p> |

| Title | Date | Pages | Notes |
|---|-------------------|-------|--|
| DOD Actions Needed to Strengthen Management and Oversight http://www.gao.gov/products/GAO-12-479?source=ra | July 9, 2012 | 46 | DOD's oversight of electronic warfare capabilities may be further complicated by its evolving relationship with computer network operations, which is also an information operations-related capability. Without clearly defined roles and responsibilities and updated guidance regarding oversight responsibilities, DOD does not have reasonable assurance that its management structures will provide effective department-wide leadership for electronic warfare activities and capabilities development and ensure effective and efficient use of its resources. |
| Information Security: Cyber Threats Facilitate Ability to Commit Economic Espionage http://www.gao.gov/products/GAO-12-876T | June 28, 2012 | 20 | This statement discusses (1) cyber threats facing the nation's systems, (2) reported cyber incidents and their impacts, (3) security controls and other techniques available for reducing risk, and (4) the responsibilities of key federal entities in support of protecting IP. |
| Cybersecurity: Challenges to Securing the Modernized Electricity Grid http://www.gao.gov/products/GAO-12-507T | February 28, 2012 | 19 | As GAO reported in January 2011, securing smart grid systems and networks presented a number of key challenges that required attention by government and industry. GAO made several recommendations to the Federal Energy Regulatory Commission (FERC) aimed at addressing these challenges. The commission agreed with these recommendations and described steps it is taking to implement them. |
| Critical Infrastructure Protection: Cybersecurity Guidance Is Available, but More Can Be Done to Promote Its Use http://www.gao.gov/products/GAO-12-92 | December 9, 2011 | 77 | Given the plethora of guidance available, individual entities within the sectors may be challenged in identifying the guidance that is most applicable and effective in improving their security posture. Improved knowledge of the guidance that is available could help both federal and private sector decision makers better coordinate their efforts to protect critical cyber-reliant assets. |
| Cybersecurity Human Capital: Initiatives Need Better Planning and Coordination http://www.gao.gov/products/GAO-12-8 | November 29, 2011 | 86 | All the agencies GAO reviewed faced challenges determining the size of their cybersecurity workforce because of variations in how work is defined and the lack of an occupational series specific to cybersecurity. With respect to other workforce planning practices, all agencies had defined roles and responsibilities for their cybersecurity workforce, but these roles did not always align with guidelines issued by the federal Chief Information Officers Council and National Institute of Standards and Technology (NIST). |
| Federal Chief Information Officers: Opportunities Exist to Improve Role in Information Technology Management http://www.gao.gov/products/GAO-11-634 | October 17, 2011 | 72 | GAO is recommending that OMB update its guidance to establish measures of accountability for ensuring that CIOs' responsibilities are fully implemented and require agencies to establish internal processes for documenting lessons learned. |
| Information Security: Additional Guidance Needed to Address Cloud Computing Concerns http://www.gao.gov/products/GAO-12-130T | October 5, 2011 | 17 | Twenty-two of 24 major federal agencies reported that they were either concerned or very concerned about the potential information security risks associated with cloud computing. GAO recommended that the NIST issue guidance specific to cloud computing security. |

| Title | Date | Pages | Notes |
|--|------------------|-------|---|
| Information Security: Weaknesses Continue Amid New Federal Efforts to Implement Requirements http://www.gao.gov/products/GAO-12-137 | October 3, 2011 | 49 | Weaknesses in information security policies and practices at 24 major federal agencies continue to place the confidentiality, integrity, and availability of sensitive information and information systems at risk. Consistent with this risk, reports of security incidents from federal agencies are on the rise, increasing over 650% over the past 5 years. Each of the 24 agencies reviewed had weaknesses in information security controls. |
| Federal Chief Information Officers: Opportunities Exist to Improve Role in Information Technology Management http://www.gao.gov/products/GAO-11-634 | October 17, 2011 | 72 | GAO is recommending that the Office of Management and Budget (OMB) update its guidance to establish measures of accountability for ensuring that CIOs' responsibilities are fully implemented and require agencies to establish internal processes for documenting lessons learned. |
| Defense Department Cyber Efforts: Definitions, Focal Point, and Methodology Needed for DoD to Develop Full-Spectrum Cyberspace Budget Estimates http://www.gao.gov/products/GAO-11-695R | July 29, 2011 | 33 | This letter discusses the Department of Defense's cyber and information assurance budget for fiscal year 2012 and future years defense spending. The objectives of this review were to (1) assess the extent to which DOD has prepared an overarching budget estimate for full-spectrum cyberspace operations across the department; and (2) identify the challenges DOD has faced in providing such estimates. |
| Continued Attention Needed to Protect Our Nation's Critical Infrastructure http://www.gao.gov/products/GAO-11-463T | July 26, 2011 | 20 | A number of significant challenges remain to enhancing the security of cyber-reliant critical infrastructures, such as (1) implementing actions recommended by the President's cybersecurity policy review; (2) updating the national strategy for securing the information and communications infrastructure; (3) reassessing DHS's planning approach to critical infrastructure protection; (4) strengthening public-private partnerships, particularly for information sharing; (5) enhancing the national capability for cyber warning and analysis; (6) addressing global aspects of cybersecurity and governance; and (7) securing the modernized electricity grid. |
| Defense Department Cyber Efforts: DoD Faces Challenges in Its Cyber Activities http://www.gao.gov/products/GAO-11-75 | July 25, 2011 | 79 | GAO recommends that DOD evaluate how it is organized to address cybersecurity threats; assess the extent to which it has developed joint doctrine that addresses cyberspace operations; examine how it assigned command and control responsibilities; and determine how it identifies and acts to mitigate key capability gaps involving cyberspace operations. |

| Title | Date | Pages | Notes |
|---|-------------------|-------|--|
| <p>Critical Infrastructure Protection: Key Private and Public Cyber Expectations Need to Be Consistently Addressed</p> <p>http://www.gao.gov/products/GAO-10-628</p> | August 16, 2010 | 38 | <p>The Special Assistant to the President and Cybersecurity Coordinator and the Secretary of Homeland Security, should take two actions: (1) use the results of this report to focus their information-sharing efforts, including their relevant pilot projects, on the most desired services, including providing timely and actionable threat and alert information, access to sensitive or classified information, a secure mechanism for sharing information, and providing security clearance and (2) bolster the efforts to build out the National Cybersecurity and Communications Integration Center as the central focal point for leveraging and integrating the capabilities of the private sector, civilian government, law enforcement, the military, and the intelligence community.</p> |
| <p>Information Security: State Has Taken Steps to Implement a Continuous Monitoring Application, but Key Challenges Remain</p> <p>http://www.gao.gov/products/GAO-11-149</p> | July 8, 2011 | 63 | <p>The Department of State implemented a custom application called iPost and a risk scoring program that is intended to provide continuous monitoring capabilities of information security risk to elements of its information technology (IT) infrastructure. To improve implementation of iPost at State, the Secretary of State should direct the Chief Information Officer to develop, document, and maintain an iPost configuration management and test process.</p> |
| <p>Cybersecurity: Continued Attention Needed to Protect Our Nation's Critical Infrastructure and Federal Information Systems</p> <p>http://www.gao.gov/products/GAO-11-463T</p> | March 16, 2011 | 16 | <p>Executive branch agencies have made progress instituting several governmentwide initiatives that are aimed at bolstering aspects of federal cybersecurity, such as reducing the number of federal access points to the Internet, establishing security configurations for desktop computers, and enhancing situational awareness of cyber events. Despite these efforts, the federal government continues to face significant challenges in protecting the nation's cyber-reliant critical infrastructure and federal information systems.</p> |
| <p>Electricity Grid Modernization: Progress Being Made on Cybersecurity Guidelines, but Key Challenges Remain to be Addressed</p> <p>http://www.gao.gov/products/GAO-11-117</p> | January 12, 2011 | 50 | <p>GAO identified the following six key challenges: (1) Aspects of the regulatory environment may make it difficult to ensure smart grid systems' cybersecurity. (2) Utilities are focusing on regulatory compliance instead of comprehensive security. (3) The electric industry does not have an effective mechanism for sharing information on cybersecurity. (4) Consumers are not adequately informed about the benefits, costs, and risks associated with smart grid systems. (5) There is a lack of security features being built into certain smart grid systems. (6) The electricity industry does not have metrics for evaluating cybersecurity.</p> |
| <p>Information Security: Federal Agencies Have Taken Steps to Secure Wireless Networks, but Further Actions Can Mitigate Risk</p> <p>http://www.gao.gov/products/GAO-11-43</p> | November 30, 2010 | 50 | <p>Existing governmentwide guidelines and oversight efforts do not fully address agency implementation of leading wireless security practices. Until agencies take steps to better implement these leading practices, and OMB takes steps to improve governmentwide oversight, wireless networks will remain at an increased vulnerability to attack.</p> |

| Title | Date | Pages | Notes |
|--|--------------------|-------|--|
| <p>Cyberspace Policy: Executive Branch Is Making Progress Implementing 2009 Policy Review Recommendations, but Sustained Leadership Is Needed</p> <p>http://www.gao.gov/products/GAO-11-24</p> | October 6, 2010 | 66 | <p>Of the 24 recommendations in the President's May 2009 cyber policy review report, 2 have been fully implemented, and 22 have been partially implemented. While these efforts appear to be steps forward, agencies were largely not able to provide milestones and plans that showed when and how implementation of the recommendations was to occur.</p> |
| <p>DHS Efforts to Assess and Promote Resiliency Are Evolving but Program Management Could Be Strengthened</p> <p>http://www.gao.gov/products/GAO-10-772</p> | September 23, 2010 | 46 | <p>The Department of Homeland Security (DHS) has not developed an effective way to ensure that critical national infrastructure, such as electrical grids and telecommunications networks, can bounce back from a disaster. DHS has conducted surveys and vulnerability assessments of critical infrastructure to identify gaps, but has not developed a way to measure whether owners and operators of that infrastructure adopt measures to reduce risks.</p> |
| <p>Information Security: Progress Made on Harmonizing Policies and Guidance for National Security and Non-National Security Systems</p> <p>http://www.gao.gov/products/GAO-10-916</p> | September 15, 2010 | 38 | <p>OMB and NIST established policies and guidance for civilian non-national security systems, while other organizations, including the Committee on National Security Systems (CNSS), DOD, and the U.S. intelligence community, have developed policies and guidance for national security systems. GAO was asked to assess the progress of federal efforts to harmonize policies and guidance for these two types of systems.</p> |
| <p>United States Faces Challenges in Addressing Global Cybersecurity and Governance</p> <p>http://www.gao.gov/products/GAO-10-606</p> | August 2, 2010 | 53 | <p>GAO recommends that the Special Assistant to the President and Cybersecurity Coordinator should make recommendations to appropriate agencies and interagency coordination committees regarding any necessary changes to more effectively coordinate and forge a coherent national approach to cyberspace policy.</p> |
| <p>Federal Guidance Needed to Address Control Issues With Implementing Cloud Computing</p> <p>http://www.gao.gov/products/GAO-10-513</p> | July 1, 2010 | 53 | <p>To assist federal agencies in identifying uses for cloud computing and information security measures to use in implementing cloud computing, the Director of OMB should establish milestones for completing a strategy for implementing the federal cloud computing initiative.</p> |
| <p>Continued Attention Is Needed to Protect Federal Information Systems from Evolving Threats</p> <p>http://www.gao.gov/products/GAO-10-834t</p> | June 16, 2010 | 15 | <p>Multiple opportunities exist to improve federal cybersecurity. To address identified deficiencies in agencies' security controls and shortfalls in their information security programs, GAO and agency inspectors general have made hundreds of recommendations over the past several years, many of which agencies are implementing. In addition, the White House, the Office of Management and Budget, and certain federal agencies have undertaken several government-wide initiatives intended to enhance information security at federal agencies. While progress has been made on these initiatives, they all face challenges that require sustained attention, and GAO has made several recommendations for improving the implementation and effectiveness of these initiatives.</p> |

| Title | Date | Pages | Notes |
|--|-------------------|-------|--|
| Information Security: Concerted Response Needed to Resolve Persistent Weaknesses http://www.gao.gov/products/GAO-10-536t | March 24, 2010 | 21 | Without proper safeguards, federal computer systems are vulnerable to intrusions by individuals who have malicious intentions and can obtain sensitive information. The need for a vigilant approach to information security has been demonstrated by the pervasive and sustained cyber attacks against the United States; these attacks continue to pose a potentially devastating impact to systems as well as the operations and critical infrastructures that they support. |
| Cybersecurity: Continued Attention Is Needed to Protect Federal Information Systems from Evolving Threats http://www.gao.gov/products/GAO-11-463T | March 16, 2010 | 15 | The White House, the Office of Management and Budget, and certain federal agencies have undertaken several government-wide initiatives intended to enhance information security at federal agencies. While progress has been made on these initiatives, they all face challenges that require sustained attention, and GAO has made several recommendations for improving the implementation and effectiveness of these initiatives. |
| Concerted Effort Needed to Consolidate and Secure Internet Connections at Federal Agencies http://www.gao.gov/products/GAO-10-237 | April 12, 2010 | 40 | To reduce the threat to federal systems and operations posed by cyber attacks on the United States, OMB launched, in November 2007, the Trusted Internet Connections (TIC) initiative, and later, in 2008, the Department of Homeland Security's (DHS's) National Cybersecurity Protection System (NCPS), operationally known as Einstein, which became mandatory for federal agencies as part of TIC. In order to further ensure that federal agencies have adequate, sufficient, and timely information to successfully meet the goals and objectives of the TIC and Einstein programs, the Secretary of Homeland Security should, to better understand whether Einstein alerts are valid, develop additional performance measures that indicate how agencies respond to alerts. |
| Cybersecurity: Progress Made But Challenges Remain in Defining and Coordinating the Comprehensive National Initiative http://www.gao.gov/products/GAO-10-338 | March 5, 2010 | 64 | To address strategic challenges in areas that are not the subject of existing projects within CNCI but remain key to achieving the initiative's overall goal of securing federal information systems, the Director of OMB should continue development of a strategic approach to identity management and authentication, linked to HSPD-12 implementation, as initially described in the Chief Information Officers Council's plan for implementing federal identity, credential, and access management, so as to provide greater assurance that only authorized individuals and entities can gain access to federal information systems. |
| Continued Efforts Are Needed to Protect Information Systems from Evolving Threats http://www.gao.gov/products/GAO-10-230t | November 17, 2009 | 24 | GAO has identified weaknesses in all major categories of information security controls at federal agencies. For example, in fiscal year 2008, weaknesses were reported in such controls at 23 of 24 major agencies. Specifically, agencies did not consistently authenticate users to prevent unauthorized access to systems; apply encryption to protect sensitive data; and log, audit, and monitor security-relevant events, among other actions. |

| <p>Administration Strategy for Mitigating the Theft of U.S. Trade Secrets</p> <p>http://www.whitehouse.gov/sites/default/files/omb/IPEC/admin_strategy_on_mitigating_the_theft_of_u.s._trade_secrets.pdf</p> | February 20, 2013 | 141 | <p>“First, we will increase our diplomatic engagement...Second, we will support industry-led efforts to develop best practices to protect trade secrets and encourage companies to share with each other best practices that can mitigate the risk of trade secret theft... Third, DOJ will continue to make the investigation and prosecution of trade secret theft by foreign competitors and foreign governments a top priority... Fourth, President Obama recently signed two pieces of legislation that will improve enforcement against trade secret theft...Lastly, we will increase public awareness of the threats and risks to the U.S. economy posed by trade secret theft.”</p> |
| <p>National Strategy for Information Sharing and Safeguarding</p> <p>http://www.whitehouse.gov/sites/default/files/docs/2012sharingstrategy_1.pdf</p> | December 2012 | 24 | <p>Provides guidance for effective development, integration, and implementation of policies, processes, standards, and technologies to promote secure and responsible information sharing.</p> |
| <p>Can the President Deal with Cybersecurity Issues via Executive Order?</p> | October 19, 2012 | N/A | <p>When it comes to executive orders and emerging areas of law, the initial question that is always raised is whether the President has the authority to issue the executive order in the specified area—in this instance, cybersecurity. Not surprisingly, the answer is “it depends.”</p> <p>Source: CRS Legal Sidebar.</p> |
| <p>Collaborative and Cross-Cutting Approaches to Cybersecurity</p> <p>http://www.whitehouse.gov/blog/2012/08/01/collaborative-and-cross-cutting-approaches-cybersecurity</p> | August 1, 2012 | N/A | <p>Michael Daniel, White House Cybersecurity Coordinator, highlights a few recent initiatives where voluntary, cooperative actions are helping to improve the nation’s overall cybersecurity.</p> |
| <p>Trustworthy Cyberspace: Strategic Plan for the Federal Cybersecurity Research and Development Program</p> <p>http://www.whitehouse.gov/sites/default/files/microsites/ostp/fed_cybersecurity_rd_strategic_plan_2011.pdf</p> | December 6, 2011 | 36 | <p>As a research and development strategy, this plan defines four strategic thrusts: Inducing Change; Developing Scientific Foundations; Maximizing Research Impact; and Accelerating Transition to Practice.</p> |
| <p>Structural Reforms to Improve the Security of Classified Networks and the Responsible Sharing and Safeguarding of Classified Information</p> <p>http://www.whitehouse.gov/the-press-office/2011/10/07/executive-order-structural-reforms-improve-security-classified-networks-</p> | October 7, 2011 | N/A | <p>President Obama signed an executive order outlining data security measures and rules for government agencies to follow to prevent further data leaks by insiders. The order included the creation of a senior steering committee that will oversee the safeguarding and sharing of information.</p> |

| Title | Date | Pages | Notes |
|--|--------------------|-------|--|
| FY 2012 Reporting Instructions for the Federal Information Security Management Act and Agency Privacy Management ^a http://www.whitehouse.gov/sites/default/files/omb/memoranda/2011/m11-33.pdf | September 14, 2011 | 29 | Rather than enforcing a static, three-year reauthorization process, agencies are expected to conduct ongoing authorizations of information systems through the implementation of continuous monitoring programs. Continuous monitoring programs thus fulfill the three year security reauthorization requirement, so a separate re-authorization process is not necessary. |
| International Strategy for Cyberspace http://www.whitehouse.gov/sites/default/files/rss_viewer/international_strategy_for_cyberspace.pdf | May 16, 2011 | 30 | The strategy marks the first time any administration has attempted to set forth in one document the U.S. government's vision for cyberspace, including goals for defense, diplomacy, and international development. |
| Cybersecurity Legislative Proposal (Fact Sheet) http://www.whitehouse.gov/the-press-office/2011/05/12/fact-sheet-cybersecurity-legislative-proposal | May 12, 2011 | N/A | The Administration's proposal ensures the protection of individuals' privacy and civil liberties through a framework designed expressly to address the challenges of cybersecurity. The Administration's legislative proposal includes: Management, Personnel, Intrusion Prevention Systems, and Data Centers. |
| Federal Cloud Computing Strategy http://www.cio.gov/documents/Federal-Cloud-Computing-Strategy.pdf | February 13, 2011 | 43 | The strategy outlines how the federal government can accelerate the safe, secure adoption of cloud computing, and provides agencies with a framework for migrating to the cloud. It also examines how agencies can address challenges related to the adoption of cloud computing, such as privacy, procurement, standards, and governance. |
| 25 Point Implementation Plan to Reform Federal Information Technology Management http://www.cio.gov/documents/25-Point-Implementation-Plan-to-Reform-Federal%20IT.pdf | December 9, 2010 | 40 | The plan's goals are to reduce the number of federally run data centers from 2,100 to approximately 1,300, rectify or cancel one-third of troubled IT projects, and require federal agencies to adopt a "cloud first" strategy in which they will move at least one system to a hosted environment within a year. |
| Clarifying Cybersecurity Responsibilities http://www.whitehouse.gov/sites/default/files/omb/assets/memoranda_2010/m10-28.pdf | July 6, 2010 | 39 | This memorandum outlines and clarifies the respective responsibilities and activities of the Office of Management and Budget (OMB), the Cybersecurity Coordinator, and DHS, in particular with respect to the Federal Government's implementation of the Federal Information Security Management Act of 2002 (FISMA). |
| The National Strategy for Trusted Identities in Cyberspace: Creating Options for Enhanced Online Security and Privacy http://www.dhs.gov/xlibrary/assets/ns_tic.pdf | June 25, 2010 | 39 | The NSTIC, which is in response to one of the near term action items in the President's Cyberspace Policy Review, calls for the creation of an online environment, or an Identity Ecosystem, where individuals and organizations can complete online transactions with confidence, trusting the identities of each other and the identities of the infrastructure where transaction occur. |

|---|---------------|-------|--|
| Comprehensive National Cybersecurity Initiative (CNCI) http://www.whitehouse.gov/cybersecurity/comprehensive-national-cybersecurity-initiative | March 2, 2010 | 5 | The CNCI establishes a multi-pronged approach the federal government is to take in identifying current and emerging cyber threats, shoring up current and future telecommunications and cyber vulnerabilities, and responding to or proactively addressing entities that wish to steal or manipulate protected data on secure federal systems. |
| Cyberspace Policy Review: Assuring a Trusted and Resilient Communications Infrastructure http://www.whitehouse.gov/assets/documents/Cyberspace_Policy_Review_final.pdf | May 29, 2009 | 76 | The President directed a 60-day, comprehensive, “clean-slate” review to assess U.S. policies and structures for cybersecurity. The review team of government cybersecurity experts engaged and received input from a broad cross-section of industry, academia, the civil liberties and privacy communities, state governments, international partners, and the legislative and executive branches. This paper summarizes the review team’s conclusions and outlines the beginning of the way forward toward a reliable, resilient, trustworthy digital infrastructure for the future. |

|---|-------------------------------------|-----------------|-------|--|
| Resilient Military Systems and the Advanced Cyber Threat http://www.acq.osd.mil/dsb/reports/ResilientMilitarySystems.CyberThreat.pdf | Department of Defense Science Board | January 2013 | 146 | The report states that, despite numerous Pentagon actions to parry sophisticated attacks by other countries, efforts are “fragmented” and the Defense Department “is not prepared to defend against this threat.” The report lays out a scenario in which cyberattacks in conjunction with conventional warfare damaged the ability of U.S. forces to respond, creating confusion on the battlefield and weakening traditional defenses. |
| FY 2012 Annual Report http://www.dote.osd.mil/pub/reports/FY2012/pdf/other/2012DOTEAnnualReport.pdf | Department of Defense | January 2013 | 372 | Annual report to Congress by J. Michael Gilmore, director of Operational Test and Evaluation. Assesses the operational effectiveness of systems being developed for combat. See “Information Assurance (I/A) and Interoperability (IOP)” chapter, pages 305-312, for information on network exploitation and compromise exercises. |
| Basic Safeguarding of Contractor Information Systems (Proposed Rule) http://www.gpo.gov/fdsys/pkg/FR-2012-08-24/pdf/2012-20881.pdf | Federal Register | August 24, 2012 | 4 | This regulation authored by the Department of Defense (DOD), General Services Administration (GSA), and National Aeronautics and Space Administration (NASA) “would add a contract clause to address requirements for the basic safeguarding of contractor information systems that contain or process information provided by or generated for the government (other than public information).” |

|--|--------------------------------|-------------------|-------|--|
| DOD Actions Needed to Strengthen Management and Oversight http://www.gao.gov/products/GAO-12-479?source=ra | GAO | July 9, 2012 | 46 | DOD's oversight of electronic warfare capabilities may be further complicated by its evolving relationship with computer network operations, which is also an information operations-related capability. Without clearly defined roles and responsibilities and updated guidance regarding oversight responsibilities, DOD does not have reasonable assurance that its management structures will provide effective department-wide leadership for electronic warfare activities and capabilities development and ensure effective and efficient use of its resources. |
| Cloud Computing Strategy http://www.defense.gov/news/DoDCloudComputingStrategy.pdf | DOD, Chief Information Officer | July 2012 | 44 | The DOD Cloud Computing Strategy introduces an approach to move the department from the current state of a duplicative, cumbersome, and costly set of application silos to an end state, which is an agile, secure, and cost effective service environment that can rapidly respond to changing mission needs. |
| DOD Defense Industrial Base (DIB) Voluntary Cyber Security and Information Assurance Activities http://www.gpo.gov/fdsys/pkg/FR-2012-05-11/pdf/2012-10651.pdf | Federal Register | May 11, 2012 | | DOD interim final rule to establish a voluntary cyber security information sharing program between DOD and eligible DIB companies. The program enhances and supplements DIB participants' capabilities to safeguard DOD information that resides on, or transits, DIB unclassified information. |
| DOD Information Security Program: Overview, Classification, and Declassification http://www.fas.org/sgp/othergov/dod/5200_01v1.pdf | DOD | February 16, 2012 | 84 | Describes the DOD Information Security Program, and provides guidance for classification and declassification of DOD information that requires protection in the interest of the national security. |

| <p>Cyber Sentries: Preparing Defenders to Win in a Contested Domain http://www.dtic.mil/cgi-bin/GetTRDoc?AD=ADA561779&Location=U2&doc=GetTRDoc.pdf</p> | Air War College | February 7, 2012 | 38 | <p>This paper examines the current impediments to effective cybersecurity workforce preparation and offers new concepts to create Cyber Sentries through realistic training, network authorities tied to certification, and ethical training. These actions present an opportunity to significantly enhance workforce quality and allow the Department to operate effectively in the contested cyber domain in accordance with the vision established in its Strategy for Cyberspace Operations</p> |
| <p>Defense Department Cyber Efforts: Definitions, Focal Point, and Methodology Needed for DOD to Develop Full-Spectrum Cyberspace Budget Estimates http://www.gao.gov/products/GAO-11-695R</p> | General Accountability Office (GAO) | July 29, 2011 | 33 | <p>This letter discusses DOD's cyber and information assurance budget for fiscal year 2012 and future years defense spending. The objectives of this review were to (1) assess the extent to which DOD has prepared an overarching budget estimate for full-spectrum cyberspace operations across the department; and (2) identify the challenges DOD has faced in providing such estimates.</p> |
| <p>Legal Reviews of Weapons and Cyber Capabilities http://www.e-publishing.af.mil/shared/media/epubs/AFI51-402.pdf</p> | Secretary of the Air Force | July 27, 2011 | 7 | <p>States the Air Force must subject cyber capabilities to legal review for compliance with the Law of Armed Conflict and other international and domestic laws. The Air Force judge advocate general must ensure that all cyber capabilities "being developed, bought, built, modified or otherwise acquired by the Air Force" must undergo legal review—except for cyber capabilities within a Special Access Program, which must undergo review by the Air Force general counsel.</p> |
| <p>Department of Defense Strategy for Operating in Cyberspace http://www.defense.gov/news/d20110714cyber.pdf</p> | DOD | July 14, 2011 | 19 | <p>This is an unclassified summary of DOD's cyber-security strategy.</p> |

| Title | Source | Date | Pages | Notes |
|--|--|-------------------------|-------|--|
| <p>Cyber Operations Personnel Report (DOD) http://www.hsdl.org/?view&did=488076</p> | DOD | April, 2011 | 84 | <p>This report focuses on FY2009 Department of Defense Cyber Operations personnel, with duties and responsibilities as defined in Section 934 of the Fiscal Year 2010 National Defense Authorization Act (NDAA). Appendix A—Cyber Operations-related Military Occupations Appendix B—Commercial Certifications Supporting the DOD Information Assurance Workforce Improvement Program Appendix C—Military Services Training and Development Appendix D—Geographic Location of National Centers of Academic Excellence in Information Assurance</p> |
| <p>Anomaly Detection at Multiple Scales (ADAMS) http://info.publicintelligence.net/DARPA-ADAMS.pdf</p> | <p>Defense Advanced Research Projects Agency (DARPA)</p> | <p>November 9, 2011</p> | 74 | <p>The design document was produced by Allure Security and sponsored by the Defense Advanced Research Projects Agency (DARPA). It describes a system for preventing leaks by seeding believable disinformation in military information systems to help identify individuals attempting to access and disseminate classified information.</p> |
| <p>Critical Code: Software Producibility for Defense http://www.nap.edu/catalog.php?record_id=12979</p> | <p>National Research Council, Committee for Advancing Software-Intensive Systems Producibility</p> | <p>October 20, 2010</p> | 161 | <p>Assesses the nature of the national investment in software research and, in particular, considers ways to revitalize the knowledge base needed to design, produce, and employ software-intensive systems for tomorrow's defense needs.</p> |
| <p>Defending a New Domain http://www.foreignaffairs.com/articles/66552/william-j-lynn-iii/defending-a-new-domain</p> | <p>U.S. Deputy Secretary of Defense, William J. Lynn (Foreign Affairs)</p> | <p>September 2010</p> | N/A | <p>In 2008, the U.S. Department of Defense suffered a significant compromise of its classified military computer networks. It began when an infected flash drive was inserted into a U.S. military laptop at a base in the Middle East. This previously classified incident was the most significant breach of U.S. military computers ever, and served as an important wake-up call.</p> |

Table 23. Selected Government Reports: National Strategy for Trusted Identities in Cyberspace (NSTIC)

| Title | Source | Date | Pages | Notes |
|---|------------------------|--------------------|-------|--|
| Five Pilot Projects Receive Grants to Promote Online Security and Privacy http://www.nist.gov/itl/nstic-092012.cfm | NIST | September 20, 2012 | N/A | NIST announced more than \$9 million in grant awards to support the National Strategy for Trusted Identities in Cyberspace (NSTIC). Five U.S. organizations will pilot identity solutions that increase confidence in online transactions, prevent identity theft, and provide individuals with more control over how they share their personal information. |
| Recommendations for Establishing an Identity Ecosystem Governance Structure for the National Strategy for Trusted Identities in Cyberspace http://www.nist.gov/nstic/2012-nstic-governance-recs.pdf | NIST | February 17, 2012 | 51 | NIST responds to comments received in response to the related Notice of Inquiry published in the <i>Federal Register</i> on June 14, 2011. |
| Models for a Governance Structure for the National Strategy for Trusted Identities in Cyberspace http://www.nist.gov/nstic/nstic-frn-noi.pdf | Department of Commerce | June 14, 2011 | 4 | The department seeks public comment from all stakeholders, including the commercial, academic and civil society sectors, and consumer and privacy advocates on potential models, in the form of recommendations and key assumptions in the formation and structure of the steering group. |
| Administration Releases Strategy to Protect Online Consumers and Support Innovation and Fact Sheet on National Strategy for Trusted Identities in Cyberspace http://www.whitehouse.gov/the-press-office/2011/04/15/administration-releases-strategy-protect-online-consumers-and-support-in | White House | April 15, 2011 | 52 | Press release on a proposal to administer the processes for policy and standards adoption for the Identity Ecosystem Framework in accordance with the National Strategy for Trusted Identities in Cyberspace (NSTIC). |
| National Strategy for Trusted Identities in Cyberspace http://www.whitehouse.gov/blog/2010/06/25/national-strategy-trust-cyberspace | White House | April 15, 2011 | 52 | The NSTIC aims to make online transactions more trustworthy, thereby giving businesses and consumers more confidence in conducting business online. |

Table 24. Selected Reports: Cloud Computing

| Title | Source | Date | Pages | Notes |
|---|--|--------------------|-------|--|
| Delivering on the Promise of Big Data and the Cloud http://www.boozallen.com/media/file/BigDataInTheCloud.pdf | Booz, Allen, Hamilton | January 9, 2013 | 7 | Reference architecture does away with conventional data and analytics silos, consolidating all information into a single medium designed to foster connections called a "data lake," which reduces complexity and creates efficiencies that improve data visualization to allow for easier insights by analysts. |
| Cloud Computing: An Overview of the Technology and the Issues facing American Innovators http://judiciary.house.gov/hearings/Hearings%202012/hear_07252012_2.html | House Judiciary Comm., Subcom. on Intellectual Property, Competition, and the Interenet | July 25, 2012 | 156 | Overview and discussion of cloud computing issues. |
| Information Technology Reform: Progress Made but Future Cloud Computing Efforts Should be Better Planned http://www.gao.gov/products/GAO-12-756 | GAO | July 11, 2012 | 43 | To help ensure the success of agencies' implementation of cloud-based solutions, the Secretaries of Agriculture, Health and Human Services, Homeland Security, State, and the Treasury, and the Administrators of the General Services Administration and Small Business Administration should direct their respective chief information officer (CIOs) to establish estimated costs, performance goals, and plans to retire associated legacy systems for each cloud-based service discussed in this report, as applicable. |
| Cloud Computing Strategy http://www.defense.gov/news/DoDCloudComputingStrategy.pdf | DOD, Chief Information Officer | July 2012 | 44 | The DOD Cloud Computing Strategy introduces an approach to move the department from the current state of a duplicative, cumbersome, and costly set of application silos to an end state, which is an agile, secure, and cost effective service environment that can rapidly respond to changing mission needs. |

| Title | Source | Date | Pages | Notes |
|--|---------------------------------------|------------------|-------|--|
| <p>A Global Reality: Governmental Access to Data in the Cloud - A Comparative Analysis of Ten International Jurisdictions</p> <p>http://www.hldataprotection.com/uploads/file/Hogan%20Lovells%20White%20Paper%20Government%20Access%20to%20Cloud%20Data%20Paper%20%281%29.pdf</p> | Hogan Lovells | May 23, 2012 | 13 | This White Paper compares the nature and extent of governmental access to data in the cloud in many jurisdictions around the world. |
| <p>Policy Challenges of Cross-Border Cloud Computing</p> <p>http://www.usitc.gov/journals/Policy_Challenges_of_Cross-border_Cloud_Computing_rev.pdf</p> | U.S. International Trade Commission | May 1, 2012 | 38 | Examine the main policy challenges associated with cross-border cloud computing—data privacy, security, and ensuring the free flow of information—and the ways that countries are addressing them through domestic policymaking, international agreements, and other cooperative arrangements. |
| <p>Cloud Computing Synopsis and Recommendations</p> <p>http://csrc.nist.gov/publications/nistpubs/800-146/sp800-146.pdf</p> | NIST | May 2012 | 81 | The National Institute of Standards and Technology has unveiled a guide that explains cloud technologies in “plain terms” to federal agencies and provides recommendations for IT decision makers. |
| <p>Global Cloud Computing Scorecard a Blueprint for Economic Opportunity</p> <p>http://portal.bsa.org/cloudscorecard2012/</p> | Business Software Alliance | February 2, 2012 | 24 | This report notes that while many developed countries have adjusted their laws and regulations to address cloud computing, the wide differences in those rules make it difficult for companies to invest in the technology. |
| <p>Concept of Operations: FedRAMP</p> <p>http://www.gsa.gov/graphics/staffoffices/FedRAMP_CONOPS.pdf</p> | General Services Administration (GSA) | February 7, 2012 | 47 | Implementation of FedRAMP will be in phases. This document describes all the services that will be available at initial operating capability—targeted for June 2012. The Concept of Operations will be updated as the program evolves toward sustained operations. |
| <p>Federal Risk and Authorization Management Program (FedRAMP)</p> <p>http://www.gsa.gov/portal/category/102371</p> | Federal CIO Council | January 4, 2012 | N/A | The Federal Risk and Authorization Management Program or FedRAMP has been established to provide a standard approach to Assessing and Authorizing (A&A) cloud computing services and products. |

| Title | Source | Date | Pages | Notes |
|---|--|-------------------|-------|---|
| Security Authorization of Information Systems in Cloud Computing Environments (FedRAMP) http://www.cio.gov/fedrampmemo.pdf | White House/Office of Management and Budget (OMB) | December 8, 2011 | 7 | The Federal Risk and Authorization Management Program (FedRAMP) will now be required for all agencies purchasing storage, applications and other remote services from vendors. The Obama Administration has championed cloud computing as a means to save money and accelerate the government's adoption of new technologies. |
| U.S. Government Cloud Computing Technology Roadmap, Volume I, Release 1.0 (Draft). High-Priority Requirements to Further USG Agency Cloud Computing Adoption http://www.nist.gov/itl/cloud/upload/SP_500_293_volumel-2.pdf | NIST | December 1, 2011 | 32 | Volume I is aimed at interested parties who wish to gain a general understanding and overview of the background, purpose, context, work, results, and next steps of the U.S. Government Cloud Computing Technology Roadmap initiative. |
| U.S. Government Cloud Computing Technology Roadmap, Release 1.0 (Draft), Volume II Useful Information for Cloud Adopters http://www.nist.gov/itl/cloud/upload/SP_500_293_volumell.pdf | NIST | December 1, 2011 | 85 | Volume II is designed to be a technical reference for those actively working on strategic and tactical cloud computing initiatives, including, but not limited to, U.S. government cloud adopters. Volume II integrates and summarizes the work completed to date, and explains how these findings support the roadmap introduced in Volume I. |
| Information Security: Additional Guidance Needed to Address Cloud Computing Concerns http://www.gao.gov/products/GAO-12-130T | GAO | October 5, 2011 | 17 | Twenty-two of 24 major federal agencies reported that they were either concerned or very concerned about the potential information security risks associated with cloud computing. GAO recommended that the NIST issue guidance specific to cloud computing security. NIST has issued multiple publications which address such guidance; however, one publication remains in draft, and is not to be finalized until the first quarter of fiscal year 2012. |
| Cloud Computing Reference Architecture http://www.nist.gov/customcf/get_pdf.cfm?pub_id=909505 | NIST | September 1, 2011 | 35 | This "Special Publication," which is not an official U.S. government standard, is designed to provide guidance to specific communities of practitioners and researchers. |
| Guide to Cloud Computing for Policy Makers http://www.siaa.net/index.php?option=com_docman&task=doc_download&gid=3040&Itemid=318 | Software and Information Industry Association (SIIA) | July 26, 2011 | 27 | The SIIA concludes "that there is no need for cloud-specific legislation or regulations to provide for the safe and rapid growth of cloud computing, and in fact, such actions could impede the great potential of cloud computing." |

| Title | Source | Date | Pages | Notes |
|---|-------------|-------------------|-------|---|
| Federal Cloud Computing Strategy http://www.cio.gov/documents/Federal-Cloud-Computing-Strategy.pdf | White House | February 13, 2011 | 43 | The strategy outlines how the federal government can accelerate the safe, secure adoption of cloud computing, and provides agencies with a framework for migrating to the cloud. It also examines how agencies can address challenges related to the adoption of cloud computing, such as privacy, procurement, standards, and governance |

Notes: These reports analyze cybersecurity issues related to the federal government's adoption of cloud computing storage options. Highlights compiled by CRS from the reports.

CRS Reports: Critical Infrastructure

- CRS Report R42683, *Critical Infrastructure Resilience: The Evolution of Policy and Programs and Issues for Congress*, by John D. Moteff
- CRS Report RL30153, *Critical Infrastructures: Background, Policy, and Implementation*, by John D. Moteff
- CRS Report R42660, *Pipeline Cybersecurity: Federal Policy*, by Paul W. Parfomak
- CRS Report R41536, *Keeping America's Pipelines Safe and Secure: Key Issues for Congress*, by Paul W. Parfomak
- CRS Report R41886, *The Smart Grid and Cybersecurity—Regulatory Policy and Issues*, by Richard J. Campbell
- CRS Report R42338, *Smart Meter Data: Privacy and Cybersecurity*, by Brandon J. Murrill, Edward C. Liu, and Richard M. Thompson II
- CRS Report RL33586, *The Federal Networking and Information Technology Research and Development Program: Background, Funding, and Activities*, by Patricia Moloney Figliola
- CRS Report 97-868, *Internet Domain Names: Background and Policy Issues*, by Lennard G. Kruger
- CRS Report R42351, *Internet Governance and the Domain Name System: Issues for Congress*, by Lennard G. Kruger

Table 25. Selected Reports: Critical Infrastructure

| Title | Source | Date | Pages | Notes |
|---|---|--------------------|-------|--|
| SCADA and Process Control Security Survey https://www.sans.org/reading_room/analysts_program/sans_survey_scada_2013.pdf | SANS Institute | February 1, 2013 | 19 | SANS Institute surveyed professionals who work with SCADA and process control systems. Of the nearly 700 respondents, 70% said they consider their SCADA systems to be at high or severe risk; one-third of them suspect that they have been already been infiltrated. |
| Follow-up Audit of the Department's Cyber Security Incident Management Program https://www.hsdl.org/?view&did=728459 | U.S. Department of Energy Inspector General's Office | December 1, 2012 | 25 | In 2008, it was reported in the Department's Cyber Security Incident Management Program (DOE/IG-0787, January 2008) that the department and NNSA established and maintained a number of independent, at least partially duplicative, cyber security incident management capabilities. Although certain actions had been taken in response to the prior report, identified were several issues that limited the efficiency and effectiveness of the department's cyber security incident management program and adversely affected the ability of law enforcement to investigate incidents. In response to the finding, management concurred with the recommendations and indicated that it had initiated actions to address the issues identified. |
| Terrorism and the Electric Power Delivery System http://www.nap.edu/catalog.php?record_id=12050 | National Academies of Science | November 2012 | 146 | Focuses on measures that could make the power delivery system less vulnerable to attacks, restore power faster after an attack, and make critical services less vulnerable while the delivery of conventional electric power has been disrupted. |
| New FERC Office to Focus on Cyber Security http://www.ferc.gov/media/news-releases/2012/2012-3/09-20-12.asp | U.S. Department of Energy | September 20, 2012 | N/A | The Federal Energy Regulatory Commission announced the creation of the agency's new Office of Energy Infrastructure Security, which will work to reduce threats to the electric grid and other energy facilities. The goal is for the office to help FERC, as well as other agencies and private companies, better identify potential dangers and solutions. |
| Canvassing the Targeting of Energy Infrastructure: The Energy Infrastructure Attack Database http://www.ensec.org/index.php?option=com_content&view=article&id=379:canvassing-the-targeting-of-energy-infrastructure-the-energy-infrastructure-attack-database&catid=128:issue-content&Itemid=402 | Journal of Energy Security | August 7, 2012 | 8 | The Energy Infrastructure Attack Database (EIAD) is a non-commercial dataset that structures information on reported (criminal and political) attacks to EI (worldwide) since 1980, by non-state actors. In building this resource, the objective was to develop a product that could be broadly accessible and also connect to existing available resources |

| Title | Source | Date | Pages | Notes |
|--|--|----------------|-------|---|
| Smart-Grid Security http://cip.gmu.edu/archive/CIPHS_TheCIPReport_August2012_SmartGridSecurity.pdf#page=2 | Center for Infrastructure Protection and Homeland Security, George Mason School of Law | August 1, 2012 | 26 | Highlights the significance of and the challenges with securing the smart grid. |
| Cybersecurity: Challenges in Securing the Electricity Grid http://www.gao.gov/products/GAO-12-926T | GAO | July 17, 2012 | 25 | In a prior report, GAO has made recommendations related to electricity grid modernization efforts, including developing an approach to monitor compliance with voluntary standards. These recommendations have not yet been implemented. |
| ICS-CERT Incident Response Summary Report http://www.us-cert.gov/control_systems/pdf/ICS-CERT_Incident_Response_Summary_Report_09_11.pdf | U.S. Industrial Control System Cyber Emergency Response Team (ICS-CERT) | June 28, 2012 | 17 | The number of reported cyberattacks on U.S. critical infrastructure increased sharply—from 9 incidents in 2009 to 198 in 2011; water sector-specific incidents, when added to the incidents that affected several sectors, accounted for more than half of the incidents; in more than half of the most serious cases, implementing best practices such as login limitation or properly configured firewall, would have deterred the attack, reduced the time it would have taken to detect an attack, and minimize its impact. |
| Energy Department Develops Tool with Industry to Help Utilities Strengthen Their Cybersecurity Capabilities http://energy.gov/articles/energy-department-develops-tool-industry-help-utilities-strengthen-their-cybersecurity | U.S. Department of Energy | June 28, 2012 | N/A | The Cybersecurity Self-Evaluation Tool utilizes best practices that were developed for the Electricity Subsector Cybersecurity Capability Maturity Model Initiative, which involved a series of workshops with the private sector to draft a maturity model that can be used throughout the electric sector to better protect the grid. |
| Electricity Subsector Cybersecurity Risk Management Process http://energy.gov/oe/downloads/cybersecurity-risk-management-process-rmp-guideline-final-may-2012 | Department of Energy, Office of Electricity Delivery & Energy Reliability | May 2012 | 96 | The guideline describes a risk management process that is targeted to the specific needs of electricity sector organizations. The objective of the guideline is to build upon existing guidance and requirements to develop a flexible risk management process tuned to the diverse missions, equipment, and business needs of the electric power industry. |
| Cybersecurity for Energy Delivery Systems Program http://energy.gov/oe/technology-development/energy-delivery-systems-cybersecurity | Department of Energy, Office of Electricity Delivery & Energy Reliability | ongoing | N/A | The program assists the energy sector asset owners (electric, oil, and gas) by developing cybersecurity solutions for energy delivery systems through integrated planning and a focused research and development effort. CEDS co-funds projects with industry partners to make advances in cybersecurity capabilities for energy delivery systems. |

| <p>ICT Applications for the Smart Grid: Opportunities and Policy Implications</p> <p>http://www.oecd-ilibrary.org/docserver/download/fulltext/5k9h2q8v9bln.pdf?expires=1341594602&id=id&accname=guest&checksum=0BF921941D8F00E7521044D5B56FE32E</p> | <p>Organization for Economic Co-operation and Development (OECD)</p> | <p>January 10, 2012</p> | <p>44</p> | <p>This report discusses “smart” applications of information and communication technologies (ICTs) for more sustainable energy production, management and consumption. The report outlines policy implications for government ministries dealing with telecommunications regulation, ICT sector and innovation promotion, and consumer and competition issues.</p> |
| <p>The Department’s Management of the Smart Grid Investment Grant Program</p> <p>http://energy.gov/ig/downloads/departments-management-smart-grid-investment-grant-program-oas-ra-12-04</p> | <p>Department of Energy (DOE) Inspector General</p> | <p>January 1, 2012</p> | <p>21</p> | <p>According to the Inspector General, DOE's rush to award stimulus grants for projects under the next generation of the power grid, known as the Smart grid, resulted in some firms receiving funds without submitting complete plans for how to safeguard the grid from cyber attacks.</p> |
| <p>Critical Infrastructure Protection: Cybersecurity Guidance Is Available, but More Can Be Done to Promote Its Use</p> <p>http://www.gao.gov/products/GAO-12-92</p> | <p>General Accountability Office (GAO)</p> | <p>December 9, 2011</p> | <p>77</p> | <p>Given the plethora of guidance available, individual entities within the sectors may be challenged in identifying the guidance that is most applicable and effective in improving their security posture. Improved knowledge of the available guidance could help both federal and private-sector decision makers better coordinate their efforts to protect critical cyber-reliant assets.</p> |
| <p>The Future of the Electric Grid</p> <p>http://web.mit.edu/mitei/research/studies/the-electric-grid-2011.shtml</p> | <p>Massachusetts Institute of Technology (MIT)</p> | <p>December 5, 2011</p> | <p>39</p> | <p>Chapter 1 provides an overview of the status of the grid, the challenges and opportunities it will face, and major recommendations. To facilitate selective reading, detailed descriptions of the contents of each section in Chapters 2–9 are provided in each chapter’s introduction, and recommendations are collected and briefly discussed in each chapter's final section. (See: Chapter 9, Data Communications, Cybersecurity, and Information Privacy, pages 208-234).</p> |
| <p>FCC’s Plan for Ensuring the Security of Telecommunications Networks</p> <p>ftp://ftp.fcc.gov/pub/Daily_Releases/Daily_Business/2011/db0610/DOC-307454A1.txt</p> | <p>Federal Communications Commission (FCC)</p> | <p>June 3, 2011</p> | <p>1</p> | <p>FCC Chairman Genachowski's response to letter from Rep. Anna Eshoo dated November 2, 2010, re: concerns about the implications of foreign-controlled telecommunications infrastructure companies providing equipment to the U.S. market.</p> |

| <p>Cyber Infrastructure Protection</p> <p>http://www.strategicstudiesinstitute.army.mil/pubs/display.cfm?pubid=1067</p> | <p>U.S. Army War College</p> | <p>May 9, 2011</p> | <p>324</p> | <p>Part 1 deals with strategy and policy issues related to cyber security and provides discussions covering the theory of cybberpower, Internet survivability, large scale data breaches, and the role of cybberpower in humanitarian assistance. Part 2 covers social and legal aspects of cyber infrastructure protection and discusses the attack dynamics of political and religiously motivated hackers. Part 3 discusses the technical aspects of cyber infrastructure protection including the resilience of data centers, intrusion detection, and a strong emphasis on Internet protocol (IP) networks.</p> |
| <p>In the Dark: Crucial Industries Confront Cyberattacks</p> <p>http://www.mcafee.com/us/resources/reports/rp-critical-infrastructure-protection.pdf</p> | <p>McAfee and Center for Strategic and International Studies (CSIS)</p> | <p>April 21, 2011</p> | <p>28</p> | <p>The study reveals an increase in cyber attacks on critical infrastructure such as power grids, oil, gas, and water; the study also shows that that many of the world's critical infrastructures lacked protection of their computer networks, and reveals the cost and impact of cyberattacks</p> |
| <p>Cybersecurity: Continued Attention Needed to Protect Our Nation's Critical Infrastructure and Federal Information Systems</p> <p>http://www.gao.gov/products/GAO-11-463T</p> | <p>General Accountability Office (GAO)</p> | <p>March 16, 2011</p> | <p>16</p> | <p>According to GAO, executive branch agencies have also made progress instituting several government-wide initiatives that are aimed at bolstering aspects of federal cybersecurity, such as reducing the number of federal access points to the Internet, establishing security configurations for desktop computers, and enhancing situational awareness of cyber events. Despite these efforts, the federal government continues to face significant challenges in protecting the nation's cyber-reliant critical infrastructure and federal information systems.</p> |
| <p>Federal Energy Regulatory Commission's Monitoring of Power Grid Cyber Security</p> <p>http://www.wired.com/images_blogs/threatlevel/2011/02/DoE-IG-Report-on-Grid-Security.pdf</p> | <p>North American Electric Reliability Corp. (NERC)</p> | <p>January 26, 2011</p> | <p>30</p> | <p>NERC developed Critical Infrastructure Protection (CIP) cyber security reliability standards which were approved by the FERC in January 2008. Although the Commission had taken steps to ensure CIP cyber security standards were developed and approved, NERC's testing revealed that such standards did not always include controls commonly recommended for protecting critical information systems. In addition, the CIP standards implementation approach and schedule approved by the Commission were not adequate to ensure that systems-related risks to the nation's power grid were mitigated or addressed in a timely manner.</p> |

|--|--|--------------------------|------------|---|
| <p>Electricity Grid Modernization: Progress Being Made on Cybersecurity Guidelines, but Key Challenges Remain to be Addressed</p> <p>http://www.gao.gov/products/GAO-11-117</p> | <p>General Accountability Office (GAO)</p> | <p>January 12, 2011</p> | <p>50</p> | <p>To reduce the risk that NIST's smart grid cybersecurity guidelines will not be as effective as intended, the Secretary of Commerce should direct the Director of NIST to finalize the agency's plan for updating and maintaining the cybersecurity guidelines, including ensuring it incorporates (1) missing key elements identified in this report, and (2) specific milestones for when efforts are to be completed. Also, as a part of finalizing the plan, the Secretary of Commerce should direct the Director of NIST to assess whether any cybersecurity challenges identified in this report should be addressed in the guidelines.</p> |
| <p>Partnership for Cybersecurity Innovation</p> <p>http://www.whitehouse.gov/blog/2010/12/06/partnership-cybersecurity-innovation</p> | <p>White House (Office of Science & Technology Policy)</p> | <p>December 6, 2010</p> | <p>4</p> | <p>The Obama Administration released a Memorandum of Understanding signed by the National Institute of Standards and Technology (NIST) of the Department of Commerce, the Science and Technology Directorate of the Department of Homeland Security (DHS/S&T), and the Financial Services Sector Coordinating Council (FSSCC). The goal of the agreement is to speed the commercialization of cybersecurity research innovations that support the nation's critical infrastructures.</p> |
| <p>WIB Security Standard Released</p> <p>http://www.isssource.com/wib/</p> | <p>International Instrument Users Association (WIB)</p> | <p>November 10, 2010</p> | <p></p> | <p>The Netherlands-based International Instrument Users Association (WIB), an international organization that represents global manufacturers in the industrial automation industry, announced the second version of the Process Control Domain Security Requirements For Vendors document—the first international standard that outlines a set of specific requirements focusing on cyber security best practices for suppliers of industrial automation and control systems.</p> |
| <p>Information Security Management System for Microsoft Cloud Infrastructure</p> <p>http://cdn.globalfoundationservices.com/documents/InformationSecurityMangSysforMSCloudInfrastructure.pdf</p> | <p>Microsoft</p> | <p>November 2010</p> | <p>15</p> | <p>This study describes the standards Microsoft follows to address current and evolving cloud security threats. It also depicts the internal structures within Microsoft that handle cloud security and risk management issues.</p> |
| <p>NIST Finalizes Initial Set of Smart Grid Cyber Security Guidelines</p> <p>http://www.nist.gov/public_affairs/releases/nist-finalizes-initial-set-of-smart-grid-cyber-security-guidelines.cfm</p> | <p>National Institute of Standards and Technology (NIST)</p> | <p>September 2, 2010</p> | <p>N/A</p> | <p>NIST released a 3-volume set of recommendations on all things relevant to securing the Smart Grid. The guidelines address a variety of topics, including high-level security requirements, a risk assessment framework, an evaluation of privacy issues in residences and recommendations for protecting the evolving grid from attacks, malicious code, cascading errors, and other threats.</p> |

| Title | Source | Date | Pages | Notes |
|---|--|----------------|-------|---|
| Critical Infrastructure Protection: Key Private and Public Cyber Expectations Need to Be Consistently Addressed http://www.gao.gov/products/GAO-10-628 | General Accountability Office (GAO) | July 15, 2010 | 38 | Private-sector stakeholders reported that they expect their federal partners to provide usable, timely, and actionable cyber threat information and alerts; access to sensitive or classified information; a secure mechanism for sharing information; security clearances; and a single centralized government cybersecurity organization to coordinate government efforts. However, according to private sector stakeholders, federal partners are not consistently meeting these expectations. |
| The future of cloud computing http://pewinternet.org/Reports/2010/The-future-of-cloud-computing.aspx | Pew Research Center's Internet & American Life Project | June 11, 2010 | 26 | Technology experts and stakeholders say they expect they will "live mostly in the cloud" in 2020 and not on the desktop, working mostly through cyberspace-based applications accessed through networked devices. |
| The Reliability of Global Undersea Communications Cable Infrastructure (The ROGUCCI Report) http://www.ieee-rogucci.org/files/The%20ROGUCCI%20Report.pdf | IEEE/EastWest Institute | May 26, 2010 | 186 | This study submits 12 major recommendations to the private sector, governments and other stakeholders—especially the financial sector—for the purpose of improving the reliability, robustness, resilience, and security of the world's undersea communications cable infrastructure. |
| NSTB Assessments Summary Report: Common Industrial Control System Cyber Security Weaknesses http://www.fas.org/sgp/eprint/nstb.pdf | Department of Energy, Idaho National Laboratory | May 1, 2010 | 123 | Computer networks controlling the electric grid are plagued with security holes that could allow intruders to redirect power delivery and steal data. Many of the security vulnerabilities are strikingly basic and fixable problems. |
| Explore the reliability and resiliency of commercial broadband communications networks http://hraunfoss.fcc.gov/edocs_public/attachmatch/DOC-305618A1.doc | Federal Communications Commission (FCC) | April 21, 2010 | N/A | The Federal Communications Commission launched an inquiry on the ability of existing broadband networks to withstand significant damage or severe overloads as a result of natural disasters, terrorist attacks, pandemics or other major public emergencies, as recommended in the National Broadband Plan. |
| Security Guidance for Critical Areas of Focus in Cloud Computing V2.1 http://www.cloudsecurityalliance.org/csaguide.pdf | Cloud Security Alliance | December 2009 | 76 | "Through our focus on the central issues of cloud computing security, we have attempted to bring greater clarity to an otherwise complicated landscape, which is often filled with incomplete and oversimplified information. Our focus ... serves to bring context and specificity to the cloud computing security discussion: enabling us to go beyond gross generalizations to deliver more insightful and targeted recommendations." |

|---|---|-----------------|-------|---|
| 21 Steps to Improve Cyber Security of SCADA Networks http://www.oe.netl.doe.gov/docs/prepare/21stepsbooklet.pdf | U.S. Department of Energy, Infrastructure Security and Energy Restoration | January 1, 2007 | 10 | The President's Critical Infrastructure Protection Board and the Department of Energy have developed steps to help any organization improve the security of its SCADA networks. The steps are divided into two categories: specific actions to improve implementation, and actions to establish essential underlying management processes and policies. |

Note: Highlights compiled by CRS from the reports.

CRS Reports: Cybercrime and National Security

- CRS Report 97-1025, *Cybercrime: An Overview of the Federal Computer Fraud and Abuse Statute and Related Federal Criminal Laws*, by Charles Doyle
- CRS Report 94-166, *Extraterritorial Application of American Criminal Law*, by Charles Doyle
- CRS Report R42403, *Cybersecurity: Cyber Crime Protection Security Act (S. 2111, 112th Congress)—A Legal Analysis*, by Charles Doyle
- CRS Report 98-326, *Privacy: An Overview of Federal Statutes Governing Wiretapping and Electronic Eavesdropping*, by Gina Stevens and Charles Doyle
- CRS Report RL32706, *Spyware: Background and Policy Issues for Congress*, by Patricia Moloney Figliola
- CRS Report R41975, *Illegal Internet Streaming of Copyrighted Content: Legislation in the 112th Congress*, by Brian T. Yeh
- CRS Report R42112, *Online Copyright Infringement and Counterfeiting: Legislation in the 112th Congress*, by Brian T. Yeh
- CRS Report R40599, *Identity Theft: Trends and Issues*, by Kristin M. Finklea
- CRS Report R41927, *The Interplay of Borders, Turf, Cyberspace, and Jurisdiction: Issues Confronting U.S. Law Enforcement*, by Kristin M. Finklea
- CRS Report RL34651, *Protection of Children Online: Federal and State Laws Addressing Cyberstalking, Cyberharassment, and Cyberbullying*, by Alison M. Smith
- CRS Report R42547, *Cybercrime: Conceptual Issues for Congress and U.S. Law Enforcement*, by Kristin M. Finklea and Catherine A. Theohary

Table 26. Selected Reports: Cybercrime/Cyberwar

| Title | Source | Date | Pages | Notes |
|---|--|-------------------|-------|---|
| APT1: Exposing One of China's Cyber Espionage Units http://intelreport.mandiant.com/Mandiant_APT1_Report.pdf | Mandiant | February 19, 2013 | 76 | The details analyzed during hundreds of investigations signal that the groups conducting these activities (computer security breaches around the world) are based primarily in China and that the Chinese government is aware of them. |
| Video demo of Chinese hacker activity http://intelreport.mandiant.com/ | Mandiant | February 19, 2013 | N/A | Video of APT1 attacker sessions and intrusion activities (5 minute video). |
| Cyberattacks Among Rivals: 2001-2011 (from the article, "The Fog of Cyberwar" by Brandon Variano and Ryan Maness (subscription required) http://www.foreignaffairs.com/cyberattacks-by-initiator-and-victim | Foreign Affairs | November 21, 2012 | N/A | A chart showing cyberattacks by initiator and victim, 2001-2011. |
| Emerging Cyber Threats Report 2013 http://www.gtsecuritysummit.com/pdf/2013ThreatsReport.pdf | Georgia Institute of Technology | November 14, 2012 | 9 | The year ahead will feature new and increasingly sophisticated means to capture and exploit user data, escalating battles over the control of online information and continuous threats to the U.S. supply chain from global sources. (From the annual Georgia Tech Cyber Security Summit 2012). |
| Proactive Defense for Evolving Cyber Threats http://prod.sandia.gov/techlib/access-control.cgi/2012/1210177.pdf | Sandia National Labs | November 1, 2012 | 98 | The project applied rigorous predictability-based analytics to two central and complementary aspects of the network defense problem—attack strategies of the adversaries and vulnerabilities of the defenders' systems—and used the results to develop a scientifically-grounded, practically-implementable methodology for designing proactive cyber defense systems. |
| Safeguarding Cyber-Security, Fighting in Cyberspace http://www.isn.ethz.ch/isn/Editorial-Plan/Dossiers/Detail/?lng=en&id=154059&contextid782=154059 | International Relations and Security Network (ISN) | October 22, 2012 | N/A | Looks at the Militarisation of Cyber Security as a Source of Global Tension, and makes the case that cyber-warfare is already an essential feature of many leading states' strategic calculations, followed by its opposite—i.e., one that believes the threat posed by cyber-warfare capabilities is woefully overstated. |
| Before We Knew It: An Empirical Study of Zero-Day Attacks In The Real World http://users.ece.cmu.edu/~tdumitra/public_documents/bilge12_zero_day.pdf | Symantec Research Labs | October 16, 2012 | 12 | The paper describes a method for automatically identifying zero-day attacks from field-gathered data that records when benign and malicious binaries are downloaded on 11 million real hosts around the world. Searching this data set for malicious files that exploit known vulnerabilities indicates which files appeared on the Internet before the corresponding vulnerabilities were disclosed. |

| Title | Source | Date | Pages | Notes |
|---|---|------------------|-------|---|
| ZeroAccess: We're Gonna Need a Bigger Planet http://www.f-secure.com/weblog/archives/00002428.html | F-Secure and Google Maps | October 15, 2012 | N/A | The idea of a network of malware-infected zombie computers rigged to do the bidding of criminals conjures up a frightening image on its own. A new visualization of the so-called ZeroAccess botnet shows how widespread such schemes can become. |
| Investigative Report on the U.S. National Security Issues Posed by Chinese Telecommunications Companies Huawei and ZTE http://intelligence.house.gov/press-release/investigative-report-us-national-security-issues-posed-chinese-telecommunications | House Permanent Select Committee on Intelligence | October 8, 2012 | 60 | The committee initiated this investigation in November 2011 to inquire into the counterintelligence and security threat posed by Chinese telecommunications companies doing business in the United States. |
| Federal Support for and Involvement in State and Local Fusion Centers http://www.hsgac.senate.gov/download/?id=49139e81-1dd7-4788-a3bb-d6e7d97dde04 | U. S. Senate Permanent Subcommittee on Investigations | October 3, 2012 | 141 | A two-year bipartisan investigation found that U.S. Department of Homeland Security efforts to engage state and local intelligence "fusion centers" has not yielded significant useful information to support federal counterterrorism intelligence efforts. In Section VI, "Fusion Centers Have Been Unable to Meaningfully Contribute to Federal Counterterrorism Efforts," Part G, "Fusion Centers May Have Hindered, Not Aided, Federal Counterterrorism Efforts," the report discusses the Russian "Cyberattack" in Illinois. |
| HoneyMap - Visualizing Worldwide Attacks in Real-Time http://www.honeynet.org/node/960 | The Honeynet Project | October 1, 2012 | N/A | The HoneyMap shows a real-time visualization of attacks against the Honeynet Project's sensors deployed around the world. |
| Manual on International Law Applicable to Cyber Warfare ("The Tallinn Manual") http://www.ccdcoe.org/249.html | NATO Cooperative Cyber Defence Centre of Excellence, Tallinn, Estonia | August 2012 | N/A | The Tallinn Manual is a nonbinding yet authoritative restatement of the law of armed conflict as it relates to cyberwar. It offers guidance to attackers, defenders, and legal experts on how cyberattacks can be classified as actions covered under the law, such as armed attacks. |
| Does Cybercrime Really Cost \$1 Trillion? http://www.propublica.org/article/does-cybercrime-really-cost-1-trillion | ProPublica | August 1, 2012 | N/A | In a news release from computer security firm McAfee to announce its 2009 report, "Unsecured Economies: Protecting Vital Information," the company estimated a trillion dollar global cost for cybercrime. The number does not appear in the report itself. McAfee's trillion-dollar estimate is questioned even by the three independent researchers from Purdue University whom McAfee credits with analyzing the raw data from which the estimate was derived. An examination of their origins by ProPublica has found new grounds to question the data and methods used to generate these numbers, which McAfee and Symantec say they stand behind. |

| Title | Source | Date | Pages | Notes |
|--|---|---------------|-------|--|
| Putting the “war” in cyberwar: Metaphor, analogy, and cybersecurity discourse in the United States http://firstmonday.org/htbin/cgiwrap/bin/ojs/index.php/fm/article/view/3848/3270 | First Monday | July 2, 2012 | N/A | This essay argues that current contradictory tendencies are unproductive and even potentially dangerous. It argues that the war metaphor and nuclear deterrence analogy are neither natural nor inevitable and that abandoning them would open up new possibilities for thinking more productively about the full spectrum of cyber security challenges, including the as-yet unrealized possibility of cyber war. |
| Information Security: Cyber Threats Facilitate Ability to Commit Economic Espionage http://www.gao.gov/products/GAO-12-876T | GAO | June 28, 2012 | 20 | This statement discusses (1) cyber threats facing the nation's systems, (2) reported cyber incidents and their impacts, (3) security controls and other techniques available for reducing risk, and (4) the responsibilities of key federal entities in support of protecting IP. |
| Measuring the Cost of Cybercrime http://weis2012.econinfosec.org/papers/Anderson_WEIS2012.pdf | 11 th Annual Workshop on the Economics of Information Security | June 25, 2012 | N/A | “For each of the main categories of cybercrime we set out what is and is not known of the direct costs, indirect costs and defence costs - both to the UK and to the world as a whole.” |
| Nodes and Codes: The Reality of Cyber Warfare http://www.dtic.mil/cgi-bin/GetTRDoc?AD=ADA567190&Location=U2&doc=GetTRDoc.pdf | US Army School of Advanced Military Studies, Command and General Staff | May 17, 2012 | 62 | Explores the reality of cyber warfare through the story of Stuxnet. Three case studies evaluate cyber policy, discourse, and procurement in the United States, Russia, and China before and after Stuxnet to illustrate their similar, yet unique, realities of cyber warfare. |
| The Impact of Cybercrime on Businesses http://www.checkpoint.com/products/downloads/whitepapers/ponemon-cybercrime-2012.pdf | Ponemon Institute | May 2012 | 21 | The study found that targeted attacks on businesses cost enterprises an average of \$214,000. The expenses are associated with forensic investigations, investments in technology, and brand recovery costs. |
| Proactive Policy Measures by Internet Service Providers against Botnets http://www.oecd-ilibrary.org/science-and-technology/proactive-policy-measures-by-internet-service-providers-against-botnets_5k98tq42t18w-en | Organisation for Economic Co-operation and Development | May 7, 2012 | 25 | This report analyzes initiatives in a number of countries through which end-users are notified by ISPs when their computer is identified as being compromised by malicious software and encouraged to take action to mitigate the problem. |
| Developing State Solutions to Business Identity Theft: Assistance, Prevention and Detection Efforts by Secretary of State Offices http://www.nass.org/index.php?option=com_docman&task=doc_download&gid=1257 | National Association of Secretaries of State | January 2012 | 23 | This white paper is the result of efforts by the 19-member NASS Business Identity Theft Task Force to develop policy guidelines and recommendations for state leaders dealing with identity fraud cases involving public business records. |

| Title | Source | Date | Pages | Notes |
|---|------------------------------|-------------------|-------|--|
| A Cyberworm that Knows No Boundaries http://www.rand.org/content/dam/rand/pubs/occasional_papers/2011/RAND_OP342.pdf | RAND | December 21, 2011 | 55 | Stuxnet-like worms pose a serious threat even to infrastructure and computer systems that are not connected to the Internet. However, defending against such attacks is an increasingly complex prospect. |
| Department of Defense Cyberspace Policy Report : A Report to Congress Pursuant to the National Defense Authorization Act for Fiscal Year 2011, Section 934 http://www.defense.gov/home/features/2011/0411_cyberstrategy/docs/NDAA%20Section%20934%20Report_For%20webpage.pdf | DOD | November 15, 2011 | 14 | From the report: "When warranted, we will respond to hostile attacks in cyberspace as we would to any other threat to our country. We reserve the right to use all necessary means - diplomatic, informational, military and economic - to defend our nation, our allies, our partners and our interests." |
| W32.Duqu: The Precursor to the Next Stuxnet http://www.symantec.com/connect/w32_duqu_precursor_next_stuxnet | Symantec | October 24, 2011 | N/A | On October 14, 2011, a research lab with strong international connections alerted Symantec to a sample that appeared to be very similar to Stuxnet, the malware which wreaked havoc in Iran's nuclear centrifuge farms last summer. The lab named the threat "Duqu" because it creates files with the file name prefix "~DQ". The research lab provided Symantec with samples recovered from computer systems located in Europe, as well as a detailed report with their initial findings, including analysis comparing the threat to Stuxnet. |
| Cyber War Will Not Take Place http://www.tandfonline.com/doi/abs/10.1080/01402390.2011.608939 | Journal of Strategic Studies | October 5, 2011 | 29 | The paper argues that cyber warfare has never taken place, is not currently taking place, and is unlikely to take place in the future. |
| Twenty Critical Security Controls for Effective Cyber Defense: Consensus Audit Guidelines (CAG) http://www.sans.org/critical-security-controls/ | SANS | October 3, 2011 | 77 | The 20 measures are intended to focus agencies' limited resources on plugging the most common attack vectors. |
| Revealed: Operation Shady RAT: an Investigation Of Targeted Intrusions Into 70+ Global Companies, Governments, and Non-Profit Organizations During the Last 5 Years http://www.mcafee.com/us/resources/white-papers/wp-operation-shady-rat.pdf | McAfee | August 2, 2011 | 14 | A cyber-espionage operation lasting many years penetrated 72 government and other organizations, most of them in the United States, and has copied everything from military secrets to industrial designs, according to technology security company McAfee. See page 4 for the types of compromised parties), page 5 for the geographic distribution of victim's country of origin, pages 7-9 for the types of victims, and pages 10-13 for the number of intrusions for 2007-2010. |

|--|---|-------------------|-------|--|
| USCYBERCOM and Cyber Security: Is a Comprehensive Strategy Possible? | Army War College | May 12, 2012 | 32 | Examine five aspects of USCYBERCOM: organization, command and control, computer network operations (CNO), synchronization, and resourcing. Identifies areas that currently present significant risk to USCYBERCOM's ability to create a strategy that can achieve success in its cyberspace operations. Recommends potential solutions that can increase the effectiveness of the USCYBERCOM strategy. |
| A Four-Day Dive Into Stuxnet's Heart http://www.wired.com/threatlevel/2010/12/a-four-day-dive-into-stuxnets-heart/ | Threat Level Blog (Wired) | December 27, 2010 | N/A | From the article, "It is a mark of the extreme oddity of the Stuxnet computer worm that Microsoft's Windows vulnerability team learned of it first from an obscure Belarusian security company that even they had never heard of." |
| Did Stuxnet Take Out 1,000 Centrifuges at the Natanz Enrichment Plant? Preliminary Assessment http://isis-online.org/isis-reports/detail/did-stuxnet-take-out-1000-centrifuges-at-the-natanz-enrichment-plant/ | Institute for Science and International Security | December 22, 2010 | 10 | This report indicates that commands in the Stuxnet code intended to increase the frequency of devices targeted by the malware exactly match several frequencies at which rotors in centrifuges at Iran's Natanz enrichment plant are designed to operate optimally or are at risk of breaking down and flying apart. |
| The Role of Internet Service Providers in Botnet Mitigation: an Empirical Analysis Bases on Spam Data http://citeseerx.ist.psu.edu/viewdoc/download?doi=10.1.1.165.2211&rep=rep1&type=pdf | Organisation for Economic Co-operation and Development (OECD) | November 12, 2010 | 68 | This working paper considers whether ISPs can be critical control points for botnet mitigation, how the number of infected machines varies across ISPs, and why. |
| Stuxnet Analysis http://www.enisa.europa.eu/media/press-releases/stuxnet-analysis | European Network and Information Security Agency | October 7, 2010 | N/A | EU cybersecurity agency warns that the Stuxnet malware is a game changer for critical information infrastructure protection; PLC controllers of SCADA systems infected with the worm might be programmed to establish destructive over/under pressure conditions by running pumps at different frequencies. |
| Proceedings of a Workshop on Deterring Cyberattacks: Informing Strategies and Developing Options for U.S. Policy http://www.nap.edu/catalog.php?record_id=12997#description | National Research Council | October 5, 2010 | 400 | At the request of the Office of the Director of National Intelligence, the National Research Council undertook a two-phase project aimed to foster a broad, multidisciplinary examination of strategies for deterring cyberattacks on the United States and of the possible utility of these strategies for the U.S. government. |
| Untangling Attribution: Moving to Accountability in Cyberspace [Testimony] http://i.cfr.org/content/publications/attachments/Knake%20-Testimony%20071510.pdf | Council on Foreign Relations | July 15, 2010 | 14 | Robert K. Knake's testimony before the House Committee on Science and Technology on the role of attack attribution in preventing cyber attacks and how attribution technologies can affect the anonymity and the privacy of Internet users. |

| Administration Strategy for Mitigating the Theft of U.S. Trade Secrets http://www.whitehouse.gov/sites/default/files/omb/IPEC/admin_strategy_on_mitigating_the_theft_of_u.s._trade_secrets.pdf | White House | February 20, 2013 | 141 | “First, we will increase our diplomatic engagement...Second, we will support industry-led efforts to develop best practices to protect trade secrets and encourage companies to share with each other best practices that can mitigate the risk of trade secret theft... Third, DOJ will continue to make the investigation and prosecution of trade secret theft by foreign competitors and foreign governments a top priority... Fourth, President Obama recently signed two pieces of legislation that will improve enforcement against trade secret theft...Lastly, we will increase public awareness of the threats and risks to the U.S. economy posed by trade secret theft.” |
| APT1: Exposing One of China's Cyber Espionage Units http://intelreport.mandiant.com/Mandiant_APT1_Report.pdf | Mandiant | February 19, 2013 | 76 | The details analyzed during hundreds of investigations signal that the groups conducting these activities (computer security breaches around the world) are based primarily in China and that the Chinese government is aware of them. |
| Video demo of Chinese hacker activity http://intelreport.mandiant.com/ | Mandiant | February 19, 2013 | N/A | Video of APT1 attacker sessions and intrusion activities (5 minute video). |

| <p>Australia: Telecommunications data retention—an overview http://parlinfo.aph.gov.au/parlInfo/download/library/prspub/1998792/upload_binary/1998792.pdf;fileType=application%2Fpdf</p> | <p>Parliamentary Library of Australia</p> | <p>October 24, 2012</p> | <p>32</p> | <p>In July 2012, the Commonwealth Attorney-General's Department released a Discussion Paper, Equipping Australia against emerging and evolving threats, on the proposed national security reforms. ... Of the 18 primary proposals and the 41 individual reforms that they comprise, the suggestion that carriage service providers (CSPs) be required to routinely retain certain information associated with every Australian's use of the Internet and phone services for a period of up to two years ('data retention') is the issue that seems to have attracted the most attention.</p> |
| <p>More Than Meets the Eye: Clandestine Funding, Cutting-Edge Technology and China's Cyber Research & Development Program http://www.osti.gov/bridge/servlets/purl/1055833/</p> | <p>Lawrence Livermore National Laboratory</p> | <p>October 23, 2012</p> | <p>17</p> | <p>Analyzes how the Chinese leadership views information technology research and development (R&D), as well as the role cyber R&D plays in China's various strategic development plans. Explores the organizational structure of China's cyber R&D base. Concludes with a projection of how China might field new cyber capabilities for intelligence platforms, advanced weapons systems, and systems designed to support asymmetric warfare operations.</p> |
| <p>Investigative Report on the U.S. National Security Issues Posed by Chinese Telecommunications Companies Huawei and ZTE http://intelligence.house.gov/press-release/investigative-report-us-national-security-issues-posed-chinese-telecommunications</p> | <p>House Permanent Select Committee on Intelligence</p> | <p>October 8, 2012</p> | <p>60</p> | <p>The committee initiated this investigation in November 2011 to inquire into the counterintelligence and security threat posed by Chinese telecommunications companies doing business in the United States.</p> |
| <p>Manual on International Law Applicable to Cyber Warfare ("The Tallinn Manual") http://www.ccdcoe.org/249.html</p> | <p>NATO Cooperative Cyber Defence Centre of Excellence, Tallinn, Estonia</p> | <p>August 2012</p> | <p>N/A</p> | <p>The Tallinn Manual is a nonbinding yet authoritative restatement of the law of armed conflict as it relates to cyberwar. It offers attackers, defenders, and legal experts guidance on how cyberattacks can be classified as actions covered under the law, such as armed attacks.</p> |

|---|---|------------------|-------|--|
| Bilateral Discussions on Cooperation in Cybersecurity http://www.cicir.ac.cn/chinese/newsView.aspx?nid=3878 | China Institute of Contemporary International Relations and the Center for Strategic and International Studies (CSIS) | June 2012 | N/A | (Scroll down for English). Since 2009, CSIS and CICIR have held six formal meetings on cybersecurity (accompanied by several informal discussions), called "Sino-U.S. Cybersecurity Dialogue." The meetings have been attended by a broad range of U.S. and Chinese officials and scholars responsible for cybersecurity issues. The goals of the discussions have been to reduce misperceptions and to increase transparency of both countries' authorities and understanding on how each country approaches cybersecurity, and to identify areas of potential cooperation. |
| Five Years after Estonia's Cyber Attacks: Lessons Learned for NATO? http://www.ndc.nato.int/download/downloads.php?icode=334 | NATO | May 2012 | 8 | In April 2007 a series of cyber attacks targeted Estonian information systems and telecommunication networks. Lasting 22 days, the attacks were directed at a range of servers (web, email, DNS) and routers. The 2007 attacks did not damage much of the Estonian information technology infrastructure. However, the attacks were a true wake-up call for NATO, offering a practical demonstration that cyber attacks could now cripple an entire nation dependent on IT networks. |
| Cyber-security: The Vexed Question of Global Rules: An Independent Report on Cyber-Preparedness Around the World http://www.mcafee.com/us/resources/reports/rp-sda-cyber-security.pdf?cid=WBB048 | McAfee | February 1, 2012 | 108 | Forty-five percent of legislators and cybersecurity experts representing 27 countries think cybersecurity is just as important as border security. The authors surveyed 80 professionals from business, academia and government to gauge worldwide opinions of cybersecurity. |
| Cyber Power Index http://www.cyberhub.com/CyberPowerIndex | Booz Allen Hamilton and the Economist Intelligence Unit | January 15, 2012 | N/A | The index of developing countries' ability to withstand cyber attacks and build strong digital economies, rates the countries on their legal and regulatory frameworks; economic and social issues; technology infrastructure; and industry. The index puts the United States in the No. 2 spot, and the UK in No. 1. |

|--|--|-------------------|-------|---|
| National Initiative for Cybersecurity Careers and Studies (NICCS) http://niccs.us-cert.gov/ | U.S. Department of Homeland Security | February 21, 2013 | N/A | NICCS is an online resource for cybersecurity career, education, and training information. It is a partnership between DHS, the National Institute of Standards and Technology, the Office of the Director of National Intelligence, the Department of Defense, the Department of Education, the National Science Foundation, and the Office of Personnel Management. |
| Michigan Cyber Range http://www.merit.edu/cyberrange/ | Partnership between the state of Michigan, Merit Network, federal and local governments, colleges and universities, and the private sector | November 12, 2012 | N/A | Enables individuals and organizations to develop detection and reaction skills through simulations and exercises. |
| CyberSkills Task Force Report https://www.hsdl.org/hslog/?q=node/7934 | U.S. Department of Homeland Security | October 1, 2012 | 41 | DHS's Task Force on CyberSkills proposes far-reaching improvements to enable DHS to recruit and retain the cybersecurity talent it needs. |
| Cyber Security Test Bed: Summary and Evaluation Results http://sites.duke.edu/ihss/files/2011/12/Cyber-Security-Test-Bed_Final-Report_Rowe.pdf | Institute for Homeland Security Solutions | October 2012 | 89 | The Cyber Test Bed project was a case study analysis of how a set of interventions, including threat analysis, best practices sharing, and executive and staff training events, over the course of one year, would impact a group of nine small and mid-size businesses in North Carolina. Pre- and post-Test Bed interviews were conducted with company officials to establish a baseline and evaluate the impact of the Test Bed experience. After the Cyber Test Bed experience, decision makers at these companies indicated an increase in their perceptions of the risk of cyber attacks and an increase in their knowledge of possible solution. |

| <p>Cybersecurity Human Capital: Initiatives Need Better Planning and Coordination</p> <p>http://www.gao.gov/products/GAO-12-8</p> | <p>General Accountability Office (GAO)</p> | <p>November 29, 2011</p> | <p>86</p> | <p>To ensure that government-wide cybersecurity workforce initiatives are better coordinated and planned, and to better assist federal agencies in defining roles, responsibilities, skills, and competencies for their workforce, the Secretary of Commerce, Director of the Office of Management and Budget, Director of the Office of Personnel Management, and Secretary of Homeland Security should collaborate through the NICE initiative to develop and finalize detailed plans allowing agency accountability, measurement of progress, and determination of resources to accomplish agreed-upon activities.</p> |
| <p>NICE Cybersecurity Workforce Framework</p> <p>http://www.nist.gov/manuscript-publication-search.cfm?pub_id=909505</p> | <p>National Initiative for Cybersecurity Education (NICE)</p> | <p>November 21, 2011</p> | <p>35</p> | <p>The adoption of cloud computing into the federal government and its implementation depend upon a variety of technical and non-technical factors. A fundamental reference point, based on the NIST definition of cloud computing, is needed to describe an overall framework that can be used government-wide. This document presents the NIST Cloud Computing Reference Architecture (RA) and Taxonomy (Tax) that will accurately communicate the components and offerings of cloud computing.</p> |
| <p>2011 State of Cyberethics, Cybersafety and Cybersecurity Curriculum in the U.S. Survey</p> <p>http://www.staysafeonline.org/sites/default/files/resource_documents/2011%20National%20K-12%20Study%20Final_0.pdf</p> | <p>National Cyber Security Alliance and Microsoft</p> | <p>May 13, 2011</p> | <p>16</p> | <p>This year's survey further explores the perceptions and practices of U.S. teachers, school administrators and technology coordinators in regards to cyberethics, cybersafety, and cybersecurity education. This year's survey finds that young people still are not receiving adequate training and that teachers are ill-prepared to teach the subjects due, in large part, to lack of professional development.</p> |
