

Nat. Inst. of Child Health + Human Dev.  
Center for Research on Mothers +  
Children

Pregnancy and Infancy Branch  
Fetal <sup>electroencephalographic</sup> monitoring — wanted to —  
~~investigate~~

1972 — <sup>Quart</sup> Maternal + Child Health (Phases of  
yes <sup>percentage</sup> ~~the following~~)  
No study on babies taken by <sup>registered</sup> ~~registered~~

Practically could do such study  
under present authority if  
Institute wished to proceed

5 hosp. — 1.8 million/yr X 7 years = 12.6 million  
Follow-up on babies — 11.0 million

Child - is interested into research

Perinatal - <sup>ed. and</sup> NIDED's <sup>isotropic</sup>

50 thousands — 400 million

started 1957 — 1968

cellular pathology — sudden death

symptoms <sup>statistic</sup> came from  
this study
