

**Functions of the  
International Bureau**

## IX.2

### Functions of the International Bureau

1. In addition to its function as receiving Office for applicants from all PCT Contracting States (since 1 January 1994), the International Bureau handles processing functions in respect of all international applications filed with all receiving Offices worldwide as detailed below.
2. There are five major procedural processing functions which are carried out by the International Bureau:
  - (i) receipt of the record copy;
  - (ii) receipt of amendments to the claims;
  - (iii) international publication;
  - (iv) communication of the application to the designated Offices; and
  - (v) communication of the international preliminary examination report to the elected Offices.
3. Processing by the International Bureau begins when it receives the record copy of the international application from the receiving Office.
4. The receipt of the record copy is notified by the International Bureau (Form PCT/IB/301) to the applicant, the receiving Office, the International Searching Authority and designated Offices. The International Bureau carries out a further check of the formal requirements of Articles 11 and 14 (Rules 28.1 and 29.3).
5. The International Bureau is the recipient of any amendment under Article 19 to the claims of the international application. The applicant has the right to amend the claims of the international application under Article 19 after receipt of the international search report. It may be desirable to amend or limit the claims at that stage if the international search report refers to a document which clearly destroys the novelty of part of the claims in the international application. By one amendment sent to the International Bureau, the applicant may amend the claims with effect for all designated Offices. Such amendment must be filed with the International Bureau within the applicable time limit. The amended claims will then be included in the publication of the international application and serve as the basis for any provisional protection offered by designated States.
6. The International Bureau is responsible for the international publication of the international application (Article 21).
7. The International Bureau is also responsible for the communication of the international application to the designated Offices (Article 20). This communication is effected at the same time as the international publication of the application. The applicant is informed of that communication (Form PCT/IB/308).
8. The International Bureau uses the pamphlet produced for the international publication for effecting that communication (Rule 47.2).
9. Under the Chapter II procedure, the International Bureau is responsible for the communication of the international preliminary examination report to the elected Offices.
10. Where required, the International Bureau translates the international preliminary examination report into English and transmits a copy of that translation to the interested elected Offices and to the applicant.

## ATTENTION

The applicant should carefully check the data appearing in this Notification. In case of any discrepancy between these data and the indications in the international application, the applicant should immediately inform the International Bureau.

In addition, the applicant's attention is drawn to the information contained in the Annex, relating to:

- time limits for entry into the national phase;  
 confirmation of precautionary designations;  
 requirements regarding priority documents.

A copy of this Notification is being sent to the receiving Office and to the International Searching Authority.

Facsimile No. (41-22) 740.14.35	Telephone No. (41-22) 730.91.11

Form PCT/IB/301 (September 1995)

**INFORMATION ON TIME LIMITS FOR ENTERING THE NATIONAL PHASE**

The applicant is reminded that the "national phase" must be entered before each of the designated Offices indicated in the Notification of Receipt of Record Copy (Form PCT/IB/301) by paying national fees and furnishing translations, as prescribed by the applicable national laws.

The time limit for performing these procedural acts is **20 MONTHS** from the priority date or, for those designated States which the applicant elects in a demand for international preliminary examination or in a later election, **30 MONTHS** from the priority date, provided that the election is made before the expiry of 19 months from the priority date. Some designated (or elected) Offices have fixed time limits which expire even later than 20 or 30 months from the priority date. In other Offices an extension of time or grace period, in some cases upon payment of an additional fee, is available.

In addition to these procedural acts, the applicant may also have to comply with other special requirements applicable in certain Offices. It is the applicant's responsibility to ensure that the necessary steps to enter the national phase are taken in a timely fashion. Most designated Offices do not issue reminders to applicants in connection with the entry into the national phase.

For detailed information about the procedural acts to be performed to enter the national phase before each designated Office, the applicable time limits and possible extensions of time or grace periods, and any other requirements, see the relevant Chapters of Volume II of the PCT Applicant's Guide. Information about the requirements for filing a demand for international preliminary examination is set out in Chapter IX of Volume I of the PCT Applicant's Guide.

Note that since ES and GR are not bound by PCT Chapter II (which provides for the international preliminary examination procedure), those States cannot be elected in a demand for international preliminary examination. In the case of the designation of ES for a national patent, the applicant must thus always enter the national phase before the national Office of that State before the expiry of 20 months from the priority date. In the case of the designation of ES or GR for a European patent, however, the 31-month time limit applies in respect of those designations if at least one other State designated for a European patent is also elected within the 19-month period.\*

Note also that only an applicant who is a national or resident of a PCT Contracting State which is bound by Chapter II has the right to file a demand for international preliminary examination.

- \* CH and LI became bound by PCT Chapter II on 1 September 1995. Therefore, CH and LI may be elected in a demand or a later election filed on or after that date, regardless of the filing date of the international application. (See 2nd paragraph above.)

**CONFIRMATION OF PRECAUTIONARY DESIGNATIONS**

This notification lists only specific designations made under Rule 4.9(a) in the request. It is important to check that these designations are correct. Errors in designations can be corrected where precautionary designations have been made under Rule 4.9(b). The applicant is hereby reminded that any precautionary designations may be confirmed according to Rule 4.9(c) before the expiration of 15 months from the priority date. If it is not confirmed, it will automatically be regarded as withdrawn by the applicant. There will be no reminder and no invitation. Confirmation of a designation consists of the filing of a notice specifying the designated State concerned (with an indication of the kind of protection or treatment desired) and the payment of the designation and confirmation fees. Confirmation must reach the receiving Office within the 15-month time limit.

**REQUIREMENTS REGARDING PRIORITY DOCUMENTS**

For applicants who have not yet complied with the requirements regarding priority documents the following is recalled.

Where the priority of an earlier national (i.e., national or regional) application is claimed, the applicant must submit a copy of the said national application, certified by the authority with which it was filed ("the priority document") to the receiving Office (which will transmit it to the International Bureau) or directly to the International Bureau, before the expiration of 16 months from the priority date (Rule 17.1).

Where the priority document is issued by the receiving Office, the applicant may, instead of submitting the priority document, request the receiving Office to prepare and transmit the priority document to the International Bureau. Such a request must be made before the expiration of the 16-month time limit.

It is recalled that, where several priorities are claimed, the priority date to be considered for the purposes of computing the 16-month time limit is the filing date of the earliest application whose priority is claimed.

If the priority document concerned is not submitted to the International Bureau before the expiration of the 16-month time limit, or if the request to the receiving Office to transmit the priority document has not been made (and the corresponding fee, if any, paid) before the expiration of this time limit, any designated State may disregard the priority claim.

**REMINDER REGARDING CHAPTER II (Article 31(2)(a) and Rule 54.2)**

If the applicant wishes to postpone entry into the national phase until 30 months (or later in some Offices) from the priority date, a demand for international preliminary examination must be filed with the competent International Preliminary Examining Authority before the expiration of 19 months from the priority date.

It is the applicant's sole responsibility to monitor the 19-month time limit.

Note that only an applicant who is a national or resident of a PCT Contracting State which is bound by Chapter II has the right to file a demand for international preliminary examination.

**REMINDER REGARDING ENTRY INTO THE NATIONAL PHASE (Article 22 or 39(1))**

If the applicant wishes to proceed with the international application in the national phase, he must, within 20 months or 30 months, or later in some Offices, perform the acts referred to therein before each designated or elected Office.

For further important information on the time limits and acts to be performed for entering the national phase, see the Annex to Form PCT/IB/301 (Notification of Receipt of Record Copy) and Volume II of the PCT Applicant's Guide.

### International Bureau as receiving Office

1. The International Bureau has been available as receiving Office for nationals and residents of all PCT Contracting States (Rule 19.1(a)(iii)) since 1 January 1994.
2. Compliance with national security provisions is applicant's responsibility.
3. The language of filing may be any of the 7 publication languages provided that a competent ISA will accept the language (Chinese, English, French, German, Japanese, Russian or Spanish).
4. The competence of ISAs and IPEAs will be determined as if the international application had been filed with a competent national or regional Office (Rules 35.3(a) and 59.1(b)). Choice of ISA must be indicated in the request (Rules 4.1(b)(vi) and 4.14bis).
5. Agent will have the right to practice before the International Bureau if qualified to act before a competent national or regional Office (Rule 83.1bis).

### Transmittal to International Bureau of international application filed with a "non-competent" Office (Rule 19.4)

1. If an international application is filed by an applicant from a PCT Contracting State with an Office which is not competent as receiving Office because of the nationality or residence of the applicant,
  - that Office will transmit the application to the International Bureau as competent receiving Office provided that
    - any applicable national security requirements are met,
    - a fee, equal to the transmittal fee, is paid (not all Offices will require such a fee);
  - the international filing date will be the date of receipt by the "non-competent" Office provided that
    - the minimum requirements for according an international filing date are met.
2. All PCT filing fees will be payable to the International Bureau in Swiss Francs or US Dollars.
3. Any fees paid to the non-competent Office, other than a fee equal to the transmittal fee (if required), will be refunded.

**International Publication**

### International publication (Article 21 and Rule 48)

- Shortly after 18 months from priority date
- Pamphlet (Chinese, English, French, German, Japanese, Russian, Spanish)
  - Contains:
    - Front page with bibliographic data and abstract
    - Description, claims, and drawings
    - Any amendments to the claims (and any statement) under Article 19
    - International search report
  - Languages: abstract, title and search report always in English
  - Communicated to DOs by IB
- PCT Gazette (English, French)
- United States reservation: If only the US is designated the international publication is postponed until after issuance of US patent (Article 64(3)(b))
- Notice of communication of the international application sent by IB to DOs serves as conclusive evidence of receipt of the application by DOs (Rule 47, Form PCT/IB/308)
- Applicant should monitor the international publication and the time limits for entry into the national phase

### Effects of international publication (Article 29)

- International publication has, in Contracting States with compulsory publication of unexamined national applications, the same effects as the publication under the national law:
  - international publication entitles PCT applicants to provisional protection in the designated States, if such protection is granted for published national applications
- Such protection may be made conditional
  - on the furnishing of a translation (which may be of the claims only)
  - on receipt by the designated Office of a copy of the international application as published under the PCT, and/or
  - in the case of early publication under Article 21(2)(b), on the expiration of 18 months from the priority date
- For further information on the specific requirements of a given Office, see the *PCT Applicant's Guide*, Vol I, Annexes B1 and B2

### Publication Functions of the International Bureau

1. The International Bureau is responsible for the international publication of the international application (Article 21). This publication takes place promptly after the expiration of 18 months from the priority date. Consequently, where an international application claims the priority of an earlier application and is filed towards the end of the priority year, there are usually not much more than six months between the filing of the international application and the publication date. Publication may take place earlier upon the express request of the applicant.
2. The international publication contains the full text of the international application as filed by the applicant. However, the request form itself is not published but is replaced by a title page containing the essential bibliographic data of the international application taken from the request form. The international publication also includes the international search report and any amendments of the claims filed by the applicant under Article 19. The publication of the international application is effected in the form of a pamphlet.
3. The pamphlet is published in the language of the international application, if that application was filed in Chinese, English, French, German, Japanese, Russian or Spanish. Where the publication is not in English, an English translation of the title of the invention, the abstract and the international search report is included in the pamphlet.
4. If the international application was filed in a language other than Chinese, English, French, German, Japanese, Russian or Spanish, the pamphlet is published in an English translation prepared under the responsibility of the International Searching Authority.
5. The legal effect of the international publication depends on the national law of the designated State. Where under a national law "provisional protection" is given to national applications upon publication, the same protection must generally be given to published international applications.
6. The pamphlet is made publicly available on the same day that a notice relating to that publication is published in the *PCT Gazette*. The *PCT Gazette* notice contains the same information as the title page of the pamphlet.
7. The International Bureau also publishes the *PCT Gazette*. The *Gazette* is currently published every week. It contains not only notices and indexes relating to the publication of individual international applications, but also other general information concerning the PCT.
8. The International Bureau is also responsible for the communication of the international application to the designated Offices (Article 20). This communication is effected at the same time as the international publication of the application. The applicant is informed of that communication (Form PCT/IB/308).
9. The International Bureau uses the pamphlet produced for international publication to effect communication of the international application to the designated Offices (Rule 47.2).

### Frequency of international publication

International publication (PCT pamphlets and *PCT Gazette*) takes place every Thursday, except where that Thursday is a day on which the International Bureau is not open for official business, for example, Ascension Day or the Thursday that follows the first Sunday of September and certain Thursdays in the Christmas/New Year period.

In such cases, inquire at the International Bureau as to what will be the publication date (possibly, but not always, the preceding Wednesday).

### Technical preparations for international publication

1. The technical preparations for international publication are normally completed 15 calendar days before the actual publication date.

For example: if the publication date is: 25 January 1996,  
technical preparations are completed on 10 January 1996.

Consequently, any document that reaches the International Bureau before 10 January 1996, is still taken into account for international publication (for example, change of name or address, amendment of the claims under Article 19, withdrawal of the international application or of a designation or of a priority claim).

2. Technical preparations may be completed more than 15 days before the publication date where that publication date is not the "usual" Thursday because the International Bureau is not open for business (see above) or where there are a number of official holidays falling within that 15-day period.

### **Withdrawal of international application to prevent publication (Rule 90bis.1(c))**

- Applicant can prevent international publication by withdrawing the international application
  - provided that the notice of withdrawal reaches the IB before the completion of technical preparations for that publication
- The notice of withdrawal may state that the withdrawal is to be effective only on the condition that the international publication can be prevented

In such a case the withdrawal is not effective if the condition on which it was made cannot be met - that is, if the technical preparations for international publication have already been completed

## SECTION I

## PUBLISHED INTERNATIONAL APPLICATIONS

International Publication Numbers  
WO 96/00001 to WO 96/00495

GUIDANCE NOTES ON CODES, BIBLIOGRAPHIC DATA AND INDICATIONS IN  
THE ENTRIES IN SECTION I (AND ON THE FRONT PAGES OF CORRESPONDING  
PAMPHLETS PUBLISHING INTERNATIONAL APPLICATIONS)

1. The following codes, based on WIPO Standard ST.16, are indicated in the upper frame of each entry (and each front page) to identify the kind of document to which the pamphlet relates:

A1—publication of the international application with the international search report

A2—publication of the international application without the international search report

A3—subsequent publication of the international search report together with a revised version of the front page of the pamphlet.

2. Only applicable items of bibliographic data are indicated. The codes relating to the items of bibliographic data are INID Codes as specified in WIPO Standard ST.9. In addition, the country of which each applicant is a national and the country of which each applicant is a resident is indicated by the relevant country codes separated by an oblique stroke and enclosed within square brackets following the name of the applicant (for example "[DK/SE]" following a name indicates that the person named is a national of Denmark and a resident of Sweden).

3. Other indications as to the contents of the pamphlets are:

*Indications relevant to the international search report*

(1) "Published with international search report" (where the pamphlet includes that report).

(2) "Published with declaration under Article 17(2)(a)" (where the pamphlet includes, instead of an international search report, a declaration that no international search report will be established).

(3) "Published without international search report and to be republished upon receipt of that report" (where the pamphlet does not include that report because, for example, where early publication is requested, it is not available but will be published later).

One of these indications will appear in each entry in Section I (and the corresponding front page); the application of the other two is thereby automatically excluded.

*Indications relevant to amendment of the claims*

(4) "Published with amended claims [and statement]" (where the pamphlet includes (as well as the claims as filed) the claims as amended under Article 19 or a specification of the amendments: the words enclosed within square brackets are included where the pamphlet also includes a statement by the applicant explaining the amendments and/or indicating any impact such amendments might have on the description and the drawings).

(5) "Published before the expiration of the time limit for amending the claims and to be republished in the event of the receipt of amendments" (where the applicant has not declared that he will not amend the claims and the time limit under Article 19(1) has not expired before publication).

The absence of a reference in indication (4) above to a statement relating to amended claims indicates that no such statement has been filed with the amendments. The absence of the above-mentioned indications (4) and (5) means that either no amendments were filed before the expiration of the time limit under Article 19(1) or the applicant has declared that he will not amend the claims.

DESIGNATED (OR ELECTED) OFFICES****Eurasian Patent Organization**

A new intergovernmental organization, the **Eurasian Patent Organization**, has been established under the Eurasian Patent Convention which was done in Moscow on 9 September 1994 and which constitutes a regional patent treaty within the meaning of PCT Article 45(1). With effect from 1 January 1996, all PCT Contracting States which are also party to the Eurasian Patent Convention can be designated either for a national patent or a Eurasian patent, or both a national patent and a Eurasian patent. It is not possible to designate only some of the Contracting States of the Eurasian Patent Convention for a Eurasian patent, since a Eurasian patent can only be granted for all Contracting States of the Eurasian Patent Convention. (States can be separately excluded from protection under the Eurasian patent by way of subsequent non-payment of annual fees.)

General information on the **Eurasian Patent Organization**, as well as information on the requirements of the **Eurasian Patent Office** as receiving Office and as designated (or elected) Office is given in Annexes B2(EA), C(EA) and Summary (EA), published in the special issue of the PCT Gazette No. 01/1996 on the same date as this PCT Gazette.

(57) Abstract

The invention concerns a thermal safety fitting in which the closure motion of the obturator is longitudinal with respect to the obturator seat. The aim is to avoid lateral excursions of the obturator, while keeping manufacturing costs and structural size as low as possible. The obturator (12) is held in the open position in the housing (1) on the longitudinal axis of the obturator seat (28) by means of an approximately U-shaped element (30). The two arms (9) of the U-shaped element (30) are located in the vicinity of a reduced-diameter section (17) of the obturator (12). The part (13) of the U-shaped element (30) joining the two arms (9) rests against a thermosolder (14). If the thermosolder (14) melts, the arms (9) no longer remain in the reduced-diameter section (17) owing to the change in the position of the U-shaped element (30), and the obturator (12) thus moves into the closed position under the action of a closing spring (24).

(57) Zusammenfassung

Eine thermische Armaturensicherung wobei die Schliessbewegung des Schliesskörpers axial zum Sitz erfolgt. Eine seitliche Auslenkung des Schliesskörpers soll dabei vermieden werden. Dabei sind der Herstellungsaufwand und die Baugrösse so gering wie möglich zu halten. Ein Schliesskörper (12) wird im Gehäuse (1) in axialer Verlängerung eines im Gehäuse (1) befindlichen Sitzes (28) durch ein etwa U-förmig gebogenes Formteil (30) in der Offenstellung gehalten. Die beiden Schenkel (9) des Formteiles (30) befinden sich dabei im Bereich einer Einschnürung (17) des Schliesskörpers (12). Der die beiden Schenkel (9) verbindende Teil (13) des Formteiles (30) stützt sich desweiteren an einem Thermolot (14) ab. Beim Wegschmelzen des Thermolotes (14) befinden sich die Schenkel (9) auf Grund der Lageänderung des Formteiles (30) nicht mehr in der Einschnürung (17), so dass der Schliesskörper (12) unter der Einwirkung einer Schliessfeder (24) seine Schliessstellung einnimmt.

**Chapter XI**  
**Filing of Demand...**

**Filing of Demand for International  
Preliminary Examination**

## **International Preliminary Examination**

- **Is an optional process;**
- **Defers entry into the national phase until at least 30 months from the priority date if filed within 19 months from the priority date; and**
- **Provides applicant with a preliminary, non-binding opinion as to the novelty, inventive step and industrial applicability of the claimed invention.**

06 Feb 96

## **The Demand**

- **Must be filed directly with a competent International Preliminary Examining Authority (IPEA); and**
- **Must elect at least one designated State bound by Chapter II.**

06 Feb 96

## **Who may file a demand? (Rule 54)**

- **Any applicant**
  - **who is a national or resident of a PCT Contracting State bound by Chapter II and**
  - **whose international application was filed with a receiving Office of or acting for a Contracting State bound by Chapter II.**

## **If there are two or more applicants**

- **It is sufficient that**
  - **at least one of the applicants filing the demand is a resident or national of a Contracting State bound by Chapter II and**
  - **the international application was filed with a receiving Office of or acting for a Contracting State bound by Chapter II.**

## Amendments

- Applicant has the opportunity to amend the description, claims and drawings under Article 34 before entering the national phase.

06 Feb 96

## The international preliminary examination procedure

- Is confidential.
- Note that a listing is published in the PCT Gazette of each demand filed including a list of those States not elected.

06 Feb 96

## **Who must sign the demand? (Rule 53.8)**

- **Only the persons indicated as applicants for the States elected in the demand; or**
- **If these applicants have appointed an agent, that agent can sign.**
- **If there is no agent, the demand must be signed**
  - **by all the applicants or**
  - **by the common representative .**

## **Lack of signature**

- **Where there are two or more applicants for an international application electing the US and an applicant/inventor is unavailable or unwilling to sign the demand, the procedures set forth in Rules 53.8(b) and 4.15(b) apply.**

## **When should a demand be filed?**

- **Prior to the expiration of 19 months from the priority date in order to delay national phase from 20 to 30 months from the priority date.**
- **Filing of the demand is permitted at any time during the international phase.**

## **The demand must be made on a printed form or computer-generated form.**

- **The demand (Form PCT/IPEA/401) available**
  - **free of charge from the receiving Office and the International Bureau of WIPO;**
  - **on the USPTO world wide web site via the Internet.**

## **Computer-generated demand**

- **Layout and contents must correspond to those of the printed form (no boxes may be omitted).**
- **Slight adjustments are permitted.**
- **Any text printed in italics may be omitted.**
- **See Rules 53.1(a) and section 102(h) and (i) of the Administrative Instructions for further details.**

## **Defects which cannot be corrected without affecting the date of demand**

- **Demand not filed by eligible applicant (Rule 54);**
- **Filing date of the demand after expiration of 19 months from the priority date;**
- **Filing made with non-competent IPEA (Rule 59);**
- **No election (Rule 60.1);**
- **Demand did not permit identification of international application (Rule 60.1).**

## **Solution**

- **Enter the national phase within 20 months from the priority date.**

06 Feb 98

## **Defects which can be corrected without adverse consequences**

- **Formal defects, lack of signature (Rule 59);**
- **Missing or incomplete payment of fees (Rules 57.4 and 58.2).**

06 Feb 98

## In addition

- **Rectification of obvious errors can be made (Rule 91);**
- **Review by and opportunity to correct before the designated or elected Offices (Articles 25, 26 and 39(3)).**
