of inventor)

Dear Sir:

In accordance with the agreement between Research Corporation and The University of Rochester dated 195 , under which Research Corporation handles the inventions and patents made by the members of the University's faculty, and through its management, introduces them into public use, the University has advised us that your invention described as , is to be patented and developed by us under that agreement, in furtherance of the University's regular patent policy.

The specific terms of the agreement with The University of Rochester are available to you through the University. Briefly, they provide that patent applications or inventions shall be assigned to Research Corporation by the inventor and that the patent prosecution and introduction into use shall be taken care of by us at our expense. From any income that may be derived from the patent, before deduction of any expenses, the agreement provides that there shall be paid by us to the inventor, his heirs, assigns and personal representatives, a percentage of that income which is established in each case by the University. In the case of your invention the University has informed us that this figure should be per cent. Payments of this amount and reports as to the progress of the invention will be made to you on March 15 of each year.

You might be interested in knowing that the balance of any income is, in general, divided on a fifty-fifty basis between the University and Research Corporation. The amount remaining with Research Corporation after payment of expenses is used for the general purposes of our charter for the support of technical and scientific investigation and research in educational institutions through our grants-in-aid program. A booklet that is descriptive of Research Corporation's activities is enclosed for your information.

There is attached to this letter in duplicate a standard form of assignment, and if you have no further questions concerning the matter, it would be appreciated if you would:

- 1) Sign the enclosed copy of this letter and return it to us; and
- 2) Sign the enclosed form of assignment, swear to it before a notary public, and return one copy
