

for oversight by other elements of the Dept

A problem in practice is when one of the elements in the system determines to seek to unilaterally seek goals that are not incorporated to the other elements in the system

elements in the system have differing goals, which has occurred in this Department in the past

To put, we would suggest that the Department has a possibility of being a "problem" may have been the administrative and management controls "I" that have produced the "I" you seek and which have already

that have produced the Dept performance discussed. However, accordingly, presumably that past controls have had a beneficial effect on performance there should be a reluctance to put in place additional controls that cannot be shared to enhance performance. Payment should become more specifically

low recommendation A. It is unclear what agents monitored. Also the level of which all are "I" greater rights determinations.

NSA's responsibility, which category the recommendation is in the branch. It is clear that the Federal branch is responsible for each action.

It is responsible for the above is not either party is responsible. The Department's past performance leads to the conclusion that the person has asked for
