President's Message

(Continued from page 1)

well worthwhile if they result in just one discovery—another “laser” or recombinant DNA technique for example—that helps invigorate our industrial base.

Research Corporation's Grants Program has successfully targeted areas crucial to the advancement of science: assistance for younger investigators who need support to initiate independent research projects, and help for seasoned faculty scientists who seek aid to do particularly speculative work, or to shift to entirely new fields. The foundation's other area of emphasis is the support of investigators and science departments at outstanding liberal arts colleges, institutions that continue to train a large percentage of the students who go on to graduate work in the sciences. Faculty research projects in this setting give undergraduates a vital opportunity to do original work in science. The foundation will continue its grants-making activities in all of these areas, and will supplement them as its means permit.

In recent years a number of industrial firms, foundations and highly motivated individuals have chosen to help strengthen academic science as a philanthropic endeavor through the mechanism of Research Corporation's Grants Program. In closing I would like to extend the thanks of the foundation and the academic community to all of those who have contributed in this manner. It is hoped that others in industry and the nonprofit sector will make similar investments in the nation's scientific and technological future. —John P. Schaefer

College Science Grants

(Continued from page 3)

C. A. LEWIS and MICHAEL R. McCONNELL, Point Loma College: A. Ultrastructural analysis of sperm-egg interactions and hybridization in California abalone. B. Mechanisms of infection of gram-negative bacteria by bacteriophages. C. Morphological and biochemical studies on the digestive tracts of two morphs of the tadpole, *Scaphiopus multiplicatus*—\$8,000

ARIEL G. LOEWY, Haverford College: Modulation of covalent interactions between cellular proteins (two-year program)—\$13,650

COLIN F. MacKAY, Haverford College: The photochemistry of carbon suboxide—\$5,855

DON H. MADISON, Drake University: Accurate inelastic electron-atom cross sections (three-year program)—\$15,500

MICHAEL R. McCONNELL, Point Loma College: The mechanism of infection of *Salmonella anatum* by bacteriophage ϵ^{15} (two-year program)—\$12,300

TIMOTHY J. McNEESE, Loyola College, Md.: Synthesis, structure, and reactivity of hydroxo group VI metal carbonyl derivatives (two-year program)—\$14,835

MICHAEL E. MICKELSON, Denison University: Laboratory measurement of the infrared and visible spectrum of hydrogen deuteride—\$9,500

JAY M. PASACHOFF, Williams College: Optical observations of solar prominences (two-year program)—\$10,000

FRANK W. PERCIVAL, Westmont College: Identification and concentrations of naturally-occurring bound auxins in soybean seeds and seedlings—\$5,500

HAROLD W. PINNICK, Bucknell University: Synthesis of anatoxin-a (three-year program)—\$15,000

LOUIS V. QUINTAS, Pace University: Random graphs and phase transitions in aqueous solutions—\$5,400

C. GARY REINESS, Pomona College: Development of neuromuscular junction in normal mice and mice with motor endplate disease (two-year program)—\$20,000

RANDALL E. ROBINSON, Luther College: Synthetic and mechanistic studies of the copper(II)/hydrazine system—\$2,500

MARTIN J. SERRA, Allegheny College: The separation of euchromatin from heterochromatin by affinity chromatography (two-year program)—\$13,000

HOWARD W. SHIELDS, Wake Forest University: An EPR study of antibiotic binding with DNA (two-year program)—\$10,800

DIANA B. STEIN, Mount Holyoke College: Chloroplast DNA sequence studies in the Osmundaceae—\$12,000

WILLIAM H. TAMBLYN, Franklin and Marshall College: The chemistry and synthetic applications of the octahydrotriborate ion and its organometallic complexes (two-year program)—\$19,220

STEPHEN K. TAYLOR, Olivet Nazarene College: Friedel-Crafts reactions of epoxides—\$4,400

LARRY L. TIESZEN, Augustana College: Carbon isotope discrimination in C_3 and C_4 plants and the use of stable isotopic labels to study Great Plains paleoecology (three-year program)—\$19,000

JERRY L. WALSH, Lafayette College: Substitution and isomerization in polypyridyl ruthenium(II) complexes (two-year program)—\$10,850

STEVEN J. ZOTTOLI, Williams College: Regeneration of a vertebrate central neuron (three-year program)—\$15,600

Grants and Grantees

(Continued from page 2)

trolled molecular environment.” Not only has photooxidation of various organic substances on zeolites been demonstrated, but entirely new techniques have been developed for studying catalytic processes.

QUARTERLY BULLETIN SUMMER 1982

Research Corporation, 405 Lexington Ave.,
New York, N.Y. 10174-0370

A foundation for the advancement of science and technology, Research Corporation serves educational and scientific institutions through grants-in-aid for basic research in the natural sciences, and by furthering the application of scientific discoveries.

Grants Program

Cottrell Research Grants support basic investigations in the physical sciences at graduate universities and public undergraduate institutions.

Cottrell College Science Grants support academic research projects in the natural sciences at private undergraduate institutions.

In addition to these regular programs, Research Corporation occasionally supports other important scientific endeavors within its general fields of interest.

Invention Administration Program

Services contributed to educational and scientific institutions include evaluating faculty and staff inventions, accepting assignment of those which appear to be useful and marketable, applying for patents through qualified counsel, licensing issued patents to industry, and defending against infringement when necessary.

Royalties received from patents assigned to the foundation are apportioned among the inventor, the institution and Research Corporation, with the institution's patent policy determining the inventor's share. The foundation's share is used to help support its Grants and Invention Administration Programs.

The *Quarterly Bulletin* is published three times yearly, with the Annual Report constituting a fourth issue. Articles may be quoted in whole or in part with credit to Research Corporation. Invention administration projects are reported in *Research and Invention*, an occasional newsletter. Address correspondence to W. Stevenson Bacon, Director of Communications.

Authority in Business Development Joins IAP

Donald M. Coyne, a chemist, chemical engineer and expert in the development of new business has joined Research Corporation's Invention Administration Program. In addition to assisting with the evaluation and licensing of new technology, Dr. Coyne will help the foundation expand its technology transfer efforts.

Supplementing its patent licensing activities, Research Corporation will use venture capital and entrepreneurial techniques to develop inventions under plans now being formulated.

A native of Olathe, Kans., Dr. Coyne graduated from the Universities of Kansas and Pittsburgh, and holds an MBA as well as degrees in chemistry. After a number of years in the petrochemical industry, he joined Gulf Oil Corporation in 1963. An executive with Gulf Science & Technology Co. from 1975 until 1982, Coyne held posts as Manager of Marketing Research and Manager, Technology Transfer, and served as Washington representative.

Dr. Coyne is a member of the Commercial Development Association and immediate past president, and member of the American Chemical and Licensing Executives Societies.

Foundation Counsel to Guide Invention Patenting

Jerome (Jerry) M. Teplitz has been named in-house patent counsel for Research Corporation's Invention Administration Program. He will oversee the filing of patent applications and their prosecution by outside firms retained by the foundation. Teplitz joins attorney Robert J. Sanders, Jr., who has been made General Counsel.

Mr. Teplitz, trained both as a chemical engineer and an attorney, served as an examiner at the U.S. Patent and Trademark Office before undertaking a career in industry and later in private practice. Prior to joining Research Corporation, he was patent counsel for University Patents, Inc. of Norwalk, Conn.

and a member of the firm of Holman and Stern of Washington, D.C.

He is registered to practice before the U.S. Patent and Trademark Office, and is admitted to the Illinois, Maryland and Federal Bars, and the Court of Customs and Patent Appeals.

Patent Associate Retires; Expert on Pharmaceuticals

Abraham Bavley, a research scientist and prolific inventor with over 60 patents in such fields as color photography, pharmaceuticals and chemical processes, has retired as a professional staff member of Research Corporation's Invention Administration Program.

Dr. Bavley, a Harvard-educated organic chemist well known in both business and academic circles, came to the foundation in 1974 following a career as an industrial scientist and executive for such firms as GAF, Philip Morris and Marion Laboratories, and as a faculty member in pharmaceuticals for the Universities of Tennessee and Missouri.

During his years at Research Corporation, Dr. Bavley evaluated most of the drug inventions submitted to the foundation, including a number that later proved successful. Although retired, he will remain a consultant to the foundation on pharmaceuticals reviewed for patenting and licensing.

Foundation Annual Report Due in March

The Research Corporation annual report for 1982 is planned for March 1983 publication and will be available by early spring to all those requesting it.

In contrast to the reports of recent years, published in January, the new offering will be illustrated and will feature in-depth coverage of especially interesting grants and invention administration projects.

Those not now on the list to receive the foundation's report can request it by writing to Director of Communications, Research Corporation, 405 Lexington Ave., New York, N.Y. 10174.

QUARTERLY BULLETIN FALL 1982

*Research Corporation, 405 Lexington Ave.,
New York, N.Y. 10174-0370*

A foundation for the advancement of science and technology, Research Corporation serves educational and scientific institutions through grants-in-aid for basic research in the natural sciences, and by furthering the application of scientific discoveries.

Grants Program

Cottrell Research Grants support basic investigations in the physical sciences at graduate universities and public undergraduate institutions.

Cottrell College Science Grants support academic research projects in the natural sciences at private undergraduate institutions.

In addition to these regular programs, Research Corporation occasionally supports other important scientific endeavors within its general fields of interest.

Invention Administration Program

Services contributed to educational and scientific institutions include evaluating faculty and staff inventions, accepting assignment of those which appear to be useful and marketable, applying for patents through qualified counsel, licensing issued patents to industry, and defending against infringement when necessary.

Royalties received from patents assigned to the foundation are apportioned among the inventor, the institution and Research Corporation, with the institution's patent policy determining the inventor's share. The foundation's share is used to help support its Grants and Invention Administration Programs.

The *Quarterly Bulletin* is published three times yearly, with the Annual Report constituting a fourth issue. Articles may be quoted in whole or in part with credit to Research Corporation. Invention administration projects are reported in *Research and Invention*, an occasional newsletter. Address correspondence to W. Stevenson Bacon, Director of Communications.

LIST OF INSTITUTIONS

At the end of the 1982 fiscal year, the following 287 colleges, universities and other nonprofit institutions had agreements with Research Corporation through which they may receive at no charge invention administration services provided by the foundation. These services are also available without charge on a case by case basis to other institutions which have not signed agreements.

between
RESEARCH CORPORATION
and
INSTITUTION

THIS AGREEMENT, made effective this _____ day of _____, 198 , between INSTITUTION, a corporation incorporated and existing under the laws of the State of _____, having its principal office at _____, hereinafter called "INSTITUTION", and RESEARCH CORPORATION, a not-for profit corporation incorporated and existing under the laws of the State of New York, having offices at 405 Lexington Avenue, New York, N. Y. 10174, hereinafter called "RESEARCH";

WITNESSETH THAT:

DEFINITIONS

As used herein the following defined terms shall have the meanings ascribed to them as follows:

"Invention" shall mean invention or discovery or novel plant variety. An Invention shall be "made" when it is conceived.

"Inventor" shall mean one who makes an Invention or one who is a breeder of a novel plant variety susceptible of protection by means of a Plant Variety Protection Certificate or the like.

"Patent" shall mean a patent or Certificate of Invention or Utility Model or Design Registration or Plant Variety Protection Certificate or other form of protection for an Invention issued by a government or governmental agency.

"Patented" shall mean covered by a Patent.

"Patent Policy" shall mean the applicable policies, programs, regulations and expressed or implied contracts governing and/or determining the rights of INSTITUTION in and to the Inventions, Patent Applications and Patents of members of its faculty, staff, fellows, associates, students, employees and others who may be subject thereto.

"Patent Rights" shall mean all right, title and interest in and to an Invention, any Patent Application filed or to be filed thereon and any Patent issued or issuing thereon, the right to file for any such Patent and to have any such Patent issued in the name of the owner or assignee and the right to claim any priority right to which the Inventor or anyone claiming under him may be entitled.

"Deductible Expenses" shall mean the sum of the out-of-pocket expenses incurred by RESEARCH for litigation in courts of record to obtain, or to assert or defend the validity or scope of, any Patent administered under this agreement; provided INSTITUTION shall have given its written consent to treat such expenses as Deductible Expenses.

"Gross Income" shall mean all moneys and the money equivalent of any other consideration received by RESEARCH by reason of its ownership and administration of any Invention, Patent or Patent Rights under this agreement, but shall not include any amounts paid by a licensee or prospective licensee of RESEARCH under any such Patent or Patent Rights expressly for the expenses of filing, prosecuting or maintaining any Patent Application or Patent on such Invention.

NOTICE shall mean written notice sent by prepaid,
first-class, registered or certified mail, return receipt
requested.

RECITALS

A. WHEREAS, INSTITUTION believes that Inventions may be made by members of its faculty, staff, fellows, associates, students, employees or others covered by INSTITUTION's Patent Policy; and

B. WHEREAS, RESEARCH has had broad experience in the evaluation of Inventions for commercial and scientific utility, as a basis for determining the feasibility of seeking Patents thereon, and in introducing Inventions into use in the useful arts and manufactures and for scientific purposes; and

C. WHEREAS, INSTITUTION desires that Inventions referred to in Paragraph A be evaluated, Patented and introduced into use in an effective manner and with due regard for the public interest; and

D. WHEREAS, INSTITUTION further desires that any net income from such Inventions be used to provide means for the advancement and extension of technical and scientific investigation, research, experimentation and education; and

E. WHEREAS, RESEARCH is a not-for-profit corporation organized for the purpose of providing means for the advancement and extension of technical and scientific investigation, research and experimentation, no part of the net earnings of which inures to the benefit of any private shareholder or individual; and

RESEARCH is prepared to evaluate such Inventions, to obtain Patents on those which it selects, to introduce such selected Inventions into use through its ownership of any Patent Applications filed and Patents issued on them, primarily by issuing licenses to third parties, and to devote all net income resulting from the administration of such Inventions to the purposes of its charter as a not-for-profit corporation.

NOW, THEREFORE, in consideration of the mutual covenants and undertakings herein contained, the parties DO AGREE AS FOLLOWS:

I. INSTITUTION's Duties: INSTITUTION agrees to:

(1) Arrange, in its discretion, for the submission to RESEARCH of those it may select of the Inventions of members of its faculty, staff, fellows, associates, students, employees, and others covered by INSTITUTION's Patent Policy, which INSTITUTION owns or shall be entitled to own or license to others, or which INSTITUTION may be entitled to own or license to others upon petition to a governmental or private granting or contracting agency or organization, for evaluation by RESEARCH and administration under this agreement if accepted by RESEARCH.

(2) Assign or arrange for assignment to RESEARCH of its right, title and interest in and to such Inventions submitted to RESEARCH pursuant to Article I, paragraph (1) above, as RESEARCH shall elect to accept under this agreement, together with the Patent Rights thereon.

its faculty, staff, fellows, associates, students, employees, or others covered by INSTITUTION's Patent Policy, whose Inventions are not embraced within Article I, paragraph (1) above, that they submit to RESEARCH such Inventions for evaluation with the understanding that they will assign to RESEARCH their right, title and interest in and to those of the aforesaid Inventions submitted to RESEARCH which RESEARCH shall elect to accept under this agreement, together with the Patent Rights thereon.

(4) Afford to RESEARCH to a reasonable extent, upon request, the advice and assistance of such members of INSTITUTION's faculty, staff, fellows, associates, students and employees or others covered by INSTITUTION's Patent Policy in seeking Patents upon and otherwise administering under this agreement any Inventions accepted by RESEARCH hereunder, without charge therefor.

(5) Advise RESEARCH at the time of submission of any Invention to RESEARCH of any commitments INSTITUTION or an Inventor of such Invention has made to any third party for licenses or other rights under such Invention and the Patent Rights thereon.

(6) Designate a member of INSTITUTION's faculty or staff as liaison with RESEARCH with the responsibility of assuring that INSTITUTION's role in the identification and administration of Inventions under this agreement shall be carried out effectively; and, notify RESEARCH in writing of each person so designated.

(7) Notify RESEARCH in writing in the event that it shall undertake to establish an office or other facility or operation (other than a member of INSTITUTION's faculty or staff designated solely as liaison with RESEARCH pursuant to Article I, paragraph (6) above) for the administration, patenting or licensing of Inventions that might otherwise be submitted to RESEARCH for evaluation and possible administration under this agreement.

(8) Notify RESEARCH in writing of any other agreement or other arrangement it has entered into or shall enter into with any other person or organization for the administration, management or licensing of Inventions that might otherwise be submitted to RESEARCH for evaluation and possible administration by RESEARCH under this agreement and advise whether or not such agreement or arrangement provides that such third party will have the right of first refusal as to any such Invention or the Patent Rights thereon.

II. RESEARCH's Duties: RESEARCH agrees at its own sole cost and expense to:

(1) Provide at its discretion such visitations to INSTITUTION as it may deem appropriate by staff or other professionals designated by RESEARCH, for the purpose of conferring with administrators, faculty, staff, fellows, associates, students, employees or others covered by INSTITUTION's Patent Policy with a view toward identifying and assisting INSTITUTION in identifying Inventions which may be

the subject of this agreement and for the purposes of evaluating and licensing such Inventions and otherwise carrying out the purposes of this agreement.

(2) Evaluate all Inventions submitted to it by or on behalf of INSTITUTION for administration under this agreement, and accept assignment of those of such Inventions, under the terms of this agreement, as it may determine in its discretion should be accepted for administration hereunder.

(3) Within a reasonable time after receipt by RESEARCH of any Invention submitted to it for evaluation under this agreement, advise INSTITUTION in writing of its decision to accept or reject such submitted Invention for administration hereunder. In the event RESEARCH's decision is negative with respect to acceptance of any Invention, INSTITUTION shall, upon receipt of such written decision from RESEARCH, be free to apply for Patents, license others, and take such other steps with respect to such Invention as in its discretion it may see fit to do, all without further obligation under this agreement. In the event RESEARCH's decision is positive with respect to acceptance of any Invention, it will so advise the Inventor(s) in writing by a letter, copy of which is to be acknowledged by the Inventor(s) and returned to RESEARCH.

(4) File United States Patent Applications on those of such Inventions as it may choose to accept for administration under this agreement and prosecute the same in good faith with the intention of securing issuance of Patents thereon.

(5) file corresponding foreign Patent Applications thereon, and prosecute the same in good faith with the intention of securing issuance of Patents thereon, all to the extent that it may in its discretion determine.

(6) Maintain such Patents and cause them to be worked, all to the extent that it may in its discretion determine.

(7) Attempt to introduce such Inventions, Patent Applications and Patents so assigned into public use and to secure a reasonable revenue therefrom in such manner as its considered judgment best dictates.

(8) On or about March 15 in each year make the following (a) income distribution computations and (b) payments of income shares, if any, due INSTITUTION, for each INSTITUTION Invention individually:

(i) Fifteen (15%) percent of the Gross Income shall be computed and paid to INSTITUTION, its successors and assigns.

(ii) Subtract from eighty-five (85%) percent of the Gross Income the Deductible Expenses incurred during the preceding calendar year; from the difference thus obtained subtract the Debit (defined below), if any, which was carried forward; if this subtraction produces a negative difference (a Debit), it shall be carried forward to be used in the following year's income

distribution computation; if it produces a positive difference, fifty (50%) percent of such difference shall be paid to

INSTITUTION, its successors and assigns.

At the option of INSTITUTION, expressed in writing to RESEARCH, any amount attributable to any Invention (or any portion thereof) that is payable to INSTITUTION under this Article II, paragraph (8) shall be paid directly to the Inventor (or to the heirs, assigns or legatees of such Inventor), and, in the event of co-inventorship of any such Invention such amount shall be divided between or among the co-inventors in such manner as INSTITUTION may determine and advise RESEARCH in writing.

(9) Furnish to INSTITUTION simultaneously with the payments required under Article II, paragraph (8) above a report showing (a) activities during the preceding calendar year in connection with each Invention accepted hereunder, and (b) the computation of payments made under Article II, paragraph (8) hereof.

(10) Upon request by INSTITUTION, furnish to each Inventor of an Invention accepted for administration under this agreement a report showing (a) activities during the preceding calendar year in connection with such Invention, and (b) the computation of payments made as to such Invention under Article II, paragraph (8) hereof.

(11) Maintain at its offices, in usual form, books of record, ledgers and accounts relating to its activities under this agreement, all of which shall be open to examination by INSTITUTION or its nominees during usual business hours.

(12) issue to any third party any license or other right required by any contract between INSTITUTION and such third party, entered into between INSTITUTION and such third party prior to submission to RESEARCH, as to any Invention acquired by it under this agreement, and as to Patent Applications filed and Patents issued thereon.

(13) Continue as licensor, grantor or contracting party as to licenses, grants, working rights, agreements or other contracts to which any Invention, Patent Application or Patent acquired by it under this agreement is subject at the time of any further assignment thereof by RESEARCH, and to continue to report upon and make computations and payments of moneys under Article II, paragraph (8) hereof and to make reports under Article II, paragraphs (9) and (10) hereof, with respect thereto.

(14) Treat as proprietary and with the same degree of confidentiality that it treats other information of like kind all Inventions and related information received by it hereunder which has not been published or which is not the subject of an issued Patent or a pending Patent Application and not disclose the same to any third party except to the extent necessary or proper in order to achieve the purposes and intent of this agreement, it being understood and agreed that RESEARCH shall treat such Inventions and related information with the requisite degree of confidentiality necessary to preclude jeopardizing the patentability of such Inventions and that RESEARCH will in each case require any such third party recipient thereof to agree to hold the same with the same degree of confidentiality as that required of RESEARCH.

reserves the right to:

(1) Terminate this agreement upon three (3) months' Notice to RESEARCH at any time; it being understood, however, that any Invention that shall have been submitted to RESEARCH under this agreement prior to the effective date of termination thereof under this Article III shall be subject to this agreement if it is otherwise embraced within Article I hereof.

(2) At any time after three (3) months from the date of receipt by RESEARCH of any Invention submitted to it for evaluation under this agreement, give Notice to RESEARCH that RESEARCH must accept or reject such Invention within thirty (30) days of receipt of such Notice, and if RESEARCH fails to accept or reject the Invention within such thirty (30) day period INSTITUTION shall thereafter be free to apply for Patents, license others, and take such other steps with respect to such Invention as it may see fit to do, all without further obligation to RESEARCH under this agreement. The provisions of this paragraph (2) shall not apply to any Invention that RESEARCH shall have submitted to a third party for screening, with approval of INSTITUTION, in the course of evaluation of such Invention, unless and until such third party shall have advised RESEARCH that it is not interested in or is not continuing its evaluation of such submitted Invention.

IV. RESEARCH'S Reserved Rights: RESEARCH reserves the right to:

(1) Terminate this agreement upon three (3) months' Notice to INSTITUTION at any time; provided, however, that any Invention that shall have been submitted to RESEARCH under this agreement prior to the effective date of termination thereof under this Article IV shall be subject to this agreement if it is otherwise embraced within Article I hereof.

(2) Give Notice to INSTITUTION of its intention to abandon any Patent Application or Patent subject to this agreement and thereafter abandon or take no further action as to such Patent Application or Patent, unless within sixty (60) days after such Notice INSTITUTION shall have requested RESEARCH in writing to assign such Patent Application or Patent to INSTITUTION or its nominee, in which event RESEARCH shall so assign such Patent Application or Patent as requested.

(3) Give Notice to INSTITUTION of its intention not to proceed further with the introduction into public use of any Invention, Patent Application or Patent which has been accepted by RESEARCH under this agreement, and thereafter in its discretion cease such introduction; upon written request by INSTITUTION, RESEARCH shall assign such Invention, Patent Application or Patent to INSTITUTION or its nominee.

(4) In its discretion assign to INSTITUTION or its nominee, upon any termination of this agreement, its right, title and interest in and to any Invention assigned to RESEARCH hereunder, together with any Patent Applications filed and Patents issued thereon and all right to damages for infringements of such Patents taking place after such

termination, but subject to any licenses, grants, working rights, agreements or other contracts with respect thereto theretofore made by RESEARCH.

(5) Receive for the general purposes of its charter out of any moneys received by its assignee or assignees under Article IV, paragraph (4) of this agreement by reason of such assignee's or assignees' ownership and/or management of any Inventions, Patent Applications or Patents so assigned or thereafter filed or issued thereon, an amount corresponding to any Deductible Expenses not theretofore recovered by RESEARCH through subtraction under Article II, paragraph (8) (ii) hereof as to such Invention and thirty (30%) percent of the amount remaining following deduction and subtraction therefrom by such assignee or assignees of any sums needed to reimburse such assignee or assignees for such expenses

as RESEARCH and such assignee or assignees may have previously agreed upon in writing as expendable for litigation in courts of record to obtain, or to assert or defend the validity or scope of, any such Patent.

(6) Retain for use in accordance with the general purposes of its charter the balance of any Gross Income remaining after making the payments specified in Article II, paragraph (8) hereof.

V. ARBITRATION

Any controversy or claim arising out of or relating to this agreement or the breach thereof shall be settled by arbitration, in accordance with the Rules, then obtaining, of

award rendered may be entered in the highest court of the forum, state or federal, having jurisdiction.

VI. GOVERNMENT RIGHTS

This agreement is expressly subject to such terms and conditions as may be imposed on the patenting, licensing, disposition, administration, or royalty distribution of any Invention administered hereunder and the Patent Rights thereon as the result of any rights the United States Government may have or be entitled to have in such Invention or Patent Rights as the result of any contract, grant or funding related to the research or other work that resulted in such Invention.

VII. INVENTIONS RESULTING FROM RESEARCH CORPORATION GRANTS

Nothing contained in this agreement shall be construed to require INSTITUTION or any Inventor to submit or assign to RESEARCH any Invention resulting from research or other work conducted pursuant to a grant from RESEARCH under which RESEARCH shall have waived its right in and to any Invention or Patent Right on such Invention, provided, however, that INSTITUTION or any such Inventor may in its discretion submit or assign any such Invention to RESEARCH for administration under this agreement.

VIII. NOTICE

Any notice to be given under this agreement to INSTITUTION or to RESEARCH shall be deemed properly and sufficiently given if mailed by first-class certified or registered, postpaid mail to:

(Title)
Institution
Address
City, State & zip code; and

RESEARCH, as
Dr. Willard Marcy
Vice President
Research Corporation
405 Lexington Avenue
New York, New York 10174

Each party reserves the right to change such officer and address for notification, by notice so given.

IX. LAW GOVERNING

This agreement shall be governed and construed according to the laws of the State of New York.

IN WITNESS WHEREOF, the parties hereto have caused this agreement to be signed and their corporate seals to be hereunto affixed, all by their corporate officers thereunto duly authorized, on the date(s) indicated below to be effective as of the day and year first above written.
