July 19, 1974

JUL 22 1974

Professor Roger Boom  
513 Engineering Research  
Madison Campus

Dear Roger:

This morning, I talked to Walter Lander of the Bureau of Mines who informed me that Gersten Sadowsky has written to you asking for comments on a proposed application for patent in connection with your invention entitled, "Magnetic Ore Separator". Thus, it appears that the Bureau of Mines has adopted one of the alternatives which we indicated would be acceptable to us. My further involvement, I believe, is unnecessary.

Mr. Lander advised me that persons or companies interested in licenses under Bureau of Mines patents should contact

Mr. Charles Dozois, Chief  
Division of Procurement Property Management  
Bureau of Mines  
Room 2753 Interior Building  
18th and E Street, N.W.  
Washington, D.C. 20240

Perhaps you will want to give this information to the company that indicated some interest in developing the Magnetic Ore Separator.

Sincerely,

Robert E. Gentry  
Associate Vice President
