COGR PATENT COMMITTEE

Attached is a February 13, 1984, draft of the voluntary A-124 reporting form which we have been discussing.

Our objective has been to keep the number of items reported to a minimum. Each institution could adopt its own format, as long as each element is included. In addition to the individual invention reports, a summary cover letter or table probably needs to be developed.

May I please have your comments promptly. Once we can agree, we will then distribute the final format to other COGR institutions. In the meantime, I will coordinate with Commerce.

Roger G. Ditzel
