POST OFFICE BOX 2217 • ALPINE 7-4851 • 506 NORTH WALNUT STREET

MADISON 6, WISCONSIN

March 2, 1964

Mr. A. W. Peterson  
Vice President & Trust Officer  
171 Bascom Hall  
The University of Wisconsin  
Madison, Wisconsin 53706

Dear Pete:

As I am dictating this, you are in the Cabinet Meeting and since I am leaving shortly for New York, I decided to write you rather than try to reach you by phone.

Apropos of the Case History of Warfarin I handed to you when you were in my office a couple of weeks ago, I urge that you not use this with Lunden's Committee or any other group, since it definitely needs revision to bring it up to date. That case history was prepared in the fall of 1960, about three and a half years ago and should be quite materially changed in a number of respects in the light of our present day knowledge.

On the urea matter, I drafted something, but for various reasons I will go into later, we are not ready to release that case history. I will be in New York all week, but will be getting in touch with you about these matters early in the week of March 9.

Best personal regards,

Ward Ross,  
Managing Director
