Madison, Wisconsin 53706

Dear Bill:

Re: Davis-Maloney
Agronomy Department

Thank you for your letter of November 4 advising that since the research leading to the discovery by John R. Davis and John T. Maloney of the Agronomy Department of a seed counter was not from funds governed by patent restrictions, WARF and the inventors are now free to pursue any program which may facilitate getting this invention into public use.

Best personal regards,

Ward Ross,
Managing Director
