

→ The minister has got roughly signed and says the in principle of legislation which will refer to the full 17-year ~~period~~ period term ~~skated~~ called for in the railroad statute for those products which are subject to premarketing regulatory review. The case for such legislation was ably made by Dr. Vignale in his testimony before the subcommittee last Tuesday and the agreement he advances apart ~~the~~ even more particularly in ~~the~~ ^{the} nature of this kind which may be generated in a minority environment. ~~such~~, ~~the~~ ~~is~~ ~~generally~~ ~~the~~ ~~most~~ ~~easy~~ ~~in~~ ~~nature~~, ~~they~~ ~~require~~ ~~substantive~~ ~~development~~ ~~even~~ ~~before~~ ~~the~~ ~~issuance~~ ~~of~~ ~~the~~ ~~regulatory~~ ~~proceeds.~~

First ~~the~~ ~~final~~ ~~comments~~: the minister's ~~rather~~ ~~rather~~ evidence the establishment of the Patent Office as an independent agency, and fails to see the necessity for a dualization of combining the various pieces of legislation which have been advanced into a single congressional Bill. Upon such a point the commonality of many of these bills lies only in that they reflect upon the patenting process.
