Here it is -- the 1988 list of patents issued to Universities. The list is generated by computer search and there are many little ways that errors can creep in. For instance, in checking the Minnesota printout against our own files, I discovered that two of our patents with slightly incorrect assignee names had not been picked up and that one of our patents erroneously did not carry our name. I am sure that similar errors could occur in any of the printouts. Please, if the number of patents for your university is not correct, send me a list of 1988 patents and I'll make the proper corrections to this list.

As a bonus, I include a list of patents for 1984 and 1985, to accompany the more complete workups for 1986, 1987 and 1988.

Is this a trend? That total for 1988 was about 800, down from the 1987 count of nearly 900. (These totals include Research Corporation, UPI, research institutes and foreign universities). This list may be used by anyone for any purpose, but please send a copy of any article citing it to:
