Mr. Urban H. Faubion Patent Counsel SRI International 333 Ravenswood Avenue Menlo Park, CA 94025

Dear Urban:

The attached memorandum was recently sent out to SUPA members. I have the impression from some of our conversations that SRI has been able to encourage inclusion of private funding into NIH grant projects on the basis of your IPA before any inventions were made. If this is correct, it would be extremely helpful if you could transmit this information directly to Bill Burke in a short narrative. We are still trying to salvage the SRI-Picker case. I think you should be hearing something within a few weeks.

Thank you.

Sincerely,

Norman J. Latker Patent Counsel

Enclosure
