Mr. Norman Lattker
Director, Office of Federal Technology Management Policy
Office of Productivity, Technology and Innovation
U.S. Department of Commerce
Washington, DC 20006

Dear Norman:

I understand that you have obtained a significant amount of information on an increasing level of new university-industry activities which have followed on, and are attributable to, P.L. 96-517. I am always looking for information which can help NASA strengthen its programs for making our technology broadly available within the U.S. economy and would be very interested in any information relating to this that you could share with us. I could use, especially, statistical summaries, tabular compilations, or other summaries evidencing the nature and extent of the new university-industry activity and its roots in P.L. 96-517.

Since this is the time of year when we do a great deal of our planning for program improvements, the sooner this is available, the more value it will have for us.

Sincerely,

Ronald J. Philips
Director, Technology Utilization
and Industry Affairs
