MEMORANDUM

CLASSIFICATION?

January 27, 1941

Remitter: Louis Gould (5048)--Class KK?

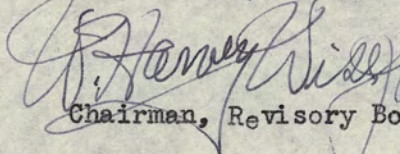

Title: "Of Interest...and for the Exclusive Benefit of Churches, Schools and School Organizations, Fraternities, Organized Groups."

Question: Classification.

The work filed consists of a single page folder designed for use in the advertising and sale of pencils. There is sufficient pictorial matter to justify registration as a commercial print, providing that the recent recommendations of the Revisory Board with respect to such material have met with the approval of the Assistant Register. Granting for the purposes of argument that there is doubt as to the proper classification--book or commercial print--the notice of copyright is inadequate for registration as a book. It is acceptable, however, for a commercial print since it does contain the initials of the copyright owner and the name does appear on some accessible portion of the copy.

In view of all of these circumstances the Revisory Board is of the opinion that an application for registration as a commercial print should be accepted.

Respectfully submitted,

Chairman, Revisory Board

Request KK application and additional fee.--H.A.Howell.
