## MEMORANDUM

Mins - July 9, 1941  
July 30, 1941

Remitter: Remington Rand, Inc. (46012)  
Title: "Remington Educational Keyboard"

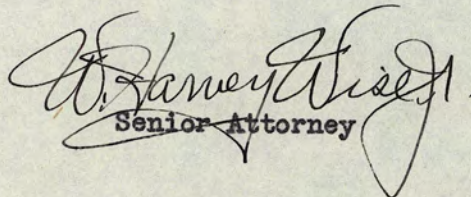

To Members of the Revisory Board.

Referring to "Remington Educational Keyboard."

The application submitted on Form I-2 by the Remington-Rand Company, Inc., for a work entitled "Remington Educational Keyboard" came to the attention of the Register of Copyrights.

He observed that the application was filed as "a drawing of a scientific or technical character" and that after the title in Space (6) of the application the following statement appears: "No claim is made by this copyright in the Keyboard shown in the drawing. The Copyright claim is directed to the drawing only."

The copies accompanying this application are on paper and are not the actual keyboard, but rather a drawing of the keyboard. In view of all of these circumstances the Register of Copyrights reached the conclusion that registration could be made. The application filed is for a drawing and copies of a drawing have been deposited.
